What Is Zoopoetics? Kári Driscoll, Eva Hoffmann, 2018-03-21 This book brings together essays dealing with the question of zoopoetics both as an object of study i e texts from various traditions and periods that reflect explicitly or implicitly on the relationship between animality language and representation and as a methodological problem for animal studies and indeed for literary studies more generally What can literary animal studies tell us about literature that conventional literary studies might be blind to How can literary studies resist the tendency to press animals into symbolic service as metaphors and allegories for the human whilst also avoiding a naïve literalism with respect to the literary animal The volume is divided into

three sections Texts which focuses on the linguistic and metaphorical dimensions of zoopoetics Bodies which is primarily concerned with mimesis and questions of embodiment performance and lived experience and Entanglement which focuses on interspecies encounters and the complex interplay between word and world that emerges from them The volume will appeal to scholars and students in the fields of animal studies area studies and comparative literature gender studies environmental humanities ecocriticism and the broader field of posthumanism
