Palmer,2006 This book presents 25 state of the art papers on the conceptual foundations and issues surrounding Non financial or Notional Defined Contribution NDC country implementation of NDC Italy Latvia Poland and Sweden and case studies for countries where NDC is figured in the reform debate This book is intended to be a handbook for academics and policy makers who want to become informed about what NDC is and to learn about the pros and cons of this attractive reform proposal Informality and the Challenge of Pension Adequacy: Outlook and Reform Options for Peru Christoph Freudenberg,Mr.Frederik G Toscani,2019-07-11 Past reforms have put the Peruvian pension system on a largely fiscally sustainable path but the system faces important challenges in providing adequate pension levels for a large share of the population Using administrative microdata at the affiliate level we project replacement rates in the defined benefit DB

and defined contribution DC pillars over the next 30 years and simulate the impact of various reform scenarios on the average level and distribution of pensions In the DB pillar the regressive minimum contribution period should be re thought while in the DC pillar a broadening of the contribution base and or an increase in contribution rates would help increase replacement rates relative to the baseline forecast of 25 33 percent A higher net real rate of return than assumed in the baseline would also have a significant positive impact In the medium term labor market reform to tackle informality and a broad pension reform to restructure the system and avoid competition between the DB and DC pillars should be a priority Given low pension coverage having a strong non contributory pillar will remain important for the foreseeable future

Working Beyond 60 G. Reday-Mulvey, 2005-02-21 While the question to why work beyond sixty has now become obvious the how and for whom questions are the real topic of this new study by one of the best European specialists in the area Work after sixty if it is to be feasible and widespread has to be on a part time basis to meet the wishes and needs of workers and companies This book provides an in depth analysis of the growing importance of work beyond sixty and a comparative discussion of new policies in several EU Member States as well as of company practice **Pension Reforms in Central, Eastern, and Southeastern Europe** Igor Guardiancich, 2013 This book traces and analyzes the legislation and implementation of pension reforms in four Central Eastern and Southeastern European countries Croatia Hungary Poland and Slovenia By comparing the political economy of their policymaking processes it seeks to pinpoint regularities between institutional settings actor constellations decision making strategies and reform Guardiancich employs a historical institutionalist framework to analyze the policies actors and institutions that characterized the period between the collapse of socialism and the global financial crisis of 2008 2011 He argues that viable pension reforms should not be seen simply as an event but rather as a continuing process that must be fiscally socially and politically sustainable In particular the primary goal of a pension scheme is to reduce poverty provide adequate retirement income and insure against the risks of old age within given fiscal constraints and this will happen only if the scheme enjoys continuing political support at all levels To this end the author individuates those institutional characteristics of countries that increase the consistency of reforms and lower the likelihood of policy reversals in time Pension Reforms in Central Eastern and Southeastern Europe will be of interest to students and scholars of political science political economy social policy and economics
