A History of Twentieth-century African

Literatures Oyekan Owomoyela, 1993-01-01. African literatures says volume editor Oyekan Owomoyela testify to the great and continuing impact of the colonizing project on the African universe. African writers must struggle constantly to define for themselves and others just what Africa is and who they are in a continent constructed as a geographic and cultural entity largely by Europeans. This study reflects the legacy of colonialism by devoting nine of its thirteen chapters to literature in Europhone languages: English, French, and Portuguese. Foremost among the Anglophone writers discussed are Nigerians Amos Tutuola, Chinua Achebe, and Wole Soyinka. Writers from East Africa are also represented, as are those from South Africa. Contributors for this section include Jonathan A. Peters, Arlene A. Elder, John F. Povey, Thomas Knipp, and J. Ndukaku Amankwulor. In African Francophone literature, we see both writers inspired by the French assimilationist system and those influenced by Négritude, the African culture affirmation movement. Contributors here include Servanne Woodward, Edris Makward, and Alain Ricard. African literature in Portuguese, reflecting the nature of one of the most oppressive colonizing projects in Africa, is treated by Russell G. Hamilton. Robert Cancel discusses African language literatures, while Oyekan Owomoyela treats the question of the language of African literatures. Carole Boyce Davies and Elaine Savory Fido focus on the special problems of African women writers, while Hans M. Zell deals with the broader issues of publishing, censorship, resources, and organization.

Catalog of Copyright Entries. Library of Congress. Copyright Office, 1910. *Catalog of Copyright Entries*, 1910. *The Algerian War in French-Language Comics*. Jennifer Howell, 2015-10-08. The decolonization of Algeria represents a turning point in world history, marking the end of France's colonial empire, the birth of the Algerian republic, and the appearance of the Third World and pan-Arabism. Algeria emerged from colonial domination to negotiate the release of American hostages in Iran during the Carter administration. Radical Islam would later rise from the ashes of Algeria's failed democracy, leading to a civil war and the training of Algerian terrorists in Afghanistan. Moreover, the decolonization of Algeria offered an imperfect model of decolonization to other nations like South Africa, that succeeded in abolishing apartheid while retaining its white settler population. Algeria and its war of national liberation therefore constitute an inescapable reference for those looking to

understand today's war on terror and ever expanding islamophobia in Western media circuits. Consequently it is imperative that students and educators understand the global implications of the Algerian War and how to best approach this conflict in school and at home so as to learn from the consequences of misrepresentation at all levels of the memory transmission chain. These objectives are all the more important today given the West's misunderstanding and mischaracterization of Islam, the Arab Spring, the Muslim majority world and most importantly the continuing influence of French colonialism especially in the postcolonial era. Conceived as a case study, *The Algerian War in French Language Comics: Postcolonial Memory, History and Subjectivity* argues that comics provide an alternative to textbook representations of the Algerian War in France because they draw from many of the same source materials yet produce narratives that are significantly different. This book demonstrates that although comics rely on conventional vectors of memory transmission like national education, the family and mainstream media, they can also create new and productive dialogues using these same vectors in ways unavailable to traditional textbooks. From this perspective, these comics are an effective and alternative way to develop a more inclusive social consciousness.

Contemporary Postcolonial Theory Padmini Mongia, 2021-01-07. There is a crisis in contemporary postcolonial theory while an enormous body of challenging research has been produced under its auspices, severely critical questions about the validity and usefulness of this theory have also been raised. This Reader is positioned at the juncture where it can address these contestations. It makes available some of the classics of the field, engages with the issues raised by contemporary practitioners but also offers several of the arguments that strongly critique postcolonial theory. Although postcolonial theory purports to be interdisciplinary and frequently anti-foundationalist, traces of disciplinary formations and linearity have continued to haunt its articulations. This Reader, on the other hand, offers a uniquely interdisciplinary mapping. It is concerned with three main areas: definitional problems and contests including the current challenges to postcolonial theory; the disciplining of knowledge where the multiple resonances of the word disciplining are all engaged; and the location of practice where the relations between intellectual practice and historical conditions are explored. Finally, since the guiding principle of this Reader is simultaneous attention to the enabling and constraining mechanisms of historical realities and institutional practices, the commentary problematizes the writing of histories, the formations of canons and indeed the production of Readers.
