little known history of the spirometer to reveal the social and scientific processes by which medical instruments have worked to naturalize racial and ethnic differences from Victorian Britain to today Routinely a factor in clinical diagnoses preemployment physicals and disability estimates spirometers are often race corrected typically reducing normal values for African Americans by 15 percent An unsettling account of the pernicious effects of racial thinking that divides people along genetic lines Breathing Race into the Machine helps us understand how race enters into science and shapes medical research and practice Honorable Mention 2017 Rachel Carson Prize Society for the Social Studies of Science Winner of the 2018 Ludwik Fleck Prize from the Society for Social Studies of Science
