Shanghai Revolution And Development In An Asian Metropolis:

Shanghai Christopher Howe, 1981-05-07 This book is a comprehensive study of the way in which old Shanghai was transformed and developed by the Communist Party between 1949 and the later 1970s China's Urban Future and the Quest for Stability Rebecca Clothey, Richardson Dilworth, 2020-04-16 In recent decades China has used urbanization as an economic development tool to reconstruct the country's traditional institutions, culture, and society. The downside of these many changes is that they have presented the country's government with a massive challenge: how can it maintain basic stability? China's Urban Future and the Quest for Stability examines the complexities of Chinese cities. Together, the essays in this book explore how the relatively recent onset of urbanization has altered the country and how that experience is similar to and distinct from developments in other times and places. Each chapter analyzes one facet of China's transformation, focusing on three main themes: urbanization and the rapid growth of Chinese cities; mobility in both the abstract and the literal sense; and marginalization evidenced by growing residential segregation in cities and diminishing access to education, health care, and jobs. Underlying these themes is the issue of governance: the systems by which a state attempts to maintain control and achieve its ends, often in ways that differ significantly from what one might expect. An up-to-date, concise, and multidisciplinary collection. China's Urban Future and the Quest for Stability discusses the social, economic, and political forces at work in the urbanization of a modern superpower. **Cultures of Uneven and Combined Development**

, 2019-07-08 Cultures of Uneven and Combined Development seeks to explore and develop Leon Trotsky's concept of uneven and combined development. In particular, it aims to adapt the political and historical analysis which originated in Trotsky's Russia for use within the contemporary field of world literature. As such, it draws together the work of scholars from both the field of international relations and the field of literature and the arts. This collection will therefore be of particular interest to anyone who is interested in new ways of understanding world literary texts or interested in new ways of applying Trotsky's revolutionary politics to the contemporary world order. Contributors: Alexander Anievas, Gail Day, James Christie, Kamran Matin, Kerem Nisancioglu, Luke Cooper, Michael Niblett, Neil Davidson, Nesrin Degirmencioglu, Robert Spencer, Steve Edwards.

China and the Global Economy Since 1840 L. Aiguo, 2016-04-30 This is a study of the long-run evolution of the relationship between China and the world economy. The book presents an original interpretation of the country's socio-economic processes in the past 150 years, focusing on China's interaction with the expanding capitalist world economy. The author argues that the general thrust of China's quest for development or modernization has been to catch up with the wealthy nations of the West and goes on to explain the changing paths and outcomes. The book proceeds chronologically from China's mid-nineteenth-century incorporation to the world economy, starting from a semi-colonial state to the Maoist state, led industrialization after 1949, and to the post-Mao liberalization and reintegration. By carefully examining the patterns of development in these three major periods of the nation's history, it addresses fundamental issues pertaining to the making of

Esherick,2001-10-31 In China today skyscrapers tower over ancient temples freeways deliver lines of cars and tour buses to imperial palaces cinema houses compete with old theaters featuring Peking Opera The disparity evidenced in the contemporary Chinese cityscape can be traced to the early decades of the twentieth century when government elites sought to transform cities into a new world that would be at once modern and distinctly Chinese Remaking the Chinese City aims to capture the full diversity of recent Chinese urbanism by examining the modernist transformations of China s cities in the first half of the twentieth century Collecting in one place some of the most interesting and exciting new work on Chinese urban history this volume presents thirteen essays discussing ten Chinese cities the commercial and industrial center of Shanghai the old capital Beijing the southern coastal city of Canton the interior s Chengdu the tourist city of Hangzhou the utopian New Capital built in Manchuria during the Japanese occupation the treaty port of Tianjin the Nationalists capital in Nanjing and temporary wartime capitals of Wuhan and Chongqing Unlike past treatments of early twentieth century China which characterize the period as one of failure and decay the contributors

Britain in China Robert Bickers, 2017-03-01 This is a study of Britain's presence in China both at its peak and during its inter war dissolution in the face of assertive Chinese nationalism and declining British diplomatic support Using archival materials from China and records in Britain and the United States the author paints a portrait of the traders missionaries businessmen diplomats and settlers who constituted Britain in China challenging our understanding of British imperialism there Bickers argues that the British presence in China was dominated by urban settlers whose primary allegiance lay not with any grand imperial design but with their own communities and precarious livelihoods This brought them into conflict not only with the Chinese population but with the British imperial government The book also analyzes the formation and maintenance of settler identities and then investigates how the British state and its allies brought an end to the reign of freelance settler imperialism on the China coast At the same time other British sectors missionary and business renegotiated their own relationship with their Chinese markets and the Chinese state and distanced themselves from the settler British

