Machine Intelligence 13 K. Furukawa,D. Michie,S. Muggleton,1994-08-25 BL Leaders in the discipline discuss the latest developments in a fast moving field This book is the latest volume in a successful series the result of a fruitful collaboration between the Turing Institute and the Japan Society for Artificial Intelligence This volume stems from a workshop held in 1992 which not only witnessed the series enter its second quarter century but also a new phase in its development The pages of this book show that machine learning has emerged to declare itself as a seed bed of new theory as a practical took in engineering disciplines and as a material for new mental models in human sciences *Structure-Based Drug Design* P.W. Codding,2013-04-17 Structure Based Drug Design brings together scientists working on different aspects of the subject demonstrating the necessary collaboration and interdisciplinary approach to this complex area The focus is on X ray crystallographic and computational approaches The general aspects of these approaches are introduced in the first six articles The remaining articles provide examples of the application of X ray crystallography molecular modelling molecular dynamics QSAR database analysis and homology modelling The papers cover a wealth of interesting problems in the design of new and enhanced pharmaceuticals **PRICAI 2000 Topics in Artificial Intelligence** Riichiro Mizoguchi,John Slaney,2007-12-07 PRICAI 2000 held in Melbourne Australia is the sixth Pacific Rim Interna tional Conference on Artificial Intelligence and is the successor to the five earlier PRICAIs held in Nagoya Japan Seoul Korea Beijing China Cairns Aus tralia and Singapore in the years 1990 1992 1994 1996 and 1998 respectively PRICAI is the leading conference in the Pacific Rim region for the presenta tion of research in Artificial Intelligence including its applications to problems of social and economic importance The objectives of PRICAI are To provide a forum for the introduction and discussion of new research results concepts and technologies To provide practising engineers with exposure to and an evaluation of evolving research tools and practices To provide the research community with exposure to the problems of practical applications of AI and To encourage the exchange of AI technologies and experience within the Pacific Rim countries PRICAI 2000 is a memorial event in the sense that it is the last one in the 20 century It reflects what researchers in this region believe to be promising for their future AI research activities In fact some salient features can be seen in the papers accepted We have 12 papers on agents while PRICAI 96 and 98 had no more than two or three This suggests to us one of the directions in which AI research is going in the next century It is true that agent research provides us with a wide range of research subjects from basic ones to applications **Machine Intelligence 15** Koichi Furukawa,Kōichi Furukawa,Donald Michie,Stephen Muggleton,1999 Following on from previous volumes in the series Machine Intelligence 15 provides an overview of current areas of interest in artificial intelligence *Grammatical Inference and Applications* Rafael C. Carrasco,Jose Oncina,1994-09-07 This volume presents the proceedings of the Second International Colloquium on Grammatical Inference ICGI 94 held in Alicante Spain in September 1994 Besides 25 research papers carefully selected and refereed by the program committee the book contains a

survey by E Vidal The book is devoted to all those aspects of automatic learning that explicitly focus on principles theory and applications of grammars and languages The papers are organized in sections on formal aspects language modelling and linguistic applications stochastic approaches applications and performance analysis and neural networks genetic algorithms and artificial intelligence techniques *Issues & Trends of Information Technology Management in Contemporary Organizations* Information Resources Management Association. International Conference,2002-01-01 As the field of information technology continues to grow and expand it impacts more and more organizations worldwide The leaders within these organizations are challenged on a continuous basis to develop and implement programs that successfully apply information technology applications This is a collection of unique perspectives on the issues surrounding IT in organizations and the ways in which these issues are addressed This valuable book is a compilation of the latest research in the area of IT utilization and management **Foundations of Rule Learning** Johannes Fürnkranz,Dragan Gamberger,Nada Lavrač,2012-11-06 Rules the clearest most explored and best understood form of knowledge representation are particularly important for data mining as they offer the best tradeoff between human and machine understandability This book presents the fundamentals of rule learning as investigated in classical machine learning and modern data mining It introduces a feature based view as a unifying framework for propositional and relational rule learning thus bridging the gap between attribute value learning and inductive logic programming and providing complete coverage of most important elements of rule learning The book can be used as a textbook for teaching machine learning as well as a comprehensive reference to research in the field of inductive rule learning As such it targets students researchers and developers of rule learning algorithms presenting the fundamental rule learning concepts in sufficient breadth and depth to enable the reader to understand develop and apply rule learning techniques to real world data **Symbolic and Quantitative Approaches to Reasoning and Uncertainty** Anthony Hunter,Simon D. Parsons,2003-05-15 This book constitutes the refereed proceedings of the 1999 European Conference on Symbolic and Quantitative Approaches to Reasoning under Uncertainty ECSQARU 99 held in London UK in July 1999 The 35 revised full papers presented were carefully reviewed and selected for inclusion in the book by the program committee The volume covers theoretical as well as application oriented aspects of various formalisms for reasoning under uncertainty Among the issues addressed are default reasoning nonmonotonic reasoning fuzzy logic Bayesian theory probabilistic reasoning inductive learning rough knowledge discovery Dempster Shafer theory qualitative decision making belief functions and evidence theory **Research and Development in Intelligent Systems XVI** Ann Macintosh,Frans Coenen,2012-12-06 This volume contains the refereed technical papers presented at ES99 the Nineteenth SGES International Conference on Knowledge Based Systems and Applied Artificial Intelligence held in Cambridge in December 1999 The papers in this volume present new and innovative developments in the field divided into sections on knowledge engineering knowledge discovery case based reasoning learning and knowledge representation and refinement
