Thinking as Communicating Anna Sfard, 2008-01-21 This book is an attempt to change our thinking about thinking Anna Sfard undertakes this task convinced that many long standing seemingly irresolvable quandaries regarding human development originate in ambiguities of the existing discourses on thinking Standing on the shoulders of Vygotsky and Wittgenstein the author defines thinking as a form of communication The disappearance of the time honoured thinking communicating dichotomy is epitomised by Sfard's term commognition which combines communication with cognition The commognitive tenet implies that verbal communication with its distinctive property of recursive self reference may be the primary source of humans unique ability to accumulate the complexity of their action from one generation to another The explanatory power of the commognitive framework and the manner in which it contributes to our understanding of human development is illustrated through commognitive analysis of mathematical

discourse accompanied by vignettes from mathematics classrooms *Theologies of Human Agency* Megan Fullerton Strollo, 2022-12-13 This book examines the relationship between divine in activity and human agency in the five books of the Megilloth the books of Ruth Song of Songs Ecclesiastes Lamentations and Esther As works of literature dating to the early Second Temple period ca 6th 3rd centuries BCE these books and the implicit interpretation of these particular themes reflect the diverse cultural and theological dynamics of the time Megan Fullerton Strollo contends that the themes themselves as well as the correlation between them should be interpreted as implicit theology insofar as they represent reflective interpretation of earlier theological traditions With regard to divine in activity she argues that the Megilloth presents a certain level of skepticism or critical analysis of the Deity From doubt to protest the books of the Megilloth grapple with received traditions of divine providence and present experiences of absence abandonment and distance As a correlative to divine in activity human agency is presented as consequential In addition the portrayal of human agency serves as a theological response insofar as the books advance the theme through specific references to and reevaluations of earlier theocentric traditions **The Human Brain** Miguel Marín-Padilla, 2010-10-21 This book is unique among the current literature in that it systematically documents the prenatal structural development of the human brain It is based on lifelong study using essentially a single staining procedure the classic rapid Golgi procedure which ensures an unusual and desirable uniformity in the observations The book is amply illustrated with 81 large high quality color photomicrographs never previously reproduced These photomicrographs obtained at 6 7 11 15 18 20 25 30 35 and 40 weeks of gestation offer a fascinating insight into the sequential prenatal development of neurons blood vessels and glia in the human brain
