the dawn of science the ancient Greek philosopher Zeno formulated his paradox of motion and amazingly it is still on the cutting edge of all investigations into the fabric of reality Zeno used logic to argue that motion is impossible and at the heart of his maddening puzzle is the nature of space and time Is space time continuous or broken up like a string of beads Over the past two millennia many of our greatest minds including Aristotle Galileo Newton Einstein Stephen Hawking and other current theoreticians have been gripped by the mystery this puzzle represents Joseph Mazur acclaimed author of *Euclid in the Rainforest* shows how historic breakthroughs in our understanding of motion shed light on Zeno's paradox The orbits of the planets were explained the laws of motion were revealed the theory of relativity was discovered but the basic structure of time and space remained elusive In the tradition of Fermat's Enigma and Zero The Motion Paradox is a lively history of this apparently simple puzzle whose solution if indeed it can be solved will reveal nothing less than the fundamental nature of reality Zeno's Paradox Joseph Mazur,2008-03-25 The fascinating story of an ancient riddle and what it reveals about the nature of time and space Three millennia ago the Greek philosopher Zeno constructed a series of logical paradoxes to prove that motion is impossible Today these paradoxes remain on the cutting edge of our investigations into the fabric of space and time Zeno's Paradox uses the motion paradox as a jumping off point for an exploration of the twenty five hundred year quest to uncover the true nature of the universe From Galileo to Einstein to Stephen Hawking some of the greatest minds in history have tackled the problem and made spectacular breakthroughs but through it all the paradox of motion remains
