

# Critical Review Structure

Critical reviews, both short (one page) and long (four pages), usually have a similar structure. Check your assignment instructions for formatting and structural specifications. You need to write a critical review not more than 2000 words. Please use the following structure for your own critical review. Choose one of the following journals attached. There are FIVE journals that you may choose **ONLY ONE** and review based on your own interest. Font size of your review should be **12, doubled space**, and in **Times New Roman Style**. Put your identity and NIM in your work (don't forget to have a cover).

## Introduction

The length of an introduction is usually one paragraph for a journal article review and two or three paragraphs for a longer book review. Include a few opening sentences that announce the author(s) and the title, and briefly explain the topic of the text. Present the aim of the text and summarize the main finding or key argument. Conclude the introduction with a brief statement of your evaluation of the text. This can be a positive or negative evaluation or, as is usually the case, a mixed response.

## Summary

Present a summary of the key points along with a limited number of examples. You can also briefly explain the author's purpose/intentions throughout the text and you may briefly describe how the text is organized. The summary should only make up about a third of the critical review.

## Critique

The critique should be a balanced discussion and evaluation of the strengths, weakness and notable features of the text. Remember to base your discussion on specific criteria. Good reviews also include other sources to support your evaluation (remember to reference).

You can choose how to sequence your critique. Here are some examples to get you started:

## **Transformative Perspectives In Human Development: Review Papers, Critical Reflections And Emerging Paradigms**

Prof Dr Kamini Prakash Rege, 2025-07-18 The reviewed literature underscores the evolving and multifaceted nature of human development in contemporary society Young adults today face complex relational technological and societal pressures that shape their emotional psychological and social trajectories A prominent concern is the prevalence of dating abuse and psychological manipulation often involving coercion emotional degradation and isolation which can result in lasting impacts on self esteem and mental health Relatedly the experience of being ghosted reflects broader patterns of emotional unavailability and normalization of abrupt relationship dissolution contributing to anxiety abandonment issues and mistrust Social media plays a dual role in mental health discourse While it helps destigmatize psychological disorders the commodification and misuse of diagnostic labels have led to widespread self diagnosis and misinformation This trivialization can obscure the severity of genuine mental health conditions and reduce the perceived value of professional care Digital technologies and artificial intelligence also significantly influence the development of children and adolescents While personalized learning and educational gamification offer potential benefits they introduce concerns such as data privacy screen dependence overstimulation and reduced face to face socialization Human development concerns are increasingly seen as lifelong Early and pre retirement transitions for instance highlight the need for emotional and financial preparedness beyond youth Work life balance emerges as another critical theme for younger populations High expectations and hypercompetitive environments often result in chronic stress and burnout making balance a necessity for long term well being rather than a luxury Across all themes the literature emphasizes the need for proactive interventions educational efforts and systemic reform A holistic approach to human development considering emotional cognitive relational and digital dimensions is essential Institutions educators families and policymakers must collaborate to build adaptive and resilient support systems that reflect evolving developmental needs with empathy equity and evidence based strategies
