In this book Mike Ladle and Steve Pitts reveal the inside story on what's going on under the water, answering questions such as: Why do fish bite at the change of light? Where are the largest fish going to be at certain times of the year? What are their favourite foods? Using scientific studies to back up their lifelong experience, Mike and Steve have packed this book with new information on the habits and behaviour of more than 20 species. Theories are put to the test and are illustrated with entertaining descriptions of successful and enlightening fishing trips, bringing the facts to life and showing how they can be turned into practical tactics for all sea anglers to employ. This book will revolutionise your techniques and your catches.
