## **Long March Of French Universities:**

The Long March of French Universities Christine Musselin, 2013-02-01 The main point of this book is to argue that French universities experienced a guiet but important change during the last decade which allowed them to become pertinent and more autonomous actors within the French university system The Long March of French Universities Christine Musselin.2004 The University under Pressure Elizabeth Popp Berman, Catherine Paradeise, 2016-02-26 Universities are under pressure Their resource environment is evolving demands for accountability have increased and demographic shifts are changing higher educational needs. This volume provides a cross national picture of how the university as an organization is reacting to adapting to and threatened by a period of intense pressure Integration and the Governance of Higher Education and Research Alberto Amaral, Guy Neave, Christine Musselin, Peter Maassen, 2009-10-03 The high level Douro seminars are now a well established tradition in the annual activities promoted by Hedda a European consortium of nine centres and ins tutes devoted to research on higher education and CIPES its Portuguese associated centre At the seminars each member of a small group of invited researchers presents and discusses an original research based paper that is revised afterwards taking into account the comments of the participating colleagues The revised papers form the basis for the annual thematic book published by Springer in the book series called Higher Education Dynamics HEDY Paying tribute to the regularity of the seminars it was decided that the volumes originating from the initiative would be collected in a series in the series called the Douro Series Previous seminars were dedicated to in depth analyses of different aspects of higher education systems and institutions including institutional governance the emergence of managerialism markets as instruments of public policy cost sharing and accessibility of students to higher education and developments in quality assurance The present volume aims at analysing the change process which the European university is undergoing as a consequence of European integration efforts In the case of higher education these have materialised amongst other things in the plementation of the Bologna process while the Lisbon summit also has important consequences for the university In March 2000 the Lisbon European Council set the goal for the EU to become the most competitive and dynamic knowledge based society in the world by 2010 The Market for Academics Christine Musselin, 2009-12-04 This book addresses academic labor markets in three countries France Germany and the United States The management of faculty careers is a critical issue in university autonomy and in many countries recent reforms have increasingly addressed this area Musselin's exhaustive empirical research on academic job hiring practices and faculty career patterns included over 200 interviews with faculty members and administrators concerning two disciplines history and math Each of the countries has very different historical traditions with regard to how peers recruit their colleagues within the academy Using what is known as an economics of quality comparative approach she sheds new light on faculty worklife The author's focus on the criteria of evaluation in academic hiring decisions is a unique contribution and one that

mounted for a modernisation of governance structures One aspect of modernisation particularly important in many European systems and in Japan has been the decision by governments to give institutions greater autonomy more control over their budgets and legal responsibility for the employment of their staff International trends to introduce greater competition between institutions to encourage greater institutional differentiation and give greater play to market forces has led to an emphasis on leadership a more systematic involvement of external stakeholders and a more corporate style of governance At the same time this has often led to a sense of loss of collegiality a redistribution of authority and a growing gap between the centre and the periphery within universities This book analyses governance change in nine major higher education systems Australia Finland France Germany Italy Japan Norway the UK and the USA each account being the result of independent research by a leading authority in the field and describes how a convergence of governance structures has been mediated by the historical cultural political and social characteristics of the different systems Michael Shattock is a leading authority on university governance this study offers the most up to date account of governance reform in a range of higher education systems an analysis of the common trends and an assessment of their impact on the idea of a university It will be essential The Cambridge Handbook of Comparative reading for academics postgraduates and practitioners in higher education **Law** Mathias Siems, Po Jen Yap, 2024-02-01 Comparative law is a common subject matter of research and teaching in many universities around the world and the twenty first century has aptly been termed the era of comparative law This Cambridge Handbook of Comparative Law presents a truly global perspective of comparative law today The contributors are drawn from all parts of the world to provide different perspectives on how we understand the law and how it operates in practice In substance the Handbook contains 36 chapters covering a broad range of topics divided under the following headings Methods of Comparative Law Part I Legal Families and Geographical Comparisons Part II Central Themes in Comparative Law Part III and Comparative Law beyond the State Part IV By the Power Vested in Me Michael Stambolis-Ruhstorfer, 2025-06-03 In both the United States and France each side of the legal battle over same sex marriage and parenthood relied heavily on experts Despite the similarity of issues however lawmakers in each country turned to different sets of authorities from economists and psychoanalysts to priests and ordinary people They even prized different types of expertise empirical research in the United States versus abstract theory in France Exploring the legalization of same sex marriage in the United States and France this book sheds new light on the power of experts to influence high stakes democratic debates Drawing on extensive interviews and ethnographic observation Michael Stambolis Ruhstorfer traces the divergences between the two countries showing why some experts are ubiquitous in one but absent in the other He argues that lawmakers judges lawyers journalists and activists covet something only experts can provide the credibility and aura of authority or expert capital which they deploy to advance their agendas Expert capital is not derived from scientific or technical merit alone but is produced through cultural norms material resources and social relationships which vary greatly

across national contexts Through the story of the fight over gay rights By the Power Vested in Me reveals how and why certain experts but not others obtain the authority to shape public opinion and policy At a time of soaring public distrust in experts this book offers new ways to understand the contested political role of expertise and its consequences 21st Century Knowledge Complexes Julie Tian Miao, Paul Benneworth, Nicholas A.
