Hypermasculinities in the Contemporary Novel Josef Benson, 2014-07-16 Issues of race gender women's rights masculinity and sexuality continue to be debated on the national scene These subjects have also been in the forefront of American literature particularly in the last fifty years One significant trend in contemporary fiction has been the failure of the heroic masculine protagonist In Hypermasculinities in the Contemporary Novel Cormac McCarthy Toni Morrison and James Baldwin Josef Benson examines key literary works of the twentieth century notably Blood Meridian 1985 All the Pretty Horses 1992 Song of Solomon 1977 and Another Country 1960 Benson argues that exaggerated masculinities originated on the American frontier and have transformed into a definition of ideal masculinity embraced by many southern rural American men Defined by violence racism sexism and homophobia these men concocted or perpetuated myths about African Americans to justify their mistreatment and mass murder of black men after Reconstruction As Benson illustrates the protagonists in these texts fail to perpetuate hypermasculinities and as a result a sense of ironic heroism emerges from the narratives Offering a unique and bold argument that connects the masculinities of cowboys and frontier figures with black males Hypermasculinities in the Contemporary Novel suggests alternative possibilities for American men going forward Scholars and students of American literature and culture African American literature and culture and queer and gender theory will find this book illuminating and persuasive

Gender Norms and Intersectionality Riki Wilchins, 2019-03-25 There have been few if any attempts to translate the immense library of academic studies on gender norms for a lay audience or to illustrate practical ways in which their insights could and should be applied Similarly there have been few attempts to build the case for gender in diverse fields like health education and economic security within a single book one which also uses an intersectional lens to address

issues of race and class This book not only looks at the impact of rigid gender norms on young people who internalize them but also shows how the health educational and criminal justice systems with which young people interact are also highly gendered systems that relentlessly police and sustain very narrow ideas of masculinity and femininity particularly among youth Current treatments of a gender lens or gender analysis both at home and abroad usually conflate gender with women and or trans Gender Norms and Intersectionality shows conclusively how this is both inadequate and wrong headed It documents why gender norms must be moved to the center of the discourses aimed at improving life outcomes for at risk communities And it does so while acknowledging the insights of queer theorists about bodies power and difference This book provides a starting point for a long overdue movement to elevate applied gender studies providing both a reference and guide for researchers students policymakers funders non profit leaders and grassroots advocates It aims to transform readers view of a broad array of familiar social problems such as basic wellness and reproductive health education economic security and partner male on male and school violence showing how gender norms are an integral if overlooked key to understanding each

Non-binary and Genderqueer Genders Motmans Joz,Timo Nieder,Walter Bouman,2020-07-15 Some people have a gender which is neither male nor female and may identify as both male and female at one time as different genders at different times as no gender at all or dispute the very idea of only two genders The most often heard umbrella terms for such genders are non binary or genderqueer genders This book looks to bring together those currently exploring and researching this non binary phenomenon Gender identities outside of the binary of female and male are increasingly being recognized in social legal medical and psychological discourses together with the emerging presence and advocacy of people who identify as non binary or genderqueer Population based studies show a small percentage but a sizable proportion in terms of numbers of people who identify as non binary While such genders have always been in existence worldwide they remain marginalized and as such at risk of victimization and of minority stress as a result of social non acceptance and discrimination Non binary and Genderqueer Genders explores these gender identities in relation to health well being and or other experiences in an effort to contribute to improving clinical standards and continued cultural change towards acceptance for this group of people This book was originally published as a special issue of the International Journal of Transgenderism renamed International Journal of Transgender Health in 2020

Decolonizing "Multicultural" Counseling through Social Justice Rachael D. Goodman, Paul C. Gorski, 2014-11-03 Multicultural counseling and psychology evolved as a response to the Eurocentrism prevalent in the Western healing professions and has been used to challenge the Eurocentric patriarchal and heteronormative constructs commonly embedded in counseling and psychology Ironically some of the practices and paradigms commonly associated with multiculturalism reinforce the very hegemonic practices and paradigms that multicultural counseling and psychology approaches were created to correct In Decolonizing Multicultural Counseling through Social Justice counseling and psychology scholars and practitioners examine this paradox through a social justice lens by questioning and challenging the infrastructure of dominance in society as well as by challenging ourselves as practitioners scholars and activists to rethink our commitments The authors analyze the ways well meaning clinicians might marginalize clients and contribute to structural inequities despite multicultural or cross cultural training and offer new frameworks and skills to replace the essentializing and stereotyping practices that are widespread in the field By addressing the power imbalances embedded in key areas of multicultural theory and practice contributors present innovative methods for revising research paradigms professional education and hands on practice to reflect a commitment to equity and social justice Together the chapters in this book model transformative practice in the clinic the schools the community and the discipline Among the topics covered Rethinking racial identity development models Queering multicultural competence in counseling Developing a liberatory approach to trauma counseling Decolonizing psychological practice in the context of poverty Utilizing indigenous paradigms in counseling research Addressing racism through intersectionality A mind opening text for multicultural counseling and psychology courses as well as other foundational courses in counseling and psychology education Decolonizing Multicultural Counseling through Social Justice challenges us to let go of simplistic approaches

however well intended and to embrace a more transformative approach to counseling and psychology practice and scholarship

Queerying Planning Petra L. Doan, 2016-05-23 Current planning practices have largely neglected the needs of the Lesbian Gay Bisexual and Transgender LGBT community for safe urban spaces in which to live work and play This volume fills the gap in the literature on the planning and development of queer spaces and highlights some of the resistance within the planning profession to incorporate gay and lesbian concerns into the planning mainstream Planning lags behind other disciplines concerned with queer urban issues In contrast the field of geography has developed a rich sub specialty in the geographies of sex and gender that examines spaces and the variety of non heteronormative populations that inhabit them This volume brings together both planners and geographers with experience in planning to examine some of the fundamental assumptions of urban planning as they relate to the LGBT community The first few chapters are substantial revisions and expansions of earlier influential work on planning for non conformist populations and the preservation of LGBT neighborhoods Subsequent chapters comprise original contributions that draw on the rich literature from queer theory planning theory and the geography of sexualities to explore the ways that nonconformist populations struggle with heteronormative expectations embedded in planning theory and procedures These chapters consider the intersection of planning and a range of populations including transgendered and gender variant individuals Subsequent chapters examine the ways that variations in the scale of urban and regional governance influence local politics around the implementation of more equitable policies at the city level In addition several chapters critically examine the implications of using the tolerance component of Richard Florida's creative cities arguments The final section consists of two chapters that explore the ways that urban planning regimes have been used to regulate sexually oriented businesses and the way this regulation of sexualized spaces has implications on the heteronormativity of plans and planners In summary these chapters interrogate planning practice and pose questions for academic and professional planners about the ways that the queer community and its needs for spaces have shifted What do those changes mean for the practice of planning 40 years after the North American

Stonewall rebellion and looking forward to the next 40 years To what extent does existing planning practice constrain the evolution of queer communities or seek to commercialize such spaces to the benefit of large developers and the detriment of marginalized members of the community How might planning practice change to provide more direct support to the evolution of queer people and the spaces in which they live This volume draws on these insights as well as the experiences of the various authors to lay out possible future directions for the field of planning to create truly inclusive urban areas
