Private Decisions Public Debate Women Reproduction And Population:

Women and Politics in Contemporary Ireland Yvonne Galligan, 1998-01-01 As Ireland made the transition from a rural to a post industrial society from the 1970s onwards Irish women developed a significant political voice Long excluded from participation in the civic arena they organised to make new challenging and specific demands on government The relationship between feminist representatives and political decision makers is at the core of this book It shows how Irish women developed the political skills required to represent women s interests to government effectively and finds that the political activity of the women s movement in the Republic of Ireland contributed to the dismantling of a range of discriminatory policies against women Galligan discusses the compromises made by both sides as the political system slowly moved to accomodate the feminist agenda In doing so she explores the dynamics of Irish politics from a different yet complementary perspective from the institutional approach which characterizes other studies of the Irish political system This book clearly marks the significant points in the creation of a more woman friendly society in Ireland from the 1970s to the present day It is the story of women s rights in contemporary Ireland

Investigating Reproductive Tract Infections and Other Gynaecological Disorders Shireen Jejeebhoy, Michael Koenig, Christopher Elias, 2003-02-13 Reproductive tract infections and other gynaecological disorders among women represent an enormous global health burden This significant book will help focus research on this important though neglected area The primary aims of the book are to provide an overview of reproductive tract infections and other gynaecological disorders to highlight the conceptual and methodological challenges associated with undertaking research on this subject and to serve as a reference for future research in this area The book focuses on developing country settings and recognizes that gathering this sort of information requires a multidisciplinary and culturally sensitive approach Findings from the research described in this book will undoubtedly assist physicians social scientists epidemiologists and public health practitioners in evaluating the magnitude of this problem within the community at large and in identifying potentially effective medical and behavioural interventions to address this problem

Managing Reproductive Life Soraya Tremayne, 2001 In 1999 the Institute of Social and Cultural Anthropology at the University of Oxford held a workshop on the social dynamics of human reproduction This volume contains 12 papers from scholars in Britain and the U S that were originally presented at that workshop Topics include for example motherhood among young prostitutes in Thailand the meaning of children in Hong Kong and the reproductive health of refugees

Private Decisions, Public Debate, 1994 *Gender, Development and Health* Caroline Sweetman, 2001 Articles included here focus on understandings of reproductive health integrating gender issues into infectious disease prevention the impact of HIV AIDS on women working with communities to promote health and on the monitoring and evaluation of health projects from a gender perspective

Female Genital Cutting Elizabeth Heger Boyle, 2005-09-09 The practice of female genital cutting sometimes referred to as female

circumcision and common in a number of African states has attracted increasing attention in recent years and mobilized strong international opposition While it typically produces a visceral response of horror and revulsion in Westerners the practice is widely regarded in some cultures as essential for proper development into womanhood and is defended by women who have themselves experienced it and who have had the procedure performed on their own daughters It is also perceived in many Islamic communities as religiously prescribed although most Islamic clerics do not condone the practice In this study sociologist Elizabeth Boyle examines this controversial issue from the perspectives of the international system governments and individuals Drawing on previous scholarship records of international organizations demographic surveys and the popular media Boyle examines how the issue is perceived and acted upon at international national and individual levels Grounding her work in the sociological theory of neoinstitutionalism Boyle describes how the choices made by governments and individual women are influenced by the often conflicting principles of individual human rights and sovereign autonomy She concludes that while globalization may exacerbate such conflicts it can ultimately lead to social change

Radical Women in Latin America Victoria González-Rivera, Karen Kampwirth, 2010-11-01 The rationale stated for studying radical women of Latin America is first to throw light on the development of dictatorship and authoritarianism second to transcend the stereotype of inherently violent men and inherently peaceful women and finally to demonstrate that there is no automatic sisterhood among women even of the same class and ethnicity Brief chronologies of three countries each in Central and South America open the two sections The contributors are historians and political scientists primarily from the US Annotation copyrighted by Book News Inc Portland OR

Global Feminisms Since 1945 Bonnie G. Smith, 2000 This is an innovative introduction to the issues of contemporary feminism with a truly global perspective It analyses the roots development and in some cases the conclusions of feminisms and how they have interacted

