Robert S. M. Robinson

Pinchot Encounter Their Origin Is Found:

Pinchot Encounter Robert S. M. Robinson, 2003-04-30 *Pinchot Encounter* is a gripping tale of a young boy's encounter with a lone sasquatch in the state of Washington while on vacation with his parents in the Gifford Pinchot National Forest and how this event alters the course of his life by inspiring him to commit himself to a lifelong quest to achieve permanent scientifically verifiable contact with the sasquatch species. While on this quest as an adult the adventures he experiences and the surprising discoveries he makes with regards to the origin of the sasquatch, their purpose here on earth and their relevancy to the human race makes for interesting and exciting reading. *Pinchot Encounter* gives answers to the questions millions have asked themselves about the sasquatch and is must reading for anyone who is even remotely interested in the sasquatch phenomenon.

Empire Forestry and the Origins of Environmentalism Gregory Allen Barton, 2002-10-17 What we now know of as environmentalism began with the establishment of the first empire forest in 1855 in British India and during the second half of the nineteenth century over ten per cent of the land surface of the earth became protected as a public trust. Sprawling forest reservations, many of them larger than modern nations, became revenue producing forests that protected the whole household of nature and Rudyard Kipling and Theodore Roosevelt were among those who celebrated a new class of government foresters as public heroes. Imperial foresters warned of impending catastrophe, desertification and global climate change if the reverse process of deforestation continued. The empire forestry movement spread through India, Africa, Australia, New Zealand, Canada and then the United States to other parts of the globe and Gregory Barton's study looks at the origins of environmentalism in a global perspective.

The Bloomsbury Handbook of Religion and Nature Laura Hobgood, Whitney A. Bauman, 2018-05-17 Divided into four parts: Earth, Air, Fire and Water, this book takes an elemental approach to the study of religion and ecology. It reflects recent theoretical and methodological developments in this field which seek to understand the ways that ideas and matter, minds and bodies exist together within an immanent frame of reference. *The Bloomsbury Handbook of Religion and Nature* focuses on how these matters materialize in the world around us, thereby addressing key topics in this area of study. The editors provide an extensive introduction to the book as well as useful introductions to each of its parts. The volume's international contributors are drawn from the USA, South Africa, Netherlands, Norway, Indonesia and South Korea and offer a variety of perspectives, voices, cultural settings and geographical locales. This handbook shows that human concern and engagement with material existence is present in all sectors of the global community regardless of religious tradition. It challenges the traditional methodological approach of comparative religion and argues that globalization renders a comparative religious approach to the environment insufficient.

Treason In America Anton Chaitkin, The Oligarchy that usurped power in the USA against America's revolutionary heritage that has now destroyed the economy. What is it? Anton Chaitkin's *Treason in America* is the original authoritative inquiry into this criminal apparatus: the British Empire and its arms in Wall Street, Boston and the South.

The Origins of Modern

Environmental Thought J. Edward de Steiguer, 2006-09-15 The *Origins of Modern Environmental Thought* provides readers with a concise and lively introduction to the seminal thinkers who created the modern environmental movement and inspired activism and policy change Beginning with a brief overview of the works of Thoreau Mill Malthus Leopold and others de Steiguer examines some of the earliest philosophies that underlie the field He then describes major socioeconomic factors in post World War II America that created the milieu in which the modern environmental movement began with the publication of Rachel Carson's *Silent Spring* The following chapters offer summaries and critical reviews of landmark works by scholars who helped shape and define modern environmentalism Among others de Steiguer examines works by Barry Commoner Paul Ehrlich Kenneth Boulding Garrett Hardin Herman Daly and Arne Naess He describes the growth of the environmental movement from 1962 to 1973 and explains a number of factors that led to a decline in environmental interest during the mid 1970s He then reveals changes in environmental awareness in the 1980s and concludes with commentary on the movement through 2004 Updated and revised from *The Age of Environmentalism* this expanded edition includes three new chapters on Stewart Udall Roderick Nash and E F Schumacher as well as a new concluding chapter bibliography and updated material throughout This primer on the history and development of environmental consciousness and the many modern scholars who have shaped the movement will be useful to students in all branches of environmental studies and philosophy as well as biology economics and physics

The Postwar Origins of the Global Environment Perrin Selcer, 2018-09-25 In the wake of the Second World War internationalists identified science as both the cause of and the solution to world crisis Unless civilization learned to control the unprecedented powers science had unleashed global catastrophe was imminent But the internationalists found hope in the idea of world government In *The Postwar Origins of the Global Environment* Perrin Selcer argues that the metaphor of Spaceship Earth the idea of the planet as a single interconnected system exemplifies this moment when a mix of anxiety and hope inspired visions of world community and the proliferation of international institutions Selcer tells the story of how the United Nations built the international knowledge infrastructure that made the global scale environment visible Experts affiliated with UN agencies helped make the global as in global population global climate and global economy an object in need of governance Selcer traces how UN programs such as UNESCO's Arid Lands Project the production of a soil map of the world and plans for a global environmental monitoring system fell short of utopian ambitions to cultivate world citizens but did produce an international community of experts with influential connections to national governments He shows how events and personalities cultures and ecologies bureaucracies and ideologies decolonization and the Cold War interacted to make global knowledge A major contribution to global history environmental history and the history of development this book relocates the origins of planetary environmentalism in the postwar politics of scale

