Questions Of Belief:

Questions of belief Edward Livermore Burlingame,1878 *Questions of Faith* Peter Berger,2015-11-04 Leading religious and cultural commentator Peter Berger explores how and what we can believe in modern times Deals clearly with questions such as Does God exist What was so special about Jesus How can one be Christian in a pluralistic society Structured around key phrases from the Apostles Creed Draws on the Christian theological tradition and the work of other relevant thinkers such as Freud and Simone Weil The author takes the position of an open minded sceptic exploring his own beliefs Questions of Truth John Polkinghorne,Nicholas Beale,2009-01-19 How did the universe begin Can God s existence be proven Do humans matter more than animals For many years people have sent the scientist turned priest John Polkinghorne these and other questions about science and belief In question and answer format Polkinghorne and his collaborator Nicholas Beale offer their highly informed opinions about some of the most frequently asked of these questions Readers can follow their own paths through the book selecting questions that interest them and looking at the additional material if they choose This unique book will help Christians clarify their beliefs regarding difficult issues and better face challenges from within and from others to their faith **50 Simple Questions for Every Christian** Guy P. Harrison,2013-03-19 Written in a respectful and conversational style this unique book is designed to promote constructive dialogue and foster mutual understanding between Christians and non Christians The author a skeptic and journalist asks basic questions about Christian belief What is the born again experience Why would God want to sacrifice his only son for the world Do miracles really happen How reliable is the Bible What is the rapture Why isn t everyone a Christian Each question is followed by commentary and analysis that is skeptical and tough but never argumentative or condescending Christians will find the book useful as a basis for developing their apologetics while skeptics will welcome Harrison s probing rational analysis of religious claims *Questions of Belief* T. E. Burke,1995 This book takes a fresh look at fundamental questions concerning the nature of religious belief the possibilities of justifying such belief and of fruitful communication between different belief systems *Questions of Belief* Aaron Craig Mullerleile,2004 *Poetic Memoirs: A Journey of Questions, Faith, and Trust in God* K L Rich, **Asking Questions** Robert Fiengo,2007-05-03 Asking Questions examines a central phenomenon of language the use of sentences to ask questions Although there is a sizable literature on the syntax and semantics of interrogatives the logic of questions and the speech act of questioning no one has tried to put the syntax and semantics together with the speech acts over the full range of phenomena we pretheoretically think of as asking questions Robert Fiengo not only does this but also takes up some more foundational issues in the theory of language By positioning the findings of contemporary grammatical theorizing within the larger domain of language use Fiengo challenges the use theorist to acknowledge the importance of grammatical form and the grammarian to acknowledge the importance of use In addition to developing an Austinian distinction between four questioning speech acts and a proposal concerning the

philosophy of language Asking Questions contains a useful discussion of the type token distinction and how use of language compares with use of other things Fiengo also considers the nature of multiple questions revealing what one must know to ask them and what speech acts one may perform when asking them Asking Questions advances our understanding of a wide range of issues in a number of important respects Scholars and students of linguistics and philosophy will find plenty to interest them in this pioneering work   Outlook ,1927   The Moral Development of Health Professionals Bertram Bandman,2003-08-30 A central challenge motivates this work How if at all can philosophical ethics help in the moral development of health professionals Bandman s three part response is to argue first that there are justifiable answers to questions in health care ethics To support this idea he singles out a trilogy of related health care rights that are justifiably held by health consumers and for which health providers are responsible These include rights to respect to receive and to refuse treatment These are vital to the principle of informed consent and to patient and provider autonomy Secondly the functioning of these health care rights depends on the ongoing cultivation and habitual practice of relevant virtues such as dedicated and trained intelligence practical wisdom responsibility caring and integrity Thirdly Bandman tries to show how health care ethics makes use of the dynamic interplay between signficant and relevant cases historical and current real and imaginary along with recognition of laws customs conventions and rules together with philosophical theories of morality An underlying theme of this book is the role of conditionals in health care ethics The aim of Bandman s work is to examine conditions and opportunities that promote the moral development of health professionals Moral rights and virtues comprising standards can be taught and learned known understood and accepted These standards comprise justifiable principles for effectively guiding the conduct of health professionals Rights and virtues help differentiate right from wrong decisions in health care ethics and thereby provide an appropriate basis for the moral development of health professionals   **The Outlook** Lyman Abbott,Hamilton Wright Mabie,Ernest Hamlin Abbott,Francis Rufus Bellamy,1927   **The Routledge Handbook of Translation and Religion** Hephzibah Israel,2022-12-19 The Routledge Handbook of Translation and Religion is the first to bring together an extensive interdisciplinary engagement with the multiple ways in which the concepts and practices of translation and religion intersect The book engages a number of scholarly disciplines in conversation with each other including the study of translation and interpreting religion philosophy anthropology history art history and area studies A range of leading and emerging international specialists critically engage with changing understandings of the key categories translation and religion as discursive constructs thus contributing to the development of a new field of academic study translation and religion The 28 contributions divided into six parts analyze how translation constructs ideas texts or objects as sacred or for religious purposes often in competition with what is categorized as non religious The part played by faith communities is treated as integral to analyses of the role of translation and religion It investigates how or why translation functions in re constructing and transforming religion s and for whom and examines a range of sacred texts in
