

The fate of this young girl, recorded during a hunting trip from Trieste, present day Italy, in 1908, is not recorded. The Adriatic Sea holds the record for being the site of the world's most northerly recorded unprovoked attacks on humans.

enough to be touched and dived desperately at John Wishart. Next instant there was a terrific crash as he took Wishart on the way down. The whole thing happened in a second. I imagined the brute hatched me with its tail, but it was the force of water as it swarmed that hit me in the stomach. He thought the shark was a whale or tiger three to four metres (10-12 ft) long. Hopper swam rapidly for the shore.

This is Warland's account:

'Suddenly there was a splash and I could see the shark's jaws come out of the water. Then it seemed to splash down on top of Wishart. It was about four yards (12 ft) away. There was swell in the water, then nothing. Hopper and myself first thought we could help, and tried to see Wishart. Then we

realised it was useless and swam rapidly for the shore.'

Here are two basically consistent accounts by eyewitnesses very close to the tragedy. Mrs. G. Bell, however, was watching from a small bluff behind the beach where Wishart's mother and sister were sitting. Mrs Bell saw 'one of the men catch a big wave and ride it to the shore. But the poor sixth man missed it by about two feet (0.6 m). He appeared to be waiting for the next breaker when he suddenly threw up his arms and disappeared. Then he began to thrash his arms in and out of the water. We then realised that he was being attacked by a shark. We saw a large dorsal fin break the water and a pool of blood spread over the surface. ... The man in the water must have been

one of the bravest men that ever lived, the way he fought off the shark for four minutes.'

None of the accounts sound like verbatim tape transcripts, and it is possible some of the inconsistency arose from reporters condensing the eyewitnesses' interviews. Even so, how did Mrs Bell see a four-minute struggle by a lone surfer, when two surfers saw one man plucked from a line of surfers by a single attack?

Three days after the attack, a 227-kg (500-lb) shark swallowed a bullock's liver bait on a line from a floating oil drum. Fishermen in a 5.5-m (18-ft) skiff killed it with a twelve-bore shotgun and five bullets from a .22 rifle. Taken ashore at nearby Sorrento Beach, it was raised and disembowelled as a crowd of 1200 watched. The

Think you're safe in the Med? Read about the Great Whites that thrive near holiday beaches. Think you're safe in large groups? Read about the sinking of the USS Indianapolis in 1945 when hundreds of sailors floated for days in shark-infested waters, being picked off one by one. Think you're safe at home? Read about the 69-year-old man taking his regular evening swim, jumping off his backyard dock straight into the mouth of a bull shark. Many more extraordinary and gruesome accounts, including the shark boat skipper who slit open the belly of a 360 kg tiger shark only to have a human head, pelvis, and arm come tumbling out, provide horrific and moving tales of shark encounters. The courage of survivors and those who have risked their lives to save shark attack victims is truly inspirational. Where can you find sharks? Features on different shark species with illustrations, fact boxes, and maps show where they lurk around the world. Also included are a selection of full-colour photographs and special sections on the life cycle of a shark, how to avoid a shark attack, and how to survive one. *The Real Jaws* Rachel Lee Perez, 2025-08-30 Explores the 1916 New Jersey shark attacks, their impact on shark fear, and how media shaped harmful misconceptions. In the Summer of 1916, a series of shark attacks along the New Jersey shore would send shockwaves across its otherwise peaceful beach towns. Spanning a terrifying two weeks, including the deaths of nearly five people, these attacks would officially cement an innate fear of sharks that humans have felt since the beginning of time. Although initially kept under wraps by the tourism industry, these attacks would ultimately plaster the front pages of newspapers across the United States and even overseas. As the news spread, the line between fact and fiction blurred, reshaping our cultural and scientific understanding of the beasts of the ocean. It was the 1916 shark attacks that would establish our modern-day misconstrued perception of sharks as evil, man-eating monsters and would later inspire the film *Jaws*, which would perpetuate the same harmful narrative. *The Real Jaws* takes an in-depth look at each one of the attacks and how they instilled a centuries-long fear of the ocean's apex predator. It explores the various theories explaining why these attacks may have occurred and the probability of something like this happening again. And finally, it analyses the way the harmful misconceptions derived from films like *Jaws* have redefined humanity's relationship with sharks, leading humans to become the predators and sharks to become the prey. **Twelve Days of Terror** Richard G. Fernicola, 2016-05-02 Upon the 100th anniversary of the most terrifying stretch of shark attacks in American history, a wave said to have been the inspiration for *Jaws* comes: a reissue of the classic Lyons Press account and investigation. In July 1916, a time when World War I loomed over America and New York City was in the midst of a deadly polio epidemic, the tri-state area sought relief at the Jersey shore. The Atlantic's refreshing waters proved to be utterly inhospitable, however. In just twelve days, four swimmers were violently and fatally mauled in separate shark attacks, and a fifth swimmer escaped an attack within inches of his life. In this thoroughly researched account, Dr. Richard Fernicola, the leading expert on the attacks, presents a riveting portrait, investigation, and scientific analysis of the terrifying days against the colorful backdrop of America in 1916. *Twelve Days of Terror* *Kids Review Kids' Books* Scholastic Professional Books, Scholastic, Inc.
