Pinhook Finding Wholeness In A Fragmented Land:

Pinhook Janisse Ray, 2005-04-30 Janisse Ray award winning author of *Ecology of a Cracker Childhood* and *Wild Card Quilt* writes an evocative paean to wildness and wilderness restoration with an extraordinary journey into southern Georgia's Pinhook Swamp. Pinhook Swamp acts as a vital watershed and wildlife corridor, a link between the great southern wildernesses of Okefenokee Swamp and Osceola National Forest. Together, Okefenokee, Osceola, and Pinhook form one of the largest expanses of protected wild land east of the Mississippi River. This is one of America's last truly wild places, and Pinhook takes us into its heart. Ray comes to know Pinhook intimately as she joins the fight to protect it, spending the night in the swamp, tasting honey made from its flowers, tracking wildlife, and talking to others about their relationship with the swamp. Ray sees Pinhook through the eyes of the people who live there: naturalists, beekeepers, homesteaders, hunters, and locals at the country store. In lyrical, down-home prose, she draws together the swamp's need for restoration and the human desire for wholeness and wildness in our own lives and landscapes.

RiverTime Mary A. Hood, 2008-03-20 In this engaging travelogue of our world's rivers, great and small, poet and biologist Mary A. Hood reflects on rivers as creators of place. Recounting her journeys along portions of the Mississippi, the Danube, the Amazon, the Yangtze, the Ganges, the Nile, and a dozen small U.S. rivers, Hood weaves together natural history, current environmental and conservation issues, encounters with endangered plants and animals, and tells some interesting tales along the way. Like a river, the book begins small with essays that are narrowly focused on themes of environment and place, such as the need to write our world, Three Rivers, how fires and corporations control the West, the Flathead, the effect of wind farms on a small town in western New York, the Conhocton, the giant redwoods, and how they were preserved, the Klamath, and the search for moose in the great north woods, the Penobscot. The second section expands the themes of environment and place and looks at great world rivers, their long histories, their biological diversity, the effects of human use and tourism, and the paradox of human reverence and destruction. From endangered species to invasive species, from corporate control of national parks to wind farms, from urban sprawl to efforts at conservation and restoration, *RiverTime* offers insights into our relationship to the environment in the twenty-first century.

The Lost Language of Plants Stephen Harrod Buhner, 2002-03-01 Nautilus Book Awards Ecology Environment ForeWord Reviews Book of the Year Silver Medal Environment In the pharmaceutical, Silent Spring, well-known author, teacher, lecturer, and herbalist Stephen Harrod Buhner has produced a book that is certain to generate controversy. Inside *The Lost Language of Plants*, you'll find a critique of technological medicine and especially the dangers to the environment posed by pharmaceuticals and other synthetic substances that people use in connection with health care and personal body care. A new look at Gaia Theory, including an explanation that plants are the original chemistries of Gaia, and those phytochemistries are the fundamental communications network for the Earth's ecosystems. Extensive documentation of how plants communicate their healing qualities to humans and other animals. Western culture has obliterated most people's capacity to perceive these

messages but this book also contains valuable information on how we can restore our faculties of perception The book will affect readers on rational and emotional planes It is grounded in both a New Age spiritual sensibility and hard science While some of the author s claims may strike traditional thinkers as outlandish Buhner presents his arguments with such authority and documentation that the scientific underpinnings however unconventional are completely credible The overall impact is a powerful eye opening expos of the threat that our allopathic Western medical system in combination with our unquestioning faith in science and technology poses to the primary life support systems of the planet At a time when we are preoccupied with the terrorist attacks and the possibility of biological warfare perhaps it is time to listen to the planet This book is essential reading for anyone concerned about the state of the environment the state of health care and our cultural sanity

Nature's Writers Donald S. Clark,2024-09-03 A photographic celebration of the landscapes that have influenced some of America s most important nature writers from John Muir to Terry Tempest Williams to Barbara Kingsolver Since 2019 Donald S Clark has documented the places that have been instrumental in influencing the lives and words of both historic and contemporary nature and environmental writers throughout the United States While we have always felt their passionate connection to their own environments no book has ever made this visual connection between writers and their land before the relationship between prose and place Featuring more than 40 of America s most important writers the content is as far reaching as America itself from sea to shining sea forest to prairie and mountain to coastline Accompanying each gallery of stunning photography is a selected excerpt by the writer about their land With the increasingly noticeable effects of climate change the significance of these writers and their personal connections to the environment is even more timely This unique and compelling story of the land and how it has inspired some of our greatest poets and authors will make a wonderful gift for budding environmentalists students of nature writing or anyone interested in conservation