In the Images of Development Tridib Banerjee, 2021-06-08 The urban legacy of the Global South since the colonial era and how sustainable development and environmental and social justice can be achieved Remarkably little of the expansive literature on development and globalization considers actual urban form and the physical design of cities as outcomes of these phenomena The development that has shaped historic transformations in urban form and urbanism and the consequent human experiences remains largely unexplored In this book Tridib Banerjee fills this void by linking the idea of development with those of urbanism urban form and urban design focusing primarily on the contemporary cities in the developing world

the Global South and their intrinsic prospects in city design Further he examines the endogenous possibilities for the future design of these cities that may address growing inequality and the environmental crisis Banerjee deftly traces the urban legacy of the Global South from the beginning of the colonial era closely examining the economic political and ideological forces that influenced colonial and postcolonial development drawing from relevant experiences of different cities in the developing world and discussing the arguments for the historic parity of these cities with their Western counterparts Finally Banerjee considers essential notions of future city design that are grounded in the critical challenges of sustainable development equity environmental and social justice and diversity and how such outcomes can be achieved This book serves as the opening of a long overdue conversation among design development and planning scholars and practitioners and those interested in the urban development of the Global South

Unstately Power: Local causes of China's economic reforms Lynn T. White, 1998 China's dramatic reforms are usually said to have been caused by the policies of state leaders under Deng Xiaoping This fascinating new study by one of the West's leading authorities on contemporary China shows however that reforms began and are maintained by local networks They emerged first in the economy partly as unintended results of previous policies Agricultural extension in Mao Zedong's time freed so much labor from the land in rich areas such as the Shanghai delta that peasant leaders set up rural industries to employ clients Many of these leaders were avowed state cadres but they acted for local constituencies more than for Beijing Their initiatives can be documented in the early 1970s long before the 1978 proclamation of new enterprises which the central bureaucracy could not monitor taking materials and markets away from state industries This caused socialist control of input prices and commodity flows to collapse by the mid 1980s As a result shortages and inflation bedeviled the economy the state ran deficits management decentralized local banks proliferated and immigration to cities soared

Lin,Mark Wang,Andrew Marton, Jiaping Wu,2007-10-18 China's urban growth is unparalleled in the history of global urbanization and will undoubtedly create huge challenges to China as it modernizes its society Adopting an interdisciplinary approach this book presents an overview of the radical transformation of China's urban space since the 1970s arguing that to study the Chinese urbanization process one must recognize the distinctive political economy of China After a long period as a planned socialist economy China's rapid entry into the global economy has raised suggestions that modernization in China will inevitably result in urban patterns and features like those of cities in developed market economies This book argues that this is unlikely in the short term because processes of urban transition in China must be interpreted through the lens of a unique and unprecedented juxtaposition of socialism and the market economy which is leading to distinctive patterns of Chinese urbanization Richly illustrated with maps diagrams and in depth case studies this book will be an invaluable resource to students and scholars of urban economics and policy geography and the development of China **Reliving the Past** Olivier Zunz,Charles Tilly,David William Cohen,William B. Taylor,William T. Rowe,2014-02-01 Five historians uncover the ties between people's daily routines and the all encompassing framework of their lives They trace the processes of social construction in Western Europe the United States Latin America Africa and China discussing both the historical similarities and the ways in which individual history has shaped each area's development They stress the need for a social history that connects individuals to major ideological political and economic transformations *Economic Development in Provincial China* Eduard B. Vermeer,1988-10-27 This book is a detailed study of the economic developments on the Central Shaanxi province *Urban Politics and Cultural Capital* Ma Haili,2016-02-11 This book tells the story of how a regional Chinese theatrical form Shanghai Yue Opera evolved from the all male beggar's song of the early twentieth century to become the largest all female opera form in the nation only to face increasing pressure to survive under Chinese political and economic

reforms in the new millennium Previous publications have focused mainly on the historical development of Chinese theatre with emphasis placed on Beijing opera This is the first book to take an interdisciplinary approach to the story of the Shanghai Yue Opera bringing history arts management central and regional government policy urbanisation gender media and theatre artistic development in one Through the story of the Shanghai Yue Opera House market reform this book facilitates an understanding of the complex Chinese political economic situation in post socialist China This book suggests that as state art institutions are key organs of the Communist party gaining legitimacy the vigorous evolution and struggle of the Shanghai Yue Opera house in fact directly mirrors the Communist Party internal turmoil in the new millennium to gain its own legitimacy and survival
