Love Robert C. Solomon, 2010-12-08 Love our hearts yearn for it we fall into it or out of it we'll do almost anything to attain and keep it Those who have experienced the power of love whirl from its embrace It is delicious anguish gut wrenching pain and intoxicating allure Nations go to war over it crimes are committed to satisfy its demands lives are often ruined because of it and extraordinary feats of courage and sacrifice are performed in its name But beyond the clichés and greeting card platitudes do we really understand what love is and how it alters the way we think feel and behave Should love be viewed as little more than a lusty romp or is there more to it What is the relationship between love and romance caring concern compassion thoughtfulness sex and the many other components that our society jumbles together in this potent potpourri whose power can give strength to the weakest among us or turn powerhouses of strength into emotional mush It is precisely because love is such an important part of our lives that we owe it to ourselves to reach beyond overwhelming passion and the roadblocks of illusion to achieve real understanding of this extraordinary human phenomenon It won't always be easy in fact it's sometimes quite painful But the rewards are many for those who will risk exploring their own cherished attitudes about a subject that has held us in its grip for centuries and shows no signs of letting go Some of the topics covered are What I Feel in My Heart On the Alleged Origins of Romantic Love What Do I Want When I Want You Why Do I Love You The Importance of Being Honest Love Sex and Intimacy Beyond Sex and Gender What's So Good About Love

Tradition and the Poetics of Self in Nineteenth-Century Women's Poetry, 2021-11-01 Tradition and how far writers fit into or diverge from the demands of tradition is one of the most debated issues in literary discussion Gender however is not often part of discussions which depend on such questions at the decisiveness of the Modernist break with the Victorian period or whether Postmodernism makes tradition meaningless By contrast the very existence of a specifically female tradition is still an urgent subject of debate and it is clear that many nineteenth century women writers were troubled in their search for literary foremothers This autobiographical impetus can be located in the work of each of the poets discussed in Tradition and the Poetics of Self Nineteenth Century Women's Poetry Elizabeth Barrett Browning Caroline Bowles Southey Emily Dickinson and Christina Rossetti An exploration of the self either in the abstract or in a more closely personal sense appears in a concern with the craft of poetry and the role of the poet in a teasing out of language as a marker of a personal encounter with the world in an adventurous play with genre and a rewriting of myth and in a bold confrontation with received notions of a woman's place Adventurousness marks the work of each of these poets and is a central focus of these essays

Research in Psychology Joan C. Chrisler, Donald R. McCreary, 2010-03-12 Donald R McCreary and Joan C Chrisler The Development of Gender Studies in Psychology Studies of sex differences are as old as the field of psychology and they have been conducted in every sub field of the discipline There are probably many reasons for the popularity of these studies but three reasons seem to be most prominent First social psychological studies of person perception show that sex is especially salient in social groups It is the first thing people notice about others and it is one of the things we remember best Fiske Haslam Stangor Lynch Duan Glass 1992 For example people may not remember who uttered a witty remark but they are likely to remember whether the quip came from a woman or a man Second many people hold firm beliefs that aspects of physiology suit men and women for particular social roles Men's greater upper body strength makes them better candidates for manual labor and their greater height gives the impression that they would make good leaders i.e. people we look up to Women's reproductive capacity and the caretaking tasks e.g. breastfeeding baby minding that accompany it make them seem suitable for other roles that require gentleness and nurturance Third the logic that underlies hypothesis testing in the sciences is focused on difference Researchers design their studies with the hope that they can reject the null hypothesis that experimental groups do not differ
