Reflecting On Nature Readings In Environmental Philosophy:

Reflecting on Nature Lori Gruen, Dale Jamieson, Christopher Schlottmann, 2012-10-18 Reflecting on Nature introduces readers to the fields of environmental philosophy and environmental ethics offering both classic and current readings that focus on key themes images of nature ethics justice animals food climate biodiversity aesthetics and wilderness It helps students to focus on fundamental issues within environmental philosophy and offers succinct readings that explore the central tensions and problems within environmental philosophy

Reflecting on Nature Dale Jamieson, 1994 *The Oxford Handbook of Environmental Ethics* Stephen Mark Gardiner, Allen Thompson, 2017 We live during a crucial period of human history on Earth Anthropogenic environmental changes are occurring on global scales at unprecedented rates Despite a long history of environmental intervention never before has the collective impact of human behaviors threatened all of the major bio systems on the planet Decisions we make today will have significant consequences for the basic conditions of all life into the indefinite future What should we do How should we behave In what ways ought we organize and respond The future of the world as we know it depends on our actions today A cutting edge introduction to environmental ethics in a time of dramatic global environmental change this collection contains forty five newly commissioned articles with contributions from well established experts and emerging voices in the field Chapters are arranged in topical sections social contexts history science economics law and the Anthropocene who or what is of value humanity conscious animals living individuals and wild nature the nature of value truth and goodness practical reasons hermeneutics phenomenology and aesthetics how things ought to matter consequences duty and obligation character traits caring for others and the sacred essential concepts responsibility justice gender rights ecological space risk and precaution citizenship future generations and sustainability key issues pollution population energy food water mass extinction technology and ecosystem management climate change mitigation adaptation diplomacy and geoengineering and social change conflict pragmatism sacrifice and action Each chapter explains the role played by central theories ideas issues and concepts in contemporary environmental ethics and their relevance for the challenges of the future

An Integrated Approach to Environmental Management Dibyendu Sarkar, Rupali Datta, Avinandan Mukherjee, Robyn Hannigan, 2015-11-02 Covers the most recent topics in the field of environmental management and provides a broad focus on the theoretical and methodological underpinnings of environmental management Provides an up to date survey of the field from the perspective of different disciplines Covers the topic of environmental management from multiple perspectives namely natural sciences engineering business social sciences and methods and tools perspectives Combines both academic rigor and practical approach through literature reviews and theories and examples and case studies from diverse geographic areas and policy domains Explores local and global issues of environmental management and analyzes the role of various contributors in the environmental management process Chapter contents are appropriately demonstrated with numerous pictures charts graphs and tables and accompanied by a detailed

reference list for further readings Canadian Issues in Environmental Ethics Wesley Cragg, Allan Greenbaum, Alex Wellington, 1997-06-10 Is it possible to design a forest policy that satisfies ethical and environmental concerns and is acceptable to business labour and First Nations representatives What is the best path through the tangle of ethical issues surrounding the collapse of the east coast fishery What sort of obligations does a rich nation such as Canada have to satisfy the claims of global environmental justice These are the sorts of issues in applied ethics that are tackled in this collection of essays the vast majority of which have been written especially for this volume It is the first Canadian collection of its kind The book is divided in to sections detailing with such topics as the environment and the economy ethical issues relating to non human animals issues of gender and issues relating to native peoples Most of the authors are philosophers though specialists in geography geology and the social sciences are also among the contributors Frequent reference is made to theoretical ethical concerns but the focus throughout is on applied ethics and a variety of case studies are included Examples include essays on animal rights and the case of native hunters surface mining in Northern Ontario the Quebec arctic and fishing communities in the Maritimes Comparisons are frequently drawn to policies and ethical questions arising in other countries most prominently the United States **Ethics of the Global Environment** Robin Attfield, 2015-02-12 This fully updated and expanded textbook looks at issues including climate change sustainable development and biodiversity preservation and sensitively addresses global developments such as the Summits at Durban on climate and at Nagoya on biodiversity **International Environmental Law, Policy, and Ethics** Alexander Gillespie, 2014-08-21 This second edition of International Environmental Law Policy and Ethics revises and expands this groundbreaking study into the question of why the environment is protected in the international arena This question is rarely asked because it is assumed that each member of the international community wants to achieve the same ends However in his innovative study of international environmental ethics Alexander Gillespie explodes this myth He shows how nations like individuals create environmental laws and policies which are continually inviting failure as such laws can often be riddled with inconsistencies and be ultimately contradictory in purpose Specifically he seeks a nexus between the reasons why nations protect the environment how these reasons are reflected in law and policy and what complications arise from these choices This book takes account of the numerous developments in international environmental law and policy that have taken place the publication of the first edition most notably at the 2002 World Summit on Sustainable Development and the 2012 Rio 20 United Nations Conference on Sustainable Development Furthermore it addresses recent debates on the economic value of nature and the problems of the illegal trade in species and toxic waste The cultural context has also been considerably advanced in the areas of both intangible and tangible heritage with increasing attention being given to conservation wildlife management and the notion of protected areas The book investigates the ways in which progress has been made regarding humane trapping and killing of animals and how in contrast the Great Apes initiative and similar work with whales have failed Finally the book addresses the

