Redefining Security Population Movements And National Security:

Redefining Security David T. Graham, Nana Poku, 1998-10-30 International migration has become a major domestic political issue in many countries and a major topic of international debate. Thus far most of the attention has centered on the plight of refugees or on ways to curb the flow of illegal immigrants. As more and more migrants cross interstate boundaries, however, governments are realizing that immigration and asylum problems cannot be separated from broader socio-economic and political issues nor can they be resolved by countries acting unilaterally. Even with this understanding, attempts to develop multilateral strategies to ease international tensions arising from uncontrolled migration will be complicated by economic disparities, regional political tensions, and mounting population and ecological pressures. Internal migration, particularly in terms of forced resettlement and urbanization, also gives rise to a myriad of problems relating to aspects of security. The increase in other major population movements such as tourism and business travel also has implications for security. Until recently the question what is security was rarely asked in the context of these developments. This was because there was a perceived consensus on what the nature of security was. The nature of security was held to mean national political and military security. Thus security was virtually synonymous with defense. The theoretical claim of this volume is that these developments are necessitating a redefinition of security. This volume provides major theoretical analyses of these trends as well as in-depth case studies that explore specific developments of major concern to scholars and other researchers involved with international relations, migration, and development issues. *Demography and National Security* Myron Weiner, Sharon Stanton Russell, 2001-08 Includes statistics. **Migration, Globalisation and Human Security** David T. Graham, Nana K. Poku, 2005-08-04 Migration, Globalisation and Human Security looks at a range of security and human security issues related to the displacement of civilian populations and shows how the tenuous existence of migrants can lead to a myriad of human security threats. Providing major theoretical analyses of recent migration trends and in-depth case studies, this book shows that a redefinition of the notion of human security is now needed. **Security and Development in Southern Africa** Nana Poku, 2001-04-30 With the end of white-dominated South Africa, many observers have argued for a positive transformation of the whole of Southern Africa based upon market integration and increased cooperation among the states of the region. Poku and the contributors to this collection re-examine this optimistic scenario and they point to the problems of translating good intentions into actual policies. In reality, the economic imbalance between South Africa and its neighbors poses severe problems for the region. Far from finding a stronger ally in regional reconstruction and development, the countries in the region are finding that for many in South Africa, they simply do not matter that much. The analysis points to greater polarization which may imply greater marginalization of the poorer countries in the region. Moreover, a major widening of the gap between the richer South Africa and some or all of the weaker economies may lead to increased tensions and breakdown of regional relations even to a situation detrimental to economic development in the region. A provocative

analysis by some of the leading politico economic thinkers of the region the volume will be of great use to scholars researchers and policy makers involved with Southern African development Non-Traditional Security in Asia Ralf Emmers,2017-03-02 The security issues confronting Asia are both complex and diverse Given the increasing trend towards an expanding security agenda beyond the military dimension of inter state relations this volume provides an extensive study of emerging non traditional challenges to this region New realities and new challenges have come to the fore including environmental degradation illegal immigration infectious diseases transnational crime poverty and underdevelopment Drawing upon the concepts of securitization and de securitization this book brings together regional perspectives from across Asia to examine how these challenges are perceived and managed It is a valuable contribution to both security and Asian studies and will be ideally suited to those interested in security studies international relations and development studies

Geopolitical Traditions David Atkinson,Klaus Dodds,2002-09-26 *Geopolitical Traditions* brings together scholars working in a variety of disciplines and locations in order to explore a hundred years of geopolitical thought **The Future Faces of War** Jennifer Dabbs Sciubba,2010-12-07 This comprehensive and clear volume reveals the numerous ways demographic trends such as age structure composition and migration influence national security Population size structure distribution and composition affect security in numerous ways including national power civil conflict and development *The Future Faces of War* Population and National Security offers a comprehensive overview of how demographic trends can function as components indicators and multipliers of a state s national security Each chapter focuses on a particular demographic trend and describes its national security implications in three realms military regime and structural Illustrating the mechanisms by which demography and security are connected the book pushes the conversation forward by challenging common conceptions about demographic trends and national security Key for policymakers and general readers alike it goes on to suggest ways trends can provide opportunities for building partnerships and strengthening states Focusing on multiple scenarios and the theoretical links between population and security the insights gathered here will remain relevant for years to come *The Securitization of Migration* Philippe Bourbeau,2011-03-23 The international movement of people is provoking worldwide anxiety and apprehension Nation states around the globe especially Western ones are cracking down on migration for security reasons International migration has become a key security issue and is perceived by some as an existential security threat *The Securitization of Migration* is about the movement of people and the system of order underpinning the movement In undertaking a comparative study of Canada and France the study analyzes the process of securitizing migration It explores the process of discursively and institutionally integrating international migration into security frameworks that emphasize policing and defence Drawing upon social theory migration studies and Securitization Theory Philippe Bourbeau seeks to understand the concepts of power underlying security frameworks and how these affect the treatment of migrants and immigrants This book is one of the first to systematically and comparatively examine the role

of political agents media agents and contextual factors in the process of securitizing migration The book will be of interest to students and scholars concerned with comparative and theoretical approaches to security and migration studies **People**

Changing Places Isabelle Côté, Matthew I. Mitchell, Monica Duffy Toft, 2018-07-04 While migration and population settlement have always been an important feature of political life throughout the world the dramatic changes in the pace direction and complexity of contemporary migration flows are undoubtedly unique Despite the economic benefits often associated with global regional and internal migration the arrival of large numbers of migrants can exacerbate tensions and give rise to violent clashes between local populations and recent arrivals This volume takes stock of these trends by canvassing the globe to generate new conceptual empirical and theoretical contributions The analyses ultimately reveal the critical role of the state as both an actor and arena in the migration conflict nexus *8 Billion and Counting* Jennifer D. Sciubba, 2022-03-29 A provocative description of the power of population change to create the conditions for societal transformation As the world nears 8 billion people the countries that have led the global order since World War II are becoming the most aged societies in human history At the same time the world's poorest and least powerful countries are suffocating under an imbalance of population and resources In *8 Billion and Counting* political demographer Jennifer D. Sciubba argues that the story of the twenty first century is less a story about exponential population growth as the previous century was than it is a story about differential growth marked by a stark divide between the world's richest and poorest countries Drawing from decades of research policy experience and teaching Sciubba employs stories and statistics to explain how demographic trends like age structure and ethnic composition are crucial signposts for future violence and peace repression and democracy poverty and prosperity Although we have a diverse global population demographic trends often follow predictable patterns that can help professionals across the corporate nonprofit government and military sectors understand the global strategic environment Through the lenses of national security global health and economics Sciubba demonstrates the pitfalls of taking population numbers at face value and extrapolating from there Instead she argues we must look at the forces in a society that amplify demographic trends and the forces that dilute them particularly political institutions or the rules of the game She shows that the most important skills in demographic analysis are naming and being aware of your preferences rethinking assumptions and asking the right questions Provocative and engrossing *8 Billion and Counting* is required reading for business leaders policy makers and anyone eager to anticipate political economic and social risks and opportunities A deeper understanding of fertility mortality and migration promises to point toward the investments we need to make today to shape the future we want tomorrow
