Low Complexity MIMO Receivers Lin Bai, Jinho Choi, Quan Yu, 2014-03-13

Multiple input multiple output MIMO systems can increase the spectral efficiency in wireless communications However the interference becomes the major drawback that leads to high computational complexity at both transmitter and receiver In particular the complexity of MIMO receivers can be prohibitively high As an efficient mathematical tool to devise low complexity approaches that mitigate the interference in MIMO systems lattice reduction LR has been widely studied and employed over the last decade The co authors of this book are world's leading experts on MIMO receivers and here they share the key findings of their research over years They detail a range of key techniques for receiver design as multiple transmitted and received signals are available The authors first introduce the principle of signal detection and the LR in mathematical aspects They then move on to discuss the use of LR in low complexity MIMO receiver design with respect to different aspects including uncoded MIMO detection MIMO iterative receivers receivers in multiuser scenarios and multicell MIMO systems

Bell's Theorem, Quantum Theory and Conceptions of the Universe Menas Kafatos, 2013-03-09

Bell's Theorem and its associated implications for the nature of the physical world remain topics of great interest For this reason many meetings have been recently held on the interpretation of quantum theory and the implications of Bell's Theorem Generally these meetings have been held primarily for quantum physicists and philosophers of science who have been or are actively working on the topic Nevertheless other philosophers of science mathematicians engineers as well as members of the general public have increasingly taken interest in Bell's Theorem and its implications The Fall Workshop held at George Mason University on October 21 and 22 1988 and titled Bell's Theorem Quantum Theory and Conceptions of the Universe was of a more general scope Not only it attracted experts in the field it also covered other topics such as the implications of quantum non locality for the nature of consciousness cosmology the anthropic principle etc topics usually not covered in previous meetings of this kind The meeting was attended by more than one hundred ten specialists and other interested people from all over the world The purpose of the meeting was not to provide a definitive answer to the general questions

raised by Bell's Theorem. It is likely that the debate will go on for quite a long time. Rather, it was meant to contribute to the important dialogue between different disciplines.
