Quaternary Environments:

Reconstructing Quaternary Environments J.J. Lowe, M.J.C. Walker, 2014-07-10 Examines the various forms of evidence used to establish the history and scale of environmental changes during the Quaternary. The evidence is extremely diverse ranging from landforms and sediments to fossil assemblages and isotope ratios bringing the book fully up to date since its last publication. Quaternary Environments, 1993. *Reconstructing Quaternary Environments* J. John Lowe, Michael J.C. Walker, 2014-10-28 This third edition of *Reconstructing Quaternary Environments* has been completely revised and updated to provide a new account of the history and scale of environmental changes during the Quaternary. The evidence is extremely diverse ranging from landforms and sediments to fossil assemblages and geochemical data and includes new data from terrestrial marine and ice core records. Dating methods are described and evaluated while the principles and practices of Quaternary stratigraphy are also discussed. The volume concludes with a new chapter which considers some of the key questions about the nature causes and consequences of global climatic and environmental change over a range of temporal scales. This synthesis builds on the methods and approaches described earlier in the book to show how a number of exciting ideas that have emerged over the last two decades are providing new insights into the operation of the global earth ocean atmosphere system and are now central to many areas of contemporary Quaternary research. This comprehensive and dynamic textbook is richly illustrated throughout with full colour figures and photographs. The book will be of interest to undergraduates postgraduates and professionals in Earth Science Environmental Science Physical Geography Geology Botany Zoology Ecology Archaeology and Anthropology. **Encyclopedia of Paleoclimatology and Ancient Environments** Vivien Gornitz, 2008-10-31 One of Springer's Major Reference Works this book gives the reader a truly global perspective. It is the first major reference work in its field. Paleoclimate topics covered in the encyclopedia give the reader the capability to place the observations of recent global warming in the context of longer term natural climate fluctuations. Significant elements of the encyclopedia include recent developments in paleoclimate modeling paleo ocean circulation as well as the influence of geological processes and biological feedbacks on global climate change. The encyclopedia gives the reader an entry point into the literature on these and many other groundbreaking topics.

Julius B. Lejju,2012 Lake Victoria basin an international water body that offers the riparian communities a large number of important benefits has in the last four decades experienced drastic environmental changes with a significant drop in its water level in the more recent years The changes in water level have significantly affected the energy supply in the region and threatened the lives of the riparian population engaged directly and indirectly in subsistence and commercial fishing and the agricultural and industrial sectors The reduction in lake levels has attracted conflicting speculation Environmentalists attribute it to reduced rainfall experienced in the East African region while hydrologists blame it on environmental degradation and excessive water release through the operations of the Kiira Nalubale hydroelectric power dams at Jinja This research provides evidence of long term environment changes in Lake Victoria and a contribution to the understanding of the past environmental conditions in the lake basin It provides the history of human environment interactions including the possible cause for the dynamics of the lake levels giving possible options that can help to remedy and or mitigate the
