   Projects in Scientific Computation Richard E. Crandall,2000-06-22 This interdisciplinary book provides a compendium of projects plus numerous example programs for readers to study and explore Designed for advanced undergraduates or graduates of science mathematics and engineering who will deal with scientific computation in their future studies and research it also contains new and useful reference materials for researchers The problem sets range from the tutorial to

exploratory and at times to the impossible The projects were collected from research results and computational dilemmas during the authors tenure as Chief Scientist at NeXT Computer and from his lectures at Reed College The content assumes familiarity with such college topics as calculus differential equations and at least elementary programming Each project focuses on computation theory graphics or a combination of these and is designed with an estimated level of difficulty The support code for each takes the form of either C or Mathematica and is included in the appendix and on the bundled diskette The algorithms are clearly laid out within the projects such that the book may be used with other symbolic numerical and algebraic manipulation products **Theory and Practice of Algorithms in (Computer) Systems** Alberto Marchetti-Spaccamela,Michael Segal,2011-03-14 This book constitutes the refereed proceedings of the First International ICST Conference on Theory and Practice of Algorithms in Computer Systems TAPAS 2011 held in Rome Italy in April 2011 The 25 papers presented including three short papers by invited speakers were carefully reviewed and selected from 45 submissions The papers all feature original research in the design implementation and evaluation of algorithms with special focus on algorithms for combinatorial optimization problems and to real world applications engineering and experimental analysis of algorithms thus fostering the cooperation among researchers in computer science networking discrete mathematics mathematical programming and operations research **GRAPH DRAWING.** Franz J.