South Korea under Compressed Modernity Kyung-Sup Chang, 2010-04-12 The condensed social change and complex social order governing South Koreans life cannot be satisfactorily delineated by relying on West derived social theories or culturalist arguments Nor can various globally eye catching traits of this society in industrial work education popular culture and a host of other areas be analyzed without developing innovative conceptual tools and theoretical frameworks designed to tackle the South Korean uniqueness directly This book provides a fascinating account of South Korean society and its contemporary transformation Focusing on the family as the most crucial micro foundation of South Korea s economic social and political life Chang demonstrates a shrewd insight into the ways in which family relations and family based interests shape the structural and institutional changes ongoing in South Korea today While the excessive educational pursuit family exploitative welfare gender biased industrialization virtual demise of peasantry and familial industrial governance in this society have been frequently discussed by local and international scholarship the author innovatively explicates these remarkable trends from an integrative theoretical perspective of compressed modernity The family centered social order and everyday life in South Korea are analyzed as

components and consequences of compressed modernity South Korea under Compressed Modernity is an essential read for anyone studying Contemporary Korea or the development of East Asian societies more generally Contraception across Cultures Andrew Russell, Mary Thompson, Elisa J. Sobo, 2020-06-04 Contraception is an issue of considerable concern to a great many heterosexually active people Yet the impact of contraceptive technologies in the world today in particular their implications for kinship gender relations and other aspects of social life receives relatively little scholarly attention This book brings a new perspective to the study of contraception by collecting together in one volume leading experts in the fields of contraception family planning and reproductive health Contributors look at the social economic political and cultural contexts in which contraceptive providers and recipients make decisions about whether and what forms of contraception to use User perspectives whether those of recipients or providers of contraceptive services are taken seriously as are the perspectives of policy makers and development experts With its in depth case study approach this challenging book will appeal to practitioners and planners in the fields of family planning and reproductive health as well as to students and academics of applied and medical anthropology health studies gender and development studies or anyone interested in the social cultural and ethical issues raised by contraceptive technologies Cutting the Rose: Female Genital Mutilation - The Practice and Its Prevention Efua Dorkenoo, 1994-01-01 Only from such models is it fully possible to explore such issues as the rights of women and of children of the part which the well being of women plays in the health of a nation and also the strengths and weaknesses of the various international campaigns on the subject *Sex Without Consent* Shireen J Jejeebhoy, Iqbal Shah, Shyam Thapa, 2013-07-04 The pressing need to break the silence on non consensual sex among young people an issue shrouded by denial underreporting and stigma is self evident Despite the growing body of research regarding young people s sexual behaviours the study of coercive sexual experiences has generally been overlooked by both researchers and national programmes Available evidence has been scattered and unrepresentative and despite this evidence non consensual sex among young people is perceived to be a rare occurrence This volume dispels any such misconception It presents a disturbing picture of non consensual sex among girls as well as boys and among married as well as unmarried young women in a variety of settings This volume documents moreover the expanse of non consensual experiences that young people face from unwanted touch to forced penetrative sex and gang rape Although the focus is on young females the volume also sheds light on the experience of young males as both victims and perpetrators This pioneering volume highlights key factors placing young people at risk whilst outlining the significant distinctive health and social implications they face *Sex Without Consent* also documents the unsupportive and sometimes abusive or negligent roles of families teachers health care providers and law enforcement agents outlines promising efforts intended to prevent non consensual sex or support survivors and argues for profound changes in norms and values that tolerate or encourage non consensual sex The editors based at the Population Council New Delhi the World Health Organization Geneva and Family Health International Virginia

argue compellingly for a radical review and reform of existing programmes designed to prevent this kind of abuse and to support young survivors of sexual trauma in the developing world Addressing the magnitude determinants and consequences of sex without consent this volume provides evidence based directions for programming *Blood, Land, and Sex* Lyda Favali, Roy Pateman, 2003-06-18 In Eritrea state traditional and religious laws equally prevail but any of these legal systems may be put into play depending upon the individual or individuals involved in a legal dispute Because of conflicting laws it has been difficult for Eritreans to come to a consensus on what constitutes their legal system In *Blood Land and Sex* Lyda Favali and Roy Pateman examine the roles of the state ethnic groups religious groups and the international community in several key areas of Eritrean law blood feud or murder land tenure gender relations marriage prostitution rape and female genital surgery Favali and Pateman explore the intersections of the various laws and discuss how change can be brought to communities where legal ambiguity prevails often to the grave harm of women and other powerless individuals This significant book focuses on how Eritrea and other newly emerging democracies might build pluralist legal systems that will be acceptable to an ethnically and religiously diverse population **No Paradise Yet** Judith Mirsky, Marty Radlett, 2000-09 This is a review of where the women of Asia Africa Latin America and the Caribbean stand on key social and cultural issues What progress have women in particular countries made How do social pressures cultural expectations and continuing poverty hold back effective recognition of their rights What prospects as a result of continuing research activism by women s organizations and measures by government does the next generation hold out of for further progress in women s social position **Childfree and Sterilized** Annily Campbell, 1999-01-01 This book examines the relatively new social and medical phenomenon of women in the developed countries of the world choosing to remain childfree and electing for sterilization rather than continuing with other forms of contraception Twenty three voluntarily childfree sterilized women aged 22 to 51 years tell their stories revealing the struggles they faced in being women without children in a society which expects women to be mothers They describe the many barriers encountered on the way to being sterilized including prejudice from those around them as well as hostility and refusal from the medical profession The women recall how their reasons and decisions were ignored or pathologized by doctors who held unquestioned assumptions about how women should be Feminist and sociological perspectives are employed to highlight that voluntarily childfree women are perceived as abnormal not real women and are often the target of negative and critical comment **Female "circumcision" in Africa** Bettina Shell-Duncan, Ylva Hernlund, 2000 To ban excision in Meru Kenya Lynn Thomas [Health Policy in a Globalising World](#) Kelley Lee, Kent Buse, Suzanne Fustukian, 2002-08-08 Increasing recognition of the impact that globalisation may be having on public health has led to widespread concern about the risks arising from emerging and re emerging diseases environmental degradation and demographic change This book argues that health policy making is being affected by globalisation and that these effects are in turn contributing to the kind of global health issues being faced today The book

