Redesigning Humans Choosing Our Genes Changing Our Future:

Redesigning Humans Gregory Stock,2003 Writing for the lay reader Stock the director of the Program on Medicine Technology and Society at the School of Public Health at UCLA discusses the science potential impact and many controversies surrounding the development of germline engineering which involves selectively altering human g

Redesigning Humans Gregory Stock,2003 **Planet in Peril** Michael Bess,2022-10-13 Exploration of the top four mega dangers facing humankind and plots a hopeful path to dealing with them through global governance **Planet in Peril Planetary Dangers : Planetary Solutions** Michael D. Bess,2022-10-13 Written by an award winning historian of science and technology Planet in Peril describes the top four mega dangers facing humankind climate change nukes pandemics and artificial intelligence It outlines the solutions that have been tried and analyzes why they have thus far fallen short These four existential dangers present a special kind of challenge that urgently requires planet level responses yet today s international institutions have so far failed to meet this need The book lays out a realistic pathway for gradually modifying the United Nations over the coming century so that it can become more effective at coordinating global solutions to humanity s problems Neither optimistic nor pessimistic but pragmatic and constructive the book explores how to move past ideological polarization and global political fragmentation Unafraid to take intellectual risks Planet in Peril sketches a plausible roadmap toward a safer more democratic future for us all *Naturalism in the Philosophy of Health* Élodie Giroux,2016-04-25 In a series of papers published in the 1970s Christopher Boorse proposed a naturalist theory of health mainly based on a value free concept of biological function a concept of reference class and the notion of statistical normality His theory has profoundly shaped the philosophical debates on the concepts of health and disease It could even be said that the numerous criticisms of his biostatistical theory are at the centre of what is usually referred to as the debate between normativists and naturalists Today the predominant naturalist theory of health is still Boorse s biostatistical theory This volume offers the first comprehensive review and critical assessment of the nature and status of naturalism in the philosophy of health It explores the notion of biological normativity and its relevance for the philosophy of health and it analyses the implications of the philosophical theories of health for healthcare and the debate on health enhancement In the first section several contributions identify the kind of naturalism the biostatistical theory belongs to and offer further criticisms or possible modifications such as the concept of function that is required by this theory and whether a comparativist approach to health is more relevant than a non comparativist one The second section explores natural or biological normativity and some possible accounts of health that could be based on this concept The third and final section focuses on the implications of naturalism in healthcare Goals of Medicine is the first paper in which Christopher Boorse ventured toward analysing the implication of his biostatistical theory of health on the practice of medicine the difficult issue of the goals of medicine and the boundary between treating and enhancing Other papers in this section critically evaluate Boorse s account and analyse the

importance of a positive concept of health *The Transhumanist Reader* Max More, Natasha Vita-More, 2013-03-05 The first authoritative and comprehensive survey of the origins and current state of transhumanist thinking The rapid pace of emerging technologies is playing an increasingly important role in overcoming fundamental human limitations Featuring core writings by seminal thinkers in the speculative possibilities of the posthuman condition essays address key philosophical arguments for and against human enhancement explore the inevitability of life extension and consider possible solutions to the growing issues of social and ethical implications and concerns Edited by the internationally acclaimed founders of the philosophy and social movement of transhumanism The Transhumanist Reader is an indispensable guide to our current state of knowledge of the quest to expand the frontiers of human nature *Everything Conceivable* Liza Mundy, 2008-05-06 Award winning journalist Liza Mundy captures the human narratives as well as the science behind the controversial multibillion dollar fertility industry and examines how this huge social experiment is transforming our most basic relationships and even our destiny as a species Skyrocketing infertility rates and dizzying technological advances are revolutionizing American families and changing the way we think about parenthood childbirth and life itself Using in depth reporting and riveting anecdotal material from doctors families surrogates sperm and egg donors infertile men and women single and gay and lesbian parents and children conceived through technology Mundy explores the impact of assisted reproduction on individuals as well as the ethical issues raised and the potentially vast social consequences The unforgettable personal stories in *Everything Conceivable* run the gamut from joyous to tragic all of them raise questions we dare not ignore *The Ethics of Biotechnology* Jonathan Morris (PhD.), 2006 Discusses the moral and ethical debates engendered by new advances in biotechnology *The Routledge Companion to Biology in Art and Architecture* Charissa Terranova, Meredith Tromble, 2016-08-12 The Routledge Companion to Biology in Art and Architecture collects thirty essays from a transdisciplinary array of experts on biology in art and architecture The book presents a diversity of hybrid art and science thinking revealing how science and culture are interwoven The book situates bioart and bioarchitecture within an expanded field of biology in art architecture and design It proposes an emergent field of biocreativity and outlines its historical and theoretical foundations from the perspective of artists architects designers scientists historians and theoreticians Includes over 150 black and white images **Genetic Engineering** Mark Y. Herring, 2005-12-30 Genetic engineering has quickly become one of the more controversial issues of our time Herring provides a detailed history of the debate in a fair and balanced manner using proponents points of view to make individual cases both pro and con Narrative chapters cover such topics as the Human Genome Project gene splicing cloning genetically altered foods and DNA and crime solving Students and the general public will find a comprehensive survey of the genetic engineering debate Appendices include statements from Robert P George and Peter Singer two of the most prominent scholars on the subject and a bibliography of print and electronic resources for further research
