Shards of Memory Ruth Prawer Jhabvala,1995 The saga of an Indian family transplanted to Europe and America It begins with the great grandfather a merchant who emigrated to New York and spent his life writing nostalgic poetry on India A tale of East and West the nuances of social conventions and the immigrant s sense of detached belonging **Gender and Memory** Luisa Passerini,2017-07-12 Gender and Memory brings together contributions from around the world and from a range of disciplines history and sociology socio linguistics and family therapy literature to create a volume that confronts all those concerned with autobiographical testimony and narrative both spoken and written The fundamental theme is the shaping of memory by gender This paperback edition includes a new introduction by Selma Leydesdorff coeditor of the Memory and Narrative series of which this volume is a part Are the different ways in which men and women are recalled in public and private memory and the differences in men s and women s own memories of similar experiences simply reflections of unequal lives in gendered societies or are they more deeply rooted The sharply differentiated life experiences of men and women in most human societies the widespread tendencies for men to dominate in the public sphere and for women s lives to focus on family and household suggest that these experiences may be reflected in different qualities of memory The contributors maintain that memories are gendered and that the gendering of memory makes a strong impact on the shaping of social spaces and expressive forms as the horizons of memory move from one generation to the next They argue that in order to understand how memory becomes gendered we need to travel through the realms of gendered experience and gendered language *Inverse Thoughts* Spencer,2011-06-24 There is no available information at this time **The Memory Act** Chinedu Nnadi,2025-08-28 After a wave of mass shootings shatters the nation the U S government promises salvation through control The Memory Act hailed as the dawn of a safer future forces every citizen to undergo memory scans and neural implants designed to suppress violent impulses Crime plummets Politicians boast of peace Corporations thrive on the new technology But safety comes at a price The scans do more than monitor they predict Anyone flagged as pre violent is detained reprogrammed or erased Thought itself has become a crime For Clara Hensley a quiet small town librarian the nightmare begins during a routine scan Labeled Category Red she is accused of harboring violent potential based on fleeting memories she can barely recall Overnight Clara s ordinary life collapses Federal agents give her a choice disappear into rehabilitation or surrender her mind to permanent rewiring Instead Clara runs In a nation where every corner is surveilled and every secret thought can be exposed she becomes a fugitive But as she slips into the shadows she discovers she is not alone An underground network of dissidents writers whistleblowers and falsely accused rebels believes the Memory Act is not protection but tyranny Together they fight to reclaim what has been stolen the right to think freely Hunted by agents betrayed by neighbors and haunted by the question of whether her darkest impulses are real Clara must decide stay hidden and survive or risk everything to ignite resistance Because in a world where every memory is monitored freedom itself is the

most dangerous crime   *Excavating the Memory Palace* Seth Long,2021-01-04 With the prevalence of smartphones massive data storage and search engines we might think of today as the height of the information age In reality every era has faced its own challenges of storing organizing and accessing information While they lacked digital devices our ancestors when faced with information overload utilized some of the same techniques that underlie our modern interfaces they visualized and spatialized data tying it to the emotional and sensory spaces of memory thereby turning their minds into a visual interface for accessing information In Excavating the Memory Palace Seth David Long mines the history of Europe s arts of memory to find the origins of today s data visualizations unearthing how ancient constructions of cognitive pathways paved the way for modern technological interfaces Looking to techniques like the memory palace he finds the ways that information has been tied to sensory and visual experience turning raw data into lucid knowledge From the icons of smart phone screens to massive network graphs Long shows us the ancestry of the cyberscape and unveils the history of memory as a creative act
