Medizin Ohne Menschlichkeit:

The Origins of Nazi Genocide Henry Friedlander, 2000-11-09 Tracing the rise of racist and eugenic ideologies Henry Friedlander explores in chilling detail how the Nazi program of secretly exterminating the handicapped and disabled evolved into the systematic destruction of Jews and Gypsies He describes how the so called euthanasia of the handicapped provided a practical model for the later mass murder thereby initiating the Holocaust The Nazi regime pursued the extermination of Jews Gypsies and the handicapped based on a belief in the biological and thus absolute inferiority of those groups To document the connection between the assault on the handicapped and the Final Solution Friedlander shows how the legal restrictions and exclusionary policies of the 1930s including mass sterilization led to mass murder during the war He also makes clear that the killing centers where the handicapped were gassed and cremated served as the models for the extermination camps Based on extensive archival research the book also analyzes the involvement of the German bureaucracy and judiciary the participation of physicians and scientists and the nature of popular opposition

How Was It Possible? Peter Hayes, 2015 As the Holocaust passes out of living memory future generations will no longer come face to face with Holocaust survivors But the lessons of that terrible period in history are too important to let slip past How Was It Possible edited and introduced by Peter Hayes provides teachers and students with a comprehensive resource about the Nazi persecution of Jews Deliberately resisting the reflexive urge to dismiss the topic as too horrible to be understood intellectually or emotionally the anthology sets out to provide answers to questions that may otherwise defy comprehension This anthology is organized around key issues of the Holocaust from the historical context for antisemitism to the impediments to escaping Nazi Germany and from the logistics of the death camps and the carrying out of genocide to the subsequent struggles of the displaced survivors in the aftermath Prepared in cooperation with the Jewish Foundation for the Righteous this anthology includes contributions from such luminaries as Jean Anel Saul Friedlander Tony Judt Alan Kraut Primo Levi Robert Proctor Richard Rhodes Timothy Snyder and Susan Zuccotti Taken together the selections make the ineffable fathomable and demystify the barbarism underlying the tragedy inviting readers to learn precisely how the Holocaust was in fact possible

Die Medizinische Fakultät der Universität Bonn im "Dritten Reich" Ralf Forsbach, 2006

Noch vor wenigen Jahren war die Beschäftigung mit der nationalsozialistischen Geschichte der Medizinischen Fakultäten ein absolutes Tabu Nun zeichnet erstmals ein Autor die Entwicklung einer Medizinischen Fakultät monographisch nach Am Bonner Beispiel stellt Ralf Forsbach die höchst unterschiedlichen Akteure in den Instituten und Kliniken vor Zugleich stehen die internen Strukturen im Blickfeld vor allem aber Möglichkeiten und Grenzen des Agierens in dem komplexen

Wissenschaftsgefüge des Dritten Reichs Forsbachs akribische Studie macht deutlich dass sämtliche Mediziner der Universitätskliniken und institute durch ihre Arbeit das nationalsozialistische Gesundheitssystem stützten Selbst oppositionelle Klinik und Institutsdirektoren glaubten sich an nationalsozialistischen Medizinverbrechen wie der Zwangssterilisierung oder dem hemmungslosen Umgang mit den Leichen Hingerichteter beteiligen zu müssen Die Problematik um die nicht immer klaren Grenzen zwischen Opposition Widerstand Anpassung Mitlaufertum und explizitem Bekenntnis zur NS Medizin erhellt zu haben gehört zu den Verdiensten des Buchs das weit über die Qualität einer Lokalstudie hinausreicht

Parkinson, 2015-08-28 This literary historical study seeks to dismantle the prevailing notion that Germany in the period following the Second World War exhibited an inability to mourn arguing that in fact this period experienced a

surge of affect Anna Parkinson examines the emotions explicitly manifested or addressed in a variety of German cultural artifacts while also identifying previously unacknowledged and undertheorized affective structures implicitly at work during the country's national crisis Much of the scholarship in the expanding field of affect theory distrusts Freudian psychoanalysis which does not differentiate between emotion and affect One of the book's major contributions is that it offers an analytical distinction between emotion and affect finding a compelling way to talk about affect and emotion that is informed by affect theory but that integrates psychoanalysis The study draws on the psychoanalytic writings of Freud Margarete and Alexander Mitscherlich and Andr  Green while engaging with interdisciplinary theorists of affect including Barbara Rosenwein Lauren Berlant Ann Cvetkovich and Eve Kosofsky Sedgwick among many others

Victims and Survivors of Nazi Human Experiments Paul Weindling, 2014-12-18 While the coerced human experiments are notorious among all the atrocities under National Socialism they have been marginalised by mainstream historians This book seeks to remedy the marginalisation and to place the experiments in the context of the broad history of National Socialism and the Holocaust Paul Weindling bases this study on the reconstruction of a victim group through individual victims life histories and by weaving the victims experiences collectively together in terms of different groupings especially gender ethnicity and religion age and nationality The timing of the experiments where they occurred how many victims there were and who they were is analysed as are hitherto under researched aspects such as Nazi anatomy and executions The experiments are also linked more broadly to major elements in the dynamic and fluid Nazi

Weindling, 2004-10-29 This book offers a radically new and definitive reappraisal of Allied responses to Nazi human experiments and the origins of informed consent It places the victims and Allied Medical Intelligence officers at centre stage while providing a full reconstruction of policies on war crimes and trials related to Nazi medical atrocities and genocide
