Les Créoles à base française Hazaël-Massieux Marie-Christine ,2012-02-10 Qu entend on par creoles base française Il s agit de langues dont la formation aux XVIIe XVIIIe siecles s enracine dans le français mais aussi dans d autres langues les langues des esclaves Nées dans les contacts linguistiques pendant les colonisations européennes ces langues résultent donc d interpretations et de réanalyses effectuées dans le cadre de communications essentiellement orales en dehors de toute pression

normative Le but de cet ouvrage est de donner un aperçu du fonctionnement d'ensemble de ces langues Le lecteur intéressé trouvera ici une présentation synthétique claire et concise concernant la petite dizaine de créoles basées francophones illustrée par de nombreux exemples De courts extraits de textes dans trois des créoles guadeloupéen haïtien et réunionnais sont en outre proposés Le lecteur découvrira que les créoles répondent de manière particulière aux règles propres quant à leur prononciation et leur grammaire que leurs grammaires sont décrites et bien connues et qu'il existe des dictionnaires des créoles français Il verra également que ces langues ont déjà donné lieu à une littérature significative et que bien qu'ils conservent encore de nombreux traits de langues spécifiquement orales les créoles sont utilisés dans la presse ou sur Internet La question de l'avenir des créoles s'avère donc cruciale aujourd'hui où seules les grandes langues internationales et officielles semblent avoir la possibilité de survivre

La sémantique Christian Touratier, 2010-09-08 Cet ouvrage part de la pratique des dictionnaires de certains concepts de la semantique structurale et de ce que la rhétorique appelle figures de style ou tropes pour laborer une théorie de la description du sens des lexèmes qui soit à la fois cohérente et efficace et qui explique notamment comment le signifiant d'une unité significative donne peut présenter en nonc des effets de sens différents et même des significations différentes Ne se limitant pas à la signification des unités lexicales il envisage les particularités semantiques de trois grandes classes de morphèmes le verbe le nom et l'adjectif et présente comment les principales fonctions syntaxiques contribuent à la signification du nonc Il montre enfin que cette signification du nonc est plus que la simple somme des significations des morphèmes qui le constituent et correspond à une structuration particulière spécifique de l'information destinée aux étudiants en lettres modernes en sciences du langage et en langues vivantes qui doivent analyser le vocabulaire de la langue sur laquelle ils travaillent et auxquels il est souvent demandé de définir le sens des mots d'un texte il explicite également tous les concepts semantiques et lexicologiques qu'il utilise Il propose une synthèse la plus complète possible en semantique proprement linguistique et avant tout descriptive

Sémantique & concordances J.-L. Descamps, École normale supérieure de Saint-Cloud Centre de recherche et d'étude pour la diffusion du français, 1992 **The French Language in the Digital Age** Georg Rehm, Hans Uszkoreit, 2012-08-20 This white paper is part of a series that promotes knowledge about language technology and its potential It addresses educators journalists politicians language communities and others The availability and use of language technology in Europe varies between languages Consequently the actions that are required to further support research and development of language technologies also differ for each language The required actions depend on

many factors such as the complexity of a given language and the size of its community META NET a Network of Excellence funded by the European Commission has conducted an analysis of current language resources and technologies This analysis focused on the 23 official European languages as well as other important national and regional languages in Europe The results of this analysis suggest that there are many significant research gaps for each language A more detailed expert analysis and assessment of the current situation will help maximise the impact of additional research and minimize any risks META NET consists of 54 research centres from 33 countries that are working with stakeholders from commercial businesses government agencies industry research organisations software companies technology providers and European universities Together they are creating a common technology vision while developing a strategic research agenda that shows how language technology applications can address any research gaps by 2020
