The Mediterranean Zeitgeist Metin Mustafa, 2021-09-16 The accomplishments of the civilisation of early modern Europe is inconceivable without the achievements of medieval Islam and the Ottoman Empire It is most pertinent that historians explore the notion of cultural enlightenment in the early modern period from an inclusive paradigm one that unites rather than erect barriers across civilisations Exploring the notion of the Mediterranean zeitgeist from a culturally inclusive perspective widens our scope of understanding of the meaningful practices that is specific to a particular historical time period These meaningful practices including architectural accomplishments hybrid objects of cultural materialism and the iconography of public ceremonials by the ruling elite most often include recurring symbolic structures that underpin the idea of the Mediterranean zeitgeist These recurring symbolisms in early modern Europe and the Ottoman Empire respectively underscore the human cultural and intellectual phenomena that ultimately associate with cultural identity and affirmation of court ceremonial grandeur It can be argued that the idea of Mediterranean zeitgeist instead of concentrating and elaborating upon the differences between cultural accomplishments rather celebrate each age or epoch through the central thesis of historicism It is therefore the aim of the essays in this book to provide a discussion that firstly redefines what we mean by the term Renaissance in Essay I and then reconsider the patterns of cultural practices in Italy and the Ottoman Empire in the sixteenth century from a revisionist paradigm in Essays II and III respectively By re Orienting the Renaissance the history of the Mediterranean zeitgeist in the sixteenth century commemorates the shared cultural accomplishments that epitomised the spirit of the age

half-tones *The Problem of Slavery as History* Joseph C. Miller, 2012-03-27 Why did slavery an accepted evil for thousands of years suddenly become regarded during the eighteenth century as an abomination so compelling that Western governments took up the cause of abolition in ways that transformed the modern world Joseph C Miller turns this classic question on its head by rethinking the very nature of slavery arguing that it must be viewed generally as a process rather than as an institution Tracing the global history of slaving over thousands of years Miller reveals the shortcomings of Western narratives that define slavery by the same structures and power relations regardless of places and times concluding instead that slaving is a process which can be understood fully only as imbedded in changing circumstances **The Road Through Spain** Dorothy Giles, 1929 **Affluence and Freedom** Pierre Charbonnier, 2021-06-22 In this pathbreaking book Pierre Charbonnier opens up a new intellectual terrain an environmental history of political ideas His aim is not to locate the seeds of ecological thought in the history of political ideas as others have done but rather to show that all political ideas whether or not they endorse ecological ideals are informed by a certain conception of our relationship to the Earth and to our environment The fundamental political categories of modernity were founded on the idea that we could improve on nature that we could exert a decisive victory over its excesses and claim unlimited access to earthly resources In this way modern thinkers imagined a political society of free individuals equal and prosperous alongside the development of industry geared towards progress and liberated from the Earth's shackles Yet this pact between democracy and growth has now been called into question by climate change and the environmental crisis It is therefore our duty today to rethink political emancipation bearing in mind that this can no longer draw on the prospect of infinite growth promised by industrial capitalism Ecology must draw on the power harnessed by nineteenth century socialism to respond to the massive impact of industrialization but it must also rethink the imperative to offer protection to society by taking account of the solidarity of social groups and their conditions in a world transformed by climate change This timely and original work of social and political theory will be of interest to a wide readership in politics sociology environmental studies and the social sciences and humanities generally
