## **Quest For The Kakapo:**

Quest for the Kakapo the Full Story of New Zealand's Most Remarkable Bird David Butler, 1989      **Quest for the Kakapo** David Butler, 1989      **Reintroduction Biology** John G. Ewen, Doug P. Armstrong, Kevin A. Parker, Philip J. Seddon, 2012-01-30 This book aims to further advance the field of reintroduction biology beyond the considerable progress made since the formation of the IUCN SSC Re introduction Specialist Group Using an issue based framework that purposely avoids a structure based on case studies the book s central theme is advocating a strategic approach to reintroduction where all actions are guided by explicit theoretical frameworks based on clearly defined objectives Issues covered include husbandry and intensive management monitoring and genetic and health management Although taxonomically neutral there is a recognised dominance of bird and mammal studies that reflects the published research in this field The structure and content are designed for use by people wanting to bridge the research management gap such as conservation managers wanting to expand their thinking about reintroduction related decisions or researchers who seek to make useful applied contributions to reintroduction      Thinking Like a Parrot Alan B. Bond, Judy Diamond, 2021-12-06 People form enduring emotional bonds with other animal species such as dogs cats and horses For the most part these are domesticated animals with one notable exception Many people form close and supportive relationships with parrots even though these amusing and curious birds remain thoroughly wild creatures What enables this unique group of wild animals to form social bonds with people and what does this mean for their survival      **Rat Island** William Stolzenburg, 2011-06-21 Rat Island rises from the icy gray waters of the Bering Sea a mass of volcanic rock covered with tundra midway between Alaska and Siberia Once a remote sanctuary for enormous flocks of seabirds the island gained a new name when shipwrecked rats colonized savaging the nesting birds by the thousands Now on this and hundreds of other remote islands around the world a massive and massively controversial wildlife rescue mission is under way Islands making up just 3 percent of Earth s landmass harbor more than half of its endangered species These fragile ecosystems home to unique species that evolved in peaceful isolation have been catastrophically disrupted by mainland predators rats cats goats and pigs ferried by humans to islands around the globe To save these endangered islanders academic ecologists have teamed up with professional hunters and semiretired poachers in a radical act of conservation now bent on annihilating the invaders Sharpshooters are sniping at goat herds from helicopters Biological SWAT teams are blanketing mountainous isles with rat poison Rat Island reveals a little known and much debated side of today s conservation movement founded on a cruel to be kind philosophy Touring exotic locales with a ragtag group of environmental fighters William Stolzenburg delivers both perilous adventure and intimate portraits of human beast hero and villain And amid manifold threats to life on Earth he reveals a new reason to hope      **Experimental Approaches to Conservation Biology** Malcolm Gordon, Soraya M. Bartol, 2004-09-13 A volume of essays describing lab and field experiments that improve our understanding or ability to resolve issues surrounding endangered species and invasive

plants and animals      Parrots of the Wild Catherine A. Toft, Timothy F. Wright, 2015-11-16 A synthetic account of the diversity and ecology of wild parrots distilling knowledge from the author's own research and from her review of more than 2 400 published scientific studies The text covers parrots evolutionary history foraging mating and social behavior innate intelligence and conservation status The book is enhanced by an array of illustrations including photos of parrots taken exclusively in their natural habitat Provided by publisher      **Why Parrots?** Tom Marshall, 2021-07-19 Why Parrots Why Aviculture By Tom Marshall After Tom Marshall returned from his work with the Peace Corps in the Philippines and restarted his teaching career he has nurtured his love of parrots His fascination began with a large green Amazon parrot that was gifted to him by another teacher with no instructions for care for this intimidating bird He began reading all he could about parrots and finally started to hit it off with his avian friend after six months Why Parrots Combines personal anecdotes and experience with important information about personal responsibility for parrots as well as the importance of conservation of these fantastic creatures habitat so that future generations can continue to enjoy their beauty and intelligence      The Sensory Ecology of Birds Graham R. Martin, 2017-03-30 Birds are renowned for their exceptional vision and the way that this enables them to survive and navigate the world in such a unique way However it is now recognised that avian behaviour is guided by information drawn from many different senses which are then used in integrated and complementary ways to answer the many different sensory challenges posed by specific environments and particular tasks Understanding how sensory information is used by birds has important applications in conservation such as providing vital insights into why birds are prone to collisions with structures like power lines and wind turbines and why so many diving birds become entrapped in nets A sensory ecology approach suggests how these problems can be mitigated The Sensory Ecology of Birds ranges widely across species environments and behaviours to present a synthesis that challenges previous assumptions about the information that controls the behaviour of birds A bird may use a wide range and combination of sensory information that comes from sight hearing smell mechanoreception taste and magnetoreception It may also include specific refinements of senses such as echolocation and remote touch from the bill The book recognises that there are many complex and subtle trade offs and complementarities of information between different types of sensory information This accessible text will be of interest to a wide ornithological readership from undergraduates to researchers as well as a broader audience of behavioural ecologists and evolutionary biologists      **The Elf Revelation - Book Nine of the Magi Charter** Jordan David, It's been a long journey for the galaxy A galaxy descending into war Everything is unraveling The Elves and their Santa have failed so many Repercussions are inevitable A great transition is coming to pass and with it the Mission will conclude Santa Tiberius is faced with the reality of his poor decisions His authority with the Elves hangs by a thread It is not enough to admit he is the Last Santa he must embrace it Hard choices must be made Never one to back down from a fight Tiberius must step down and let others take over The Elves struggle to unite in a vision fulfilling the Charter Dedicated as they are each Discipline each

faction has its own goals and methods Every individual yearns to contribute yet thousands of voices speaking at once are chaos The era of Santa Claus is ending The age of Elves is uncertain A crossroads of choices looms ahead Crystals Runes and Touchstones The universe teems with the unknown with secrets Neither the Elves nor the Santas were the only beings charged with upholding the mantle of the Child s dream Others work in their own mysterious ways towards the great Peace Long ago the Nix beings of living snow took a vow to protect the Dedicated They longed to share their unique gifts yet held back their most wondrous creations The long awaited revelation is nearly here though not all will be worthy of their last gift For the Dedicated deliver stardust dreams to the children of the heavens Forever are the Elves a Santa s time fleeting From the top of the world to the heart of the stars To the dreamers go the Child s epiphany The Omega becomes an Alpha Secrets wrapped in choices Infinite paths to the Peace All chasing the promise of a world without end About the Magi Charter series For over two thousand years the legend of Santa Claus has endured His is a Mission of peace as outlined in the Magi Charter given to the first Santa by the Child From humble beginnings following that First Christmas the Santa lineage has been passed down through the ages This epic adventure tells the story of those Santas from the founding of the North Pole and the origin of the ancient elves to our modern times where the world s problems affect even those in the secluded complex of the North and concluding in the distant future which finds Santa and the elves committed to their mission on a galactic scale where Christmas traditions are barely recognizable In every era those committed to the Mission must find a way to deliver that which is needed most to those most deserving
