Lost in Space Jon Schiller, 2009 The US Space Shuttle delivering supplies to the US Space Station has a mechanical breakdown that prevents its return to the Earth The remaining two US Space Shuttles are launched as quickly as possible to carry the needed supplies to the Space Station before the people there run out of expendables air

water etc Both aging Shuttles suffer breakdowns one explodes on the launch pad and the other has a breakdown in orbit near the Space Station This second Shuttle is close enough to the Space Station to be secured by a cable and then winched up to the Space Station docking gate The hero Dr Donald Richards devises two options for rescuing the stranded astronauts use the new European Space Station Shuttle or use the Soviet Space Shuttle The US President over rules NASA's recommendation to use the Soviet Space Shuttle for the rescue so Richards negotiates an agreement with the European Space Agency to use their Shuttle to rescue the astronauts *Irwin Allen Television Productions, 1964-1970* Jon Abbott, 2015-06-14 Before establishing himself as the master of disaster with the 1970s films *The Poseidon Adventure* and *The Towering Inferno* Irwin Allen created four of television's most exciting and enduring science fiction series *Voyage to the Bottom of the Sea* *Lost in Space* *The Time Tunnel* and *Land of the Giants* These 1960s series were full of Allen's favorite tricks techniques and characteristic touches and influenced other productions from the original *Star Trek* forward Every science fiction show owes something to Allen yet none has equaled his series pace excitement or originality This detailed examination and documentation of the premise and origin of the four shows offers an objective evaluation of every episode and demonstrates that when Irwin Allen's television episodes were good they were great and when they were bad they were still terrific fun *Science Fiction Film Directors, 1895-1998* Dennis Fischer, 2011-12-14 This enormous and exhaustive reference book has entries on every major and minor director of science fiction films from the inception of cinema circa 1895 through 1998 For each director there is a complete filmography including television work a career summary a critical assessment and behind the scenes production information Seventy nine directors are covered in especially lengthy entries and a short history of the science fiction film genre is also included **The Physics and Astronomy of Science Fiction** Steven D. Bloom, 2016-07-13 The great scientific astronomical and technological advances of the 20th century inspired the science fiction genre to imagine distant worlds and futures far beyond the discoveries of the here and now This book explores science fiction films television series novels and short stories from *Lost in Space* 1965 1968 to *Fringe* 2008 2013 to the works of Isaac Asimov and Stephen Baxter with a focus on their underlying concepts of physics and astronomy Assessing accuracy and plausibility the author considers the possibilities of solar system interstellar and faster than light travel intelligent planets dark anti matter the multiverse and string theory time travel alternate universes teleportation and replication weaponry force fields extraterrestrial life subatomic life emotional robots super human and parapsychological powers asteroid impacts space colonies and many other topics [Focus On: 100 Most Popular Television Series by 20th Century Fox Television](#) Wikipedia contributors, **Walter M. Miller, Jr.** William H. Roberson, 2014-01-10 Walter M Miller Jr was one of the twentieth century's leading science fiction writers a two time Hugo Award winner and author of the classic novels *A Canticle for Leibowitz* and *Saint Leibowitz* and the *Wild Horse Woman* This comprehensive literary guide provides more than 1 500 alphabetically arranged entries on Miller's life and body of work It includes summaries of his two novels and all of

his shorter works character descriptions explanations of the literary cultural historical and religious allusions found in the works as well as translations of all foreign words and phrases This guide is meant to inform both scholarly and popular readings of Miller s work

A History of the Kennedy Space Center Kenneth Lipartito, Orville R Butler, 2007-08-12 This first comprehensive history of the Kennedy Space Center NASA's famous launch facility located at Cape Canaveral Florida reveals the vital but largely unknown work that takes place before the rocket is lit Though the famous Vehicle Assembly Building and launch pads dominate the flat Florida landscape at Cape Canaveral and attract 1.5 million people each year to its visitor complex few members of the public are privy to what goes on there beyond the final outcome of the flaring rocket as it lifts into space With unprecedented access to a wide variety of sources including the KSC archives other NASA centers the National Archives and individual and group interviews and collections Lipartito and Butler explore how the methods and technology for preparing testing and launching spacecraft have evolved over the last 45 years Their story includes the Mercury and Gemini missions the Apollo lunar program the Space Shuttle scientific missions and robotic spacecraft and the International Space Station as well as the tragic accidents of Challenger and Columbia Throughout the authors reveal the unique culture of the people who work at KSC and make Kennedy distinct from other parts of NASA As Lipartito and Butler show big NASA projects notably the Space Shuttle and the International Space Station had much to learn on the ground before they made it to space Long before a spacecraft started its ascent crucial work had been done work that combined the muscular and mundane with the high tech and applied the vital skills and knowledge of the men and women of KSC to the design of vehicles and missions The authors challenge notions that successful innovation was simply the result of good design alone and argue that with large technical systems real world experience actually made the difference between bold projects that failed and innovations that stayed within budget and produced consistent results The authors pay particular attention to operational knowledge developed by KSC the insights that came from using and

operating complex technology This work makes it abundantly clear that the processes performed by ground operations are absolutely vital to success
