Pigs Go To Market Halloween Fun With Math And Sho:

Mathematics in the K-8 Classroom and Library Sueanne McKinney, KaaVonnia Hinton, 2010-05-11 Two experts on education offer a rich and diverse selection of children's literature and teaching strategies for the K-8 mathematics classroom. Taking advantage of quality motivating literature during mathematics instruction pays off especially when teachers and media specialists work together to convey crucial mathematical concepts and standards. *Mathematics in the K-8 Classroom and Library* shows you how it's done. After an introduction to the National Council of Teachers of Mathematics's NCTM Principles and Process Standards, each remaining chapter is devoted to an NCTM content standard. The book offers engaging research-based strategies and booklists of specific titles that together can be used to increase student achievement. The strategies suggested here provide a hands-on, student-centered focus that allows students to make connections with prior learning, personal experiences, and good books. Both the recommended children's books and the activities will appeal even to reluctant readers and students for whom mathematics might be a challenge. Each chapter includes an extensive annotated list of texts, dozens of hands-on activities, handouts, and writing prompts. [Best STEM Resources for NextGen Scientists](#) Jennifer L. Hopwood, 2015-06-30 Intended to support the national initiative to strengthen learning in areas of science, technology, engineering, and mathematics, this book helps librarians who work with youth in school and public libraries to build better collections and more effectively use these collections through readers advisory and programming. A versatile and multi-faceted guide, *Best STEM Resources for NextGen Scientists: The Essential Selection and User's Guide* serves as a readers advisory and collection development resource for youth services and school librarians seeking to bring STEM-related titles into their collections and introduce teachers and young readers to them. This book not only guides readers to hundreds of the best STEM-related titles (fiction and non-fiction), printed materials as well as apps, DVDs, websites, and games; it also includes related activities or programming ideas to help promote the use of the collection to patrons or students in storytime, afterschool programs, or passive library programs. After a detailed discussion of the importance of STEM and the opportunities librarians have for involvement, the book lists and describes best STEM resources for young learners. Resources are organized according to the reading audiences for which they are intended, from toddlers through teens, and the book includes annotated lists of both fiction and non-fiction STEM titles as well as graphic novels, digital products, and online resources. In addition, the author offers a selection of professional readings for librarians and media specialists who wish to further expand their knowledge. *Teaching Children Mathematics*, 1998 *Pigs Go to Market* Amy Axelrod, 1997-09 Concepts of price and quantity enter the picture when Mrs. Pig wins a five-minute shopping spree at the supermarket on Halloween night. *School Library Media Activities Monthly*, 1998 [The Publishers Weekly](#), 1999 **Canadian Periodical Index**, 1997 **A to Zoo** Carolyn W.
