Liberalism Versus Conservatism François B. Gérard, 2000 Everyone eschews labels yet we all seem to possess them in the minds of legions of politicians marketers and even the ever peering government We are being targeted daily by flaming liberals left wing liberals right wing conservatives compassionate conservatives religious conservatives and liberals pinko liberals middle of the road liberals conservatives and liberals pinko liberals middle of the road liberals and conservatives and of course by neoconservatives and neoliberals The search is on for kindred souls the types who will open their wallets to support whatever it is the hucksters are peddling But what to these concepts mean and do their torchbearers grasp the underlying philosophies or do they care This bibliography lists over hundreds of entries under each category which are then indexed by title an author

Travel and Ethics Corinne Fowler, Charles Forsdick, Ludmilla Kostova, 2013-12-13 Despite the recent increase in scholarly activity regarding travel writing and the accompanying proliferation of publications relating to the form its ethical dimensions have yet to be theorized with sufficient rigour Drawing from the disciplines of anthropology linguistics literary studies and modern languages the contributors in this volume apply themselves to a number of key theoretical questions pertaining to travel writing and ethics ranging from travel as commoditization to encounters with minority languages under threat Taken collectively the essays assess key critical legacies from parallel disciplines to the debate so far such as anthropological theory and postcolonial criticism Also considered and of equal significance are the ethical implications of the form's parallel genres of writing such as ethnography and journalism As some of the contributors argue innovations in these genres have important implications for the act of theorizing travel writing itself and the mode and spirit in which it continues to be conducted In the light of such innovations how might ethical theory maintain its critical edge

Politics of Piety Saba Mahmood, 2012 An analysis of Islamist cultural politics through the ethnography of a thriving grassroots women's piety movement in the mosques of Cairo Egypt Unlike those organized Islamist activities that seek to seize or transform the state this is a moral reform movement whose orthodox practices are commonly viewed as inconsequential to Egypt's political landscape The author's exposition of these practices challenges this assumption by showing how the ethical and the political are linked within the context of such movements

Citizenship Ruth Lister, 1998 To pinpoint the important theoretical issues that they raise Lister recasts traditional thinking about the concept of citizenship exploring its political and policy implications for women in all their diversity Themes of inclusion and exclusion at the national and international level rights and participation inequality and difference are thus brought to the fore in the development of a woman friendly theory and praxis of citizenship

Women's Rights Jurate Motiejunaite, 2005 Women's Rights The Public Private Dichotomy brings together material that assesses the impact that the public private dichotomy has

had on women's rights around the world. It examines the different interpretations of the public and private areas and discusses the difficulties women face in protecting their rights in a world where they have traditionally been restricted to the domestic sphere.

A Critical Theory of Police Power Mark Neocleous, 2021-01-12 The ubiquitous nature and political attraction of the concept of order has to be understood in conjunction with the idea of police. Since its first publication, this book has been one of the most powerful and wide-ranging critiques of the police power. Neocleous argues for an expanded concept of police able to account for the range of institutions through which policing takes place. These institutions are concerned not just with the maintenance and reproduction of order but with its very fabrication, especially the fabrication of a social order founded on wage labour. By situating the police power in relation to both capital and the state and at the heart of the politics of security, the book opens up into an understanding of the ways in which the state administers civil society and fabricates order through law and the ideology of crime. The discretionary violence of the police on the street is thereby connected to the wider administrative powers of the state and the thud of the truncheon to the dull compulsion of economic relations.

Governing Morals Alan Hunt, 1999-08-13 This evocative and broad-ranging book traces the history of moral regulation in Britain and the US from the late seventeenth century to the present day. Specific coverage is given to movements such as the Society for the Reformation of Manners and the Vice Society, the sexual abuse and anti-pornography movements and contemporary self-help movements. Hunt argues that the main impetus for moral regulations often stems from the middle classes rather than those with institutional power, but most significantly, they provide classic instances of the intimate link between the governance of others and the governance of the self. Using the work of Foucault, this book analyses how projects of self-regulation can manifest themselves into the regulation of others. Concurrent with this is the rise of health discourses which play a central role in contemporary discussions of moral governance.

Evidence-Based Health Communication Brown, Brian, Crawford, Paul, Carter, Ronald, 2006-10-01 What is evidence-based health communication and how does it benefit patients? How has communication been taught to health professionals and how might it be improved? How can health care professionals make the most of short encounters in order to maximise their therapeutic effectiveness for clients? This book provides a comprehensive and critical review of the field of health communication and the kinds of evidence that have been collected concerning effective communication. It also critically evaluates the kinds of training health professionals receive in communication skills and examines its relatively limited role in the curriculum. In addition, it sets out what has been discovered about the micro-structure of interaction in health care encounters. The book offers vital new agendas for research, training and practice in health care based upon lessons learned from linguistics, using a wide variety of gathered evidence to identify patterns that will lead to improved health care practices. Moreover, the book focuses upon brief, ordinary and effective communicative activity in addition to the formal consultations that have been studied by researchers in the past. Evidence

Papanagnou, 2011-01-01 Producing scientific knowledge that can inform solutions and guide policy making is one of the most important functions of social science Nonetheless if social science is to become more relevant and influential so as to impact on the drawing and execution of policy certain measures need to be taken to narrow its distance from the policy sphere This decision is less obvious than it seems Both research and experience have proved that policy making is a complex often sub rational interactive process that involves a wide range of actors such as decision makers bureaucrats researchers organized interests citizen and civil society representatives and research brokers In addition social science often needs to defend both its relevance to policy and its own scientific status Moving away from instrumental visions of the link between social research and policy this collective volume aims to highlight the more constructed nature of the use of social knowledge **A**
