Reforming Urban Land Policies And Institutions In Developing Countries:

Reforming Urban Land Policies and Institutions in Developing Countries Catherine Farvacque, Patrick McAuslan, 1992 This paper attempts to define and assess the various institutional and mechanical elements which constitute a land management system and which have a significant impact on the functioning of land markets The assumption of this report is that the accumulation over time of different institutions and instruments which have reflected different priorities and policies has inhibited the efficient and equitable operation of land markets and that reforms of institutions and policies are now urgently needed Adapt du r sum des auteurs

Reforming Urban Land Policies and Institutions in Developing Countries Catherine Farvacque Vitovic, Patrick McAuslan, Banco Mundial, 1992 **1991**, 1992 **Thirty Years of World Bank Shelter Lending** Robert M. Buckley, Jerry Kalarickal, 2006-01-01 As England's Industrial Revolution started the process of urbanization that has since characterized development throughout the world a poet worried about the dark satanic mills that were such a fundamental part of this revolution However despite his misgivings he also suggested that it was necessary for societies to arm themselves with chariots of fire and other weapons so that they could master this process In a somewhat more prosaic poetic vein World Bank President Robert McNamara launched the bank's shelter assistance programs saying that If cities do not begin to deal more constructively with poverty poverty may begin to deal more destructively with cities These concerns would appear to have even more resonance today as the population of cities in developing countries increasing by unprecedented levels of more than 1 billion people per year for the next 15 years This magnitude suggests the scale of the increase in the investment in shelter needed to meet the needs of this growing population The Challenge of Slums United Nations Human Settlements Programme, 2012-05-23 The Challenge of Slums presents the first global assessment of slums emphasizing their problems and prospects Using a newly formulated operational definition of slums it presents estimates of the number of urban slum dwellers and examines the factors at all level from local to global that underlie the formation of slums as well as their social spatial and economic characteristics and dynamics It goes on to evaluate the principal policy responses to the slum challenge of the last few decades From this assessment the immensity of the challenges that slums pose is clear Almost 1 billion people live in slums the majority in the developing world where over 40 per cent of the urban population are slum dwellers The number is growing and will continue to increase unless there is serious and concerted action by municipal authorities governments civil society and the international community This report points the way forward and identifies the most promising approaches to achieving the United Nations Millennium Declaration targets for improving the lives of slum dwellers by scaling up participatory slum upgrading and poverty reduction programmes The Global Report on Human Settlements is the most authoritative and up to date assessment of conditions and trends in the world's cities Written in clear language and supported by informative graphics case studies and extensive statistical data it will be an essential tool and reference for researchers academics

planners public authorities and civil society organizations around the world **Urban Development and Planning** Bikram Pattanaik, 2025-03-20 This book details the most contemporary concerns related to urban development governance and planning as well as the challenges to urban administration It analyses the policies and programmes adopted by both high income and lower middle income countries to achieve sustainable urbanization and their application and treatment to help students get a holistic practical perspective of the issues at hand This volume elucidates urban development theories and approaches coupled with urban planning local government finance urban management and urban governance It also discusses urban issues and challenges such as education health waste management land use planning housing and transport Critical concerns related to urban water bodies open spaces urban heritage and smart cities and urban future are similarly addressed This book will be useful to students researchers and teachers of urban planning and architecture urban sociology economics geography environmental science and public administration It shall also be useful to NGOs parastatal bodies and trainers of urban planning and development Planners policymakers functionaries and elected representatives of urban local bodies may also use this book as a capacity building instrument Urban Geography Michael Pacione, 2005 Providing an authoritative and stimulating global introduction to the study of towns and cities this updated second edition has been extensively revised to reflect feedback from readers and to incorporate the latest research and developments *Rapid Urban Environmental Assessment: Methodology and preliminary findings* Josef Leitmann, 1994 Urban Management Program Series Paper 14 A recent evaluation of urban research in developing countries noted that scant data are available on the urban environment as little research has been done on the topic This first volume in a two volume set describes the development of a three step evaluation process whereby data are collected and analyzed to support the involvement of stakeholders suggests future directions and improvements and summarizes results from use of the approach in selected cities The second of a two volume set see below contains tools that practitioners and researchers can apply directly in the field See also Volume 2 ISBN 0 8213 2791 7 Stock No 12791 Financing Africa's Cities Thierry Paulais, 2012-07-05 This volume addresses the issues of financing urban growth of the African continent which has the highest urban growth rate on the planet in the next decades Considerable investment will be needed to sustain this level of growth and to clear up accumulated backlogs At the same time decentralization has resulted in increased responsibilities for local government but in most cases institutional reforms were carried out without the transfer of a sufficient level of resources and local capacities in governance and project management are weak Which mechanisms will finance these extensive needs and how will African local governments meet these needs Specifics on how to finance African cities have not been studied The actual scale of this market has not been fully grasped A systemic approach to this market is difficult because of its diversity country size institutional context characteristics of urban network availability of capital market currency etc and a lack of data Donors assistance methods in the sector are disparate marked by disputes between different schools of thought special purpose

vehicles created by donors operate according to a variety of methods and with wide ranging and sparsely disseminated results What is the best way to transform these systems often antiquated in many respects into modern financing systems that facilitate access to domestic markets mobilize local savings and reinforce local government autonomy There is no single answer to this question in regard to such a variety of institutional and economic contexts The main objective of the study is to clarify the debates and to enlighten the choices of African decision makers at local and national level

Land Issues for Urban Governance in Sub-Saharan Africa Robert Home, 2020-11-11 Sub Saharan Africa faces many development challenges such as its size and diversity rapid urban population growth history of colonial exploitation fragile states and conflicts over land and natural resources This collection contributed from different academic disciplines and professions seeks to support the UN Habitat New Urban Agenda passed at Habitat III in Quito Ecuador in 2016 It will attract readers from urban specialisms in law geography and other social sciences and from professionals and policy makers concerned with land use planning surveying and governance Among the topics addressed by the book are challenges to governance institutions how international development is delivered building land management capacity funding for urban infrastructure land based finance ineffective planning regulation and the role of alternatives to courts in resolving boundary and other land disputes Issues of rights and land titling are explored from perspectives of human rights law the right to development and women s rights of access to land and land tenure regularization Particular challenges of housing planning and informality are addressed through contributions on international real estate investment community participation in urban settlement upgrading housing delivery as a partly failing project to remedy apartheid s legacy and complex interactions between political power money and land Infrastructure challenges are approached in studies of food security and food systems urban resilience against natural and man made disasters and informal public transport
