A Chinese Medical Reference Nigel Wiseman, Eric Brand, 2022-07-22 The English language literature of Chinese medicine lacks reference materials Since the very first acupuncture programs decades ago students have compiled lists of textbook items they need to memorize Students today still make lists a somewhat surprising fact in a digital age *A Chinese Medical Reference Symptoms Patterns Diseases Acupoints Medicinals and Formulas* is a complete set of lists designed to save all the work This comprehensive reference work is compiled to the highest professional standards from original Chinese sources and its digital format ensures easy searchability and maximum affordability As the title suggests *A Chinese Medical Reference Symptoms Patterns Diseases Acupoints Medicinals and Formulas* presents the key Chinese concepts thematically in six sections with each concept forming an entry It presents 320 symptoms 130 patterns 130 diseases 400 acupoints 570 medicinals and 260 medicinal formulas With a total of 1 800 entries it covers a comprehensive range of concepts including the most tested and commonly used plus all the most searched items in a course of study Throughout Chinese terms are given in simplified and complex characters so that they can be found by anyone who knows Chinese Pinyin is given in accented and unaccented form so that users can search whether they know the tones or have a system capable of entering tone marks General terms can be searched by English acupoints by alphanumeric codes and medicinals by English and Latin pharmacognostic names The material has been drawn from other works Symptoms patterns and diseases come from *Chinese Medicine Theories of Modern Practice* while acupoints medicinals and formulas have been extracted from our databases Those works have all been compiled from Chinese sources ensuring that students

receive information of the same scope and quality as taught in China's professional medical colleges. A major problem for students is terminological inconsistencies between English language authors. One and the same concept may be represented by one term in one author and by a different term in another. Even more confusing, one and the same term may refer to different concepts depending on the author. A Chinese Medical Reference: Symptoms, Patterns, Diseases, Acupoints, Medicinals, and Formulas avoids this problem with rigorous consistency. Each concept is referred to by a single English term that closely mirrors the Chinese original. Wherever that concept appears, it is always referred to by the same name. When a concept is referred to by a single term every time it is used, students can develop their understanding of the concept by seeing how it is used in different contexts. The digital format is so much more practical than the indexes contained in paper books, allowing readers to search through a whole text, find each context, thereby enhancing their understanding. Since the digital versions of other works by Wiseman and his colleagues all use the same terminology, searches can be performed over a wide range of literature, including Chinese Medicine: The Ideas that Shaped It, Chinese Medicine Theories of Modern Practice, Comprehensive Chinese Materia Medica, Concise Chinese Materia Medica, Fundamentals of Chinese Acupuncture, Fundamentals of Chinese Medicine, Jin Gu Y o L Practical Dictionary of Chinese Medicine, Sheng H n L n. It is difficult to emphasize enough how digital information revolutionizes the learning process. Digital searches are far more efficient than look-ups from index entries. Instead of poring over isolated text, students can trace concepts throughout the text they are reading and beyond. Instead of making hand-written notes and indelible color marks on a paper copy, e-books give readers the ability to make editable bookmarks and highlights to personalize their information according to their changing needs. This reduces the need for passive memorization by rote and makes learning an active process of constant investigation.

Symptoms
The symptoms section starts with general conditions and then presents localized conditions from head to toe. This arrangement has the advantage of enhancing the traditional four examinations scheme whereby certain symptoms of specific loci may appear in more than one of four places. Thus all urinary symptoms are placed together as are stool symptoms, even though they might normally be divided among the inspection, listening and smelling, and inquiry examinations in diagnostic textbooks. Each symptom is described in such a way as to enable students to easily identify it and differentiate it from others. Indication of the patterns or diseases in which each symptom can appear further offers students avenues for further searches to develop their knowledge.

Patterns
The patterns section lists the patterns included in modern Chinese language diagnostic textbooks. The information provided includes main names, alternate names, key signs, full description, related diseases, pathogenesis, analysis of signs, treatments, combined patterns, and further developments. The content of this section is drawn from Chinese Medicine Theories of Modern Practice.

Diseases
The diseases section includes many conditions that, though scantily discussed in English language textbooks, are commonly seen in Chinese language basic theory texts. All 130 commonly presented diseases are included.

Acupoints
The acupoints section includes all 365 channel points as well as

selection of commonly used non channel points The information provided for each acupoint includes location as given in modern textbooks classical location as given in premodern literature local anatomy actions indications stimulus applied and point categories Medicinals The medicinals section includes a broader range of agents than Western students are normally required to master Items are arranged according to their actions as in textbooks The information provided for each item includes Chinese alternate names properties nature and flavor actions and indications dosage and method of administration product quality and production area Note that the same information can be found in Comprehensive Chinese Materia Medica Paradigm Publications 2022 which contains over 6 000 medicinals in alphabetical order Formulas The formulas section is arranged according to actions as in textbooks The information for each item includes ingredients method of preparation actions indications formula rationale explaining what each ingredient does and variations Since individual ingredients can be found in the medicinals section and the indications can be found in the symptoms patterns and diseases sections students have a vast amount of information at their fingertips in one e book Foundations of Theory for Ancient Chinese Medicine Guohui Liu,2015-06-21 Discussion of Cold Damage Shang Han Lun and contemporary texts of ancient China form the bedrock of modern Chinese medicine practice yet these classic texts contain many concepts that are either hard to understand or confusing Based on over thirty years medical practice and study of the texts this book explains the concepts involved so that the clinical applications of the ancient texts can be better understood and put into practice The author looks at the larger context of ancient Chinese culture and philosophy in terms of theoretical knowledge scholarly approach and mindset in order to explain the basis for the medical texts He also discusses the work of later Chinese medical scholars in elucidating the texts He then goes on to look at more specific issues such as the six conformations zang fu organ theory the theory of qi and blood the theory of qi transformation and how these are understood in the ancient texts He also discusses shao yang and tai yang theory the element of time and its place in understanding six conformations diseases This remarkable work of scholarship will clarify many questions about the interpretation of the ancient texts for modern use and will find a place on the bookshelf of every practitioner of Chinese medicine as well as on those of scholars of Chinese medicine

Transforming Emotions with Chinese Medicine Yanhua Zhang,2012-02-01 Chinese medicine approaches emotions and emotional disorders differently than the Western biomedical model Transforming Emotions with Chinese Medicine offers an ethnographic account of emotion related disorders as they are conceived talked about experienced and treated in clinics of Chinese medicine in contemporary China While Chinese medicine zhongyi has been predominantly categorized as herbal therapy that treats physical disorders it is also well known that Chinese patients routinely go to zhongyi clinics for treatment of illness that might be diagnosed as psychological or emotional in the West Through participant observation interviews case studies and zhongyi publications both classic and modern the author explores the Chinese notion of body person unravels cultural constructions of emotion and examines the way Chinese medicine manipulates body mind connections **The**