explores how the actors context processes and content of health policy are changing as a result of globalisation raising concerns about growing differences in who can influence health policy what priorities are set what interventions are deemed appropriate and ultimately who enjoys good and bad health Bringing together a distinguished international group of contributors this book covers a comprehensive range of topics and geographic regions and will be invaluable for all those interested in health social and public policy and globalisation Preventing HIV in Developing Countries Laura Gibney,Ralph J. DiClemente,Sten H. Vermund,2006-04-11 Globally action to prevent HIV spread is inadequate Over 16 000 new infections occur every day Yet we are not helpless in the face of disaster as shown by the rich prevention experience analyzed in this valuable new compendium Best practice exists a set of tried and tested ways of slowing the spread of HIV of persuading and enabling people to protect themselves and others from the virus Individually features of best practice can be found almost everywhere The tragedy on a world scale is that prevention is spotty not comprehensive the measures are not being applied on anywhere near the scale needed or with the right focus or synergy The national response may concentrate solely on sex workers for example Elsewhere efforts may go into school education for the young but ignore the risks and vulnerability of men who have sex with men Action may be patchy geographically AIDS prevention may not benefit from adequate commitment from all parts and sectors of society compromising the sustainability of the response In some countries matters are still worse there is still hardly any action at all against AIDS and scarcely any effort to make HIV visible It is no wonder that the epidemic is still emerging and in some places is altogether out of control Gender in Latin America Sylvia H. Chant,Nikki Craske,2003 A comprehensive state of the art review of gender in one of the world's most diverse and dynamic regions The authors draw on a wide range of sources including their own field research to explore changes and continuities in gender roles relations and identities during the late twentieth century into the twenty first Debunking traditional universalizing stereotypes diversity in gender is highlighted in relation to the cross cutting influences of age class sexuality ethnicity rural urban residence and migrant status *National Healths* Michael Worton,Wilson Tagoe,2013-07-04 In today's globalised world it is increasingly important to understand the otherness of different societies and their beliefs histories and practices This book focuses on a burning cultural issue how concepts and constructions of gender and sexuality impact upon health medicine and healthcare Starting from the premise that health is neither a universal nor a unitary concept it offers a series of interdisciplinary analyses of what sickness and well being have been are and can be The originality of this book is its cross cultural and trans historical approach Bringing together specially commissioned work by both major critical voices and young scholars in fields ranging from anthropology and art history to philosophy political science and sociology this volume challenges many traditional assumptions about gender medicine and health care Issues addressed include the politics and realities of female genital mutilation sex work and migration the portrayal of mothering in contemporary African writing the representation of AIDS in literature photography and the media the place of gender in

ancient Egyptian health papyri the dramatisation of morality and sexual over indulgence in Thai literature the relationship between myths of menstruation and power in early modern England the role of anger in traditional Chinese medicine and the ways in which both disease and sexual identities were redefined by cholera in the nineteenth century The wide ranging Introduction provides a historical and theoretical framework for what is defined here as Cultural Medicine whilst fifteen original essays demonstrate from different perspectives that health is not merely a physiological and medical issue but also a cultural and ethical one An invaluable research and study resource this book is written in a clear and accessible style and will be of interest to the general reader as well as to students of all levels to teachers of a wide range of disciplines and to specialist researchers of cultural studies and of medicine
