LONERGAN'S  
PHILOSOPHY

# Quest For Self Knowledge

**Frank David Mitchell**

## Quest For Self Knowledge:

Quest for Self-Knowledge Joseph Flanagan, 1997-07-05 The theme of self knowledge introduced by classical philosophers was taken up and extended by Bernard Lonergan in his major work *Insight* In this innovative and complex study Lonergan developed a systematic method for understanding the development of self knowledge Joseph Flanagan shares with Lonergan the premise that the problem of self knowledge can be resolved methodically The purpose of this book is to introduce teachers and students to this difficult subject and to provide readers with a transcultural normative foundation for a critical evaluation of self identity and cultural identity Flanagan elucidates the complicated historical context in reference to the emergence of Lonergan's positions in particular he relates Lonergan's thought to the development of modern science He then retraces the main arguments of *Insight* as they relate to the theme of self knowledge and invites readers to discover and verify within their own conscious experiences a foundational identity that they share with all knowers in an ever expanding search for truth This method of self appropriation not only reveals a new philosophical method but also transforms the traditional science of metaphysics by subsuming it into a richer and more comprehensive ethical context *Quest for Self Knowledge* establishes new ground for philosophical and religious dialogue and demonstrates how Lonergan's philosophy provides a context that complements and enriches the analytic and phenomenological approaches that dominate Western schools of philosophy

**Matter and Form** Ann Ward, 2009-10-29 Matter and Form explores the relationship that has long existed between natural science and political philosophy Plato's Socrates articulates the Ideas or Forms as an account of the ultimate source of causality in the cosmos Aristotle's natural philosophy had a significant impact on his political philosophy he argues that humans are by nature political animals having their natural end in the city whose regime is hierarchically structured based on differences in moral and intellectual capacity Medieval theorists attempt to synthesize classical natural and political philosophy with the revealed truths of scripture they argue that divine reason structures an ordered universe the awareness of which allows for psychic and political harmony among human beings Enlightenment thinkers challenge the natural philosophy of classical and medieval philosophers ushering in a more liberal political order For example for Hobbes there is no rest in nature as there are no Aristotelian forms or natural places that govern matter Hobbes applies his mechanistic understanding of material nature to his understanding of human nature individuals are by nature locked in an endless pursuit of power until death However from this mechanistic understanding of humanity's natural condition Hobbes develops a social contract theory in which civil and political society is constituted from consent Later thinkers such as Locke and Rousseau modify this Hobbesian premise in their pursuit of the protection of rights and a free society Nevertheless materialist conceptions of the cosmos have not always given rise to liberal democratic philosophies Historicist influence on scientific inquiry in the nineteenth century is connected to Darwin's theory of evolution Darwin reasoned that over time the process of natural selection produces ever newer and more highly adapted species Reflecting a form of social Darwinism Nietzsche envisions an aristocratic order that draws its inspiration from art rather than the rationalism