American Lumberman, 1909 *Origins of a Continuing Conflict* Felice M. Goodman, 1967 *Origins of the National Forests* Harold K. Steen, 1992 The national forests lay across America's diverse ecological and political geography

their 191 million acres occupying about 10 percent of the nation's land base. On the occasion of the centennial of the National Forest System, *Origins of the National Forests* examines the issues that have confronted the development, management, and use of the national forests since their inception in 1891. The national forests are a major source of wood, water, minerals, forage, animal life, and habitat, and wilderness. Yet questions of who controls and who benefits from the resources have posed problems and conflicts from the origins of the Forest Service to the present. Based on a 1991 Forest History Society conference, the essays collected here discuss a range of important topics surrounding our national forests, including the relationship between the federal and state systems that regulate the forests, the privately owned lands within the forests that are governed by federal statutes, state laws, and county ordinances, the ill-defined rights of those who lived on the land long before it was a national forest and were forced off the land, and the effect of early policymaking decisions made within the framework of the emerging Conservation Movement.

Alfred Runte, 2010-04-16. In this lavishly illustrated book, well-known environmental historian Alfred Runte, a prominent figure on the Ken Burns documentary *The National Parks: America's Best Idea*, tells the highly engaging story of the development of our national parks from the first national park, Yellowstone, to the more recent decision to set aside vast tracts of Alaska for preservation.

The Politics of Purity Clayton Anderson Coppin, Jack C. High, 2010-08-10. Spearheaded by Harvey Washington Wiley, the Pure Food and Drugs Act of 1906 launched the federal regulation of food and drugs in the United States. Wiley is often lauded as a champion of public interest for bringing about a law that required healthful ingredients and honest labeling. Clayton Coppin and Jack High demonstrate, however, that Wiley was in fact surreptitiously allied with business firms that would benefit from regulation, and moreover that the law would help him build his government agency, the Federal Bureau of Chemistry. Coppin and High discuss such issues as Wiley's efforts to assign the law's enforcement to his own bureau. They go on to expose the selectivity of Wiley's enforcement of the law in which he manipulated commercial competition in order to reward firms that supported him and penalize those that opposed him. By examining the history of the law's movement, the authors show that rather than acting in the public interest, Wiley used the Pure Food and Drugs Act to further his own power and success. Finally, they analyze government regulation itself as the outcome of two distinct competitive processes: one that takes place in the market, the other in the polity. The book will interest scholars concerned with government regulation, including those in economics, political science, history, and business.

Clayton Coppin is a management consultant and historian, Koch Industries, Wichita. Jack High is Professor of Economics, George Mason University.

State Conservation of Resources Clifford James Hynning, United States. National Resources Committee, 1939 *Meeting United States-Japan Marine Facilities Panel* United States-Japan Cooperative Program in Natural Resources. Panel on Marine Facilities. Meeting, Labor's Great War Joseph A. McCartin, 2017-11-01 Since World War I says Joseph McCartin the

central problem of American labor relations has been the struggle among workers managers and state officials to reconcile democracy and authority in the workplace In his comprehensive look at labor issues during the decade of the Great War McCartin explores the political economic and social forces that gave rise to this conflict and shows how rising labor militancy and the sudden erosion of managerial control in wartime workplaces combined to create an industrial crisis The search for a resolution to this crisis led to the formation of an influential coalition of labor Democrats AFL unionists and Progressive activists on the eve of U S entry into the war Though the coalition s efforts in pursuit of industrial democracy were eventually frustrated by powerful forces in business and government and by internal rifts within the movement itself McCartin shows how the shared quest helped cement the ties between unionists and the Democratic Party that would subsequently shape much New Deal legislation and would continue to influence the course of American political and labor history to the present day

The Early Conservation Movement in Argentina and the National Park Service Arthur Oyola-Yemaiel, 1999-12 This study explores the emergence and development of the conservation movement in Argentina during the twentieth century I argue that the development of the conservation movement has been linked to shifts in the broader spectrum of Argentina s political arena as well as the international political situation as nations competed for the sovereignty of newly acquired

territories after the Indian Wars This book explores the development of Argentina as a nation in relation to conservation of its natural resources as a counter measure to resource extraction Thus I establish the relationship between the need for national sovereignty and socio economic development via the formulation of nature based tourism industry This strategy was developed by Excequiel Bustillo and spearheaded by the formation of National Park System The environmental movement in Argentina has been based on the principles of utilitarianism and the National Park System of Argentina was instrumental in establishing hegemonic national identity and sovereignty in Patagonia The National Park System institutionalized and for many years was the leading force behind conservation of Argentina s natural resources and it fostered social and economic development of remote areas through nature based tourism practices Congressional Record United States.