Andrew Furman, 2014-04-15 As with many people who live in Florida Andrew Furman is a transplant who at first did not recognize that this state has its own unique attributes and distinctive natural history beyond the popular perceptions of swampland and alligators. Each chapter of this book focuses on a particular type of Florida fauna or flora imbued with the personal touch of Furman's real learning experience **From Swamp to Wetland** Chris Wilhelm, 2022-08 **Restored to Earth** Gretel Van Wieren, 2013-07-09 Ecological restoration integrates the science and art of repairing ecosystems damaged by human activities. Despite relatively little attention from environmental ethicists restoration projects continue to gain significance drawing on citizen volunteers and large amounts of public funds providing an important model of responding to ecological crisis. Projects range from the massive multi billion dollar Kissimmee River project restoring 25 000 acres of Everglades wetlands to the 30 million effort to restore selected wetlands in industrial Brownfield sites in Chicago's south side Lake Calumet area to the reintroduction of tall grass prairie ecosystems in various communities in the Midwest. *Restored to Earth* provides the first comprehensive examination of the religious and ethical dimensions and significance of contemporary restoration practice an ethical framework that advances the field of environmental ethics in a more positive action oriented experience based direction. Van Wieren brings together insights and examples from restoration ecology environmental ethics religious studies and conservation and Christian thought as well as her own personal experiences in ecological restoration to propose a new restoration ethic grounded in the concrete hands on experience of humans working as partners with the land.

Ecology for Nonecologists Frank R. Spellman, 2008 Written for anyone who works with chemicals or has a general interest in ecology this book examines the interrelationship of life forms in our environment and provides straightforward explanations about the complicated interactions among nature and humans. Emphasizing basic concepts definitions and descriptions the author presents illustrative problems in terms of commonly used ecological parameters to provide readers with enough information to make technical and personal decisions about ecology. Funneling the broad multidisciplinary field of ecology which incorporates aspects of biology chemistry physics geology meteorology agriculture forestry and more into a single stream the author provides those with backgrounds in only a handful or even none of these disciplines with an easy to

read understanding of the functions and values of ecology and its interrelationships with other sciences including ecology's direct impact on our lives. Organized into three parts, this book examines the fundamentals of ecology, the role of biodiversity, and the practical side of ecology. Readers will examine such topics as biogeochemical cycles, ecological pyramids, and the laws of population ecology. They will also examine species, terrestrial ecosystems, and aquatic systems. Each chapter ends with a Chapter Review Test.

A Sanctuary of Trees Gene Logsdon, 2012-04-10 As author Gene Logsdon puts it, "We are all tree huggers. But not just for sentimental or even environmental reasons. Humans have always depended on trees for our food, shelter, livelihood, and safety. In many ways, despite the Grimm's fairy tale version of the dark, menacing forest, most people still hold a deep cultural love of woodland settings and feel right at home in the woods. In this latest book, A Sanctuary of Trees, Logsdon offers a loving tribute to the woods, tracing the roots of his own home groves in Ohio back to the Native Americans and revealing his own history and experiences living in many locations, each of which was different yet inextricably linked with trees and the natural world. Whether as an adolescent studying at a seminary or as a journalist living just outside Philadelphia's city limits, Gene has always lived and worked close to the woods, and his curiosity and keen sense of observation have taught him valuable lessons about a wide variety of trees, their distinct characteristics, and the multiple benefits and uses they have. In addition to imparting many fascinating practical details of woods wisdom, A Sanctuary of Trees is infused with a philosophy and descriptive lyricism that is born from the author's passionate and lifelong relationship with nature. There is a point at which the tree shudders before it begins its descent. Then slowly it tips, picks up speed, often with a kind of wailing death cry from rending wood fibers, and hits the ground with a whump that literally shakes the earth underfoot. The air in the aftermath seems to shimmy and shiver as if saturated with static electricity. Then follows an eerie silence, the absolute end to a very long life. Fittingly, squarely into the long and proud tradition of American nature writing, A Sanctuary of Trees also reflects Gene Logsdon's unique personality and perspective, which have marked him over the course of his two dozen previous books as the authentic voice of rural life and traditions."

American Crisis, Southern Solutions Anthony P. Dunbar, 2008-01-01 Editor Anthony Dunbar and more than a dozen Southern writers, historians, business and labor watchers, and philosophers reexamine some of the issues raised in the 2004 collection of essays, *Where We Stand: Voices of Southern Dissent*, which warned of the dangers of reelecting George W. Bush and of white Southerners unquestioningly casting their political lot with fundamentalism and conservatism. In this new collection, those essayists and new ones offer thoughtful, provocative suggestions for a fresh path America should follow in governance, international affairs, the environment, workplace security,
