Quest For Survival:

A Quest for the Physical Reality of Time Sidi Benzahra Cherkawi,2012-08-01 Some scientists believe that time is physical such as matter and other scientists believe that time is an imagination such as the numbers 1 2 and 3 Did we invent time or was time here in the universe before we came to existence This book answers this question This book also tells the stories of my encounters of physics Nobel laureates such as I I Rabi T D Lee Murray Gell Mann James Rainwater and more **Law and Sacrifice** Johan Van der Walt,2014-06-11 In the wake of apartheid Law and Sacrifice draws on the uniquely expansive protection of fundamental rights now entrenched in the South African Constitution to outline a new theory of law The South African Constitution not only protects the rights of people against abuses of power by the state but also against abuses of power by private legal subjects Drawing upon the work of contemporary thinkers such as Martin Heidegger Hannah Arendt George Bataille Jacques Derrida Emmanuel Levinas and Jean Luc Nancy the author elicits the radical democratic potential of this horizontal notion of rights Johan van der Walt argues that apartheid must be understood as more than a racist abuse of power and here he articulates its sacrificial logic It is in going beyond this logic he maintains that the truly democratic potential of the South African Constitution can be understood in a radical formal and substantive equality that offers the legal basis for rethinking a post apartheid future Combining a rigorous theoretical understanding with a subtle political engagement Law and Sacrifice is a dazzling interrogation of the limits and possibilities of democratic pluralism It will be of interest to political and legal theorists as well as to those who are concerned with South African law and politics **The Unconscious Domain** Henry Kellerman,2020-02-01 This book enumerates the components of the unconscious domain or realm and attempts to uncover the proposed communicational network of its operation a communicational network that is able to link inherent participating components of this realm It is often the case that theoreticians and clinical practitioners refer to the unconscious or unconscious material in a way that implies the sense of it all rather than a specific definition broadly describing it as material which is out of one s awareness This volume therefore examines the complex existence of the entire unconscious realm embraced in an evolutionary historical context defined here as the unconscious domain

 Ibrahim Taha,2015-07-01 It is commonly believed that some approaches of structural semiotics narratology and cognitive science have not yet succeeded in constructing a complete and coherent theory of literary character The author argues that the primary explanation of the failure is the artificial separation between characters and their actions One of the chief implications of such separation is treating characters in terms of structures agents actants functions roles and signs which obviously mean that actions can hardly be explained as intended motivated performed and experienced Survival as a motivation based concept is one of the key concepts making the separation between character and action something impossible Humans in literary narratives search for survival as an aware process of knowing and meaning making Meaning in literary narratives can be produced by heroizability which treats literary characters as living anthroposemiotic entities aware of their natural motivation to achieve in order to survive and produce meanings of their survival As such characters in literary narratives have active cognitions and their cognitive activities remain meaningless without a process of semiosis Applying Anthroposemiotic theory with Modeling System Theory heroizability provides methodical tools to explain how the narrative text is represented and thus how it is to be interpreted properly by the reader not only to find but also to make meaning in narrative world **Ideas of a Twentieth Century Grandfather** James M.H. Jacket *Unamuno's Theory of the Novel* C.A. Longhurst, 2017-07-05 Miguel de

Unamuno 1864-1936 is widely regarded as Spain's greatest and most controversial writer of the first half of the twentieth century. Professor of Greek and later Rector at the University of Salamanca and a figure with a noted public profile in his day, he wrote a large number of philosophical, political and philological essays as well as poems, plays and short stories, but it is his highly idiosyncratic novels for which he coined the word *novela* that have attracted the greatest critical attention. *Niebla* (1914) has become one of the most studied works of Spanish literature, such is the enduring fascination which it has provoked. In this study, C. A. Longhurst, a distinguished Unamuno scholar, sets out to show that behind Unamuno's fictional experiments there lies a coherent and quasi-philosophical concept of the *novel* genre and indeed of writing itself. Ideas about freedom, identity, finality, mutuality and community are closely intertwined with ideas on writing and reading and give rise to a new and highly personal way of conceiving fiction.

M.N. Roy (M. N. Roy, 2010-10-04) When humanism was first receiving widespread public attention in the West through such publications as *The Humanist Manifesto* in 1933, unbeknownst to most Westerners, humanism was proceeding on a parallel track in India, largely due to the efforts of philosopher and political activist M. N. Roy (1887-1954). Sadly, it wasn't until the early fifties, at the end of Roy's life, that European humanists began to notice his work. To rectify the unfortunate neglect in the West of one of India's premier intellectuals, philosopher Innaiah Narisetti has compiled this new collection of Roy's most significant works. Roy conceived of humanism as a scientific, integral and radically new worldview. Among many interesting selections in this volume, Roy's *Principles of Radical Democracy* (1922) is especially representative of his thinking. Here he emphasized ethics and eschewed supernatural interpretations as antithetical to his scientifically oriented conception of new humanism. He also underscored the importance of universal education to make average people scientifically literate and to teach them critical thinking. Roy was not only a thinker but a doer as well. He spent six years in an Indian prison during the 1930s for opposing the British rule of India. For humanists, philosophers, political scientists and others, M. N. Roy's unique and still very relevant view of humanism will have great appeal and broad application beyond its original Indian context.

Routledge Revivals: Paul Tillich (1973) Alistair Macleod (2017-09-29) First published in 1973, this is the first book on Paul Tillich in which a sustained attempt is made to sort out and evaluate the questions to which Tillich addresses himself in the crucial philosophical parts of his theological system. It is argued that despite the apparent simplicity in his interest in the question of being, Tillich in fact conceives of the ontological enterprise in a number of radically different ways in different contexts. Much of the author's work is devoted to the careful separation of these strands in his philosophical thought and to an exploration and assessment of the assumptions associated with them. This book will be of interest to readers of Tillich and philosophers who specialise in ontology and linguistics.
