Economic Reforms, Growth and Inequality in Latin America Gustavo Indart,2019-06-04 Originally published in 2004 Growth income distribution and labour markets are issues of pivotal importance in the Latin American context Examining unique theoretical issues and the empirical evidence this book provides a critical analysis of the key elements of income distribution determinants labour market functions trade policies and their interrelations As the advance of globalization becomes seemingly unstoppable this book provides an important reappraisal of the impact of this new phenomenon and in particular the pernicious impact it may have on income growth and distribution The key objective of the volume is to integrate more fully the analysis of trade and labour market economists in order to better understand the labour market and income distribution implications of globalization and international integration Forty years after the early calls to appropriately investigate the micro foundations of macroeconomics the separation of the two at the policy level is more damaging than ever before particularly for developing regions this volume therefore makes an important contribution at the theoretical and policy levels by bringing together macroeconomic and microeconomic analyses **Foreign Debt and Latin American Economic Development** Antonio Jorge,Jorge Salazar-Carillo,Rene P. Higonnet,2014-05-17 Foreign Debt and Latin American Economic Development focuses on the constructive discussion of views held by investigators and experts on the dynamic interaction between economic growth and external debt in Latin America The selection first offers information on a background paper on the external debt and development in Latin America and a perspective on the external debt of Latin America The text then elaborates on external financing and debt of the Latin American countries and Latin American external debt and economic growth Topics include debt rescheduling external debt and development and flow of external

financial resources The manuscript takes a look at the economic growth and external debt of Jamaica and Commonwealth Caribbean Discussions focus on external debt and economic growth trends in external debt structure and functioning of the Jamaican economy and debt policy in the 1970 s and 1980 s The book also ponders on the external debt and economic growth of Mexico external debt situation of Haiti Venezuela s foreign public debt and foreign debt and economic development of Costa Rica The selection is a dependable source of data for readers interested in the interaction between economic progress and external debt in Latin America

Re-Envisioning Global Development Sandra Halperin, 2013-04-17 Re Envisioning Global Development offers an original conceptualisation of capitalist development from its origins to the present day Most approaches to understanding contemporary development assume that industrial capitalism was achieved through a process of nationally organised economic growth and that in recent years its organisation has become increasingly trans local or global However Halperin shows that nationally organised economic growth has rarely been the case it has only recently come to characterise a few countries and for only a few decades This innovative text elaborates an alternative ontology and way of thinking about global development during the last two centuries one linked not to nations and regions but to a set of essentially trans national relations and connections It argues that capitalist development has everywhere and from the start involved not whole nations or societies but only sectors or geographical areas within states By bringing this aspect of historically normal capitalist development into clearer focus the book clarifies the specific conditions and circumstances that enabled European economies to pursue a more broad based development following World War II and what prevented a similar outcome in the contemporary third world It also clarifies the nature spatial extent and circumstances of current globalising trends Wide ranging and provocative this book is required reading for advanced level students and scholars in development studies development economics and political science