fact that while the notion of ecosystem management has been embraced by a number of environmental regimes it has thus far failed as an international philosophy

Sustainability David Mollica, 2017-03-02 Sustainability is one of the key concepts underlying our thinking about corporate responsibilities particularly with respect to the environment and inter generational justice but also in relation to corporate governance and the long term economic viability The advantages of the discourse of Sustainability are that it brings together contemporary economic and moral imperatives in the context of scientific knowledge Its disadvantages relate to its open ended content its systematic ambiguity and the internal tensions between economic growth human survival and global justice The essays in this volume reflect these strengths and weaknesses from a variety of viewpoints economic scientific social and philosophical They illustrate and illuminate the varied and contested content and utility of this currently popular concept and point to its multiple implications for the development of corporate responsibilities

Altering Nature B. A. Lustig, B.A. Brody, Gerald P. McKenny, 2008-07-15 B Andrew Lustig Baruch A Brody and Gerald P McKenny Nearly every week the general public is treated to an announcement of another actual or potential breakthrough in biotechnology Headlines trumpet advances in assisted reproduction current or prospective experiments in cloning and developments in regenerative medicine stem cell technologies and tissue engineering Scientific and popular accounts explore the perils and the possibilities of enhancing human capacities by computer based biomolecular or mechanical means through advances in artificial intelligence genetics and nanotechnology Reports abound concerning ever more sophisticated genetic techniques being introduced into ag culture and animal husbandry as well as efforts to enhance and protect biodiversity Given the pace of such developments many insightful commentators have proclaimed the 21st century as the biotechnology century Despite a significant literature on the morality of these particular advances in biotechnology deeper ethical analysis has often been lacking Our preliminary review of that literature suggested that current discussions of normative issues in biotechnology have suffered from two major deficiencies First the discussions have been too often piecemeal in character limited to after the fact analyses of particular issues that provoked the debate and unconnected to larger concepts and themes Second a crucial missing element of those discussions has been the failure to reflect explicitly on the diverse disciplinary conceptions of nature and the natural that shape moral judgments about the legitimacy of specific forms of research and their applications

Language, Mind, and Art D. Jamieson, 2013-03-09 This book is a collection of essays in honor of Paul Ziff written by his colleagues students and friends Many of the authors address topics that Ziff has discussed in his writings understanding rules and regularities proper names the feelings of machines expression and aesthetic experience Paul Ziff began his professional career as an artist went on to study painting with J M Hanson at Cornell and then studied for the Ph D in philosophy also at Cornell with Max Black Over the next three decades he produced a series of remarkable papers in philosophy of art culminating in 1984 with the publication of *Antiaesthetics* An Appreciation of the Cow with the Subtle Nose In 1960 he published *Semantic Analysis* his masterwork in philosophy of lan

guage Throughout his career he made important contributions to philosophy of mind in such papers as *The Simplicity of Other Minds* 1965 and *About Behaviourism* 1958 In addition to his work in these areas his lectures at Harvard on philosophy of religion are an underground classic and throughout his career he has continued to make art and to search for the meaning of life in the properties of prime numbers Although his interests are wide and deep questions about language art and mind have dominated his philosophical work and it is problems in these areas that provide the topics of most of the essays in this volume
