Methods of Regional Analysis: an Introduction to Regional Science in Ass. with David F. Bramhall C.o Walter Isard, 1966 **Methods of Interregional and Regional Analysis** Walter Isard, Iwan J. Azis, Matthew P. Drennan, Ronald E. Miller, Sidney Saltzman, Erik Thorbecke, 2017-07-05 This landmark textbook introduces students to the principles of regional science and focuses on the key methods used in regional analysis including regional and interregional input output analysis econometrics regional and spatial programming and industrial and urban complex analysis gravity and spatial interaction models SAM and social accounting welfare analysis and applied general interregional equilibrium models The coherent development of the materials contained in the set of chapters provides students with a comprehensive background and understanding of how to investigate key regional problems For the research scholar this publication constitutes an up to date source book of the basic elements of each major regional science technique More significant it points to new directions for future research and ways interregional and regional analytic approaches can be fused to realise much more probing attacks on regional and spatial problems a contribution far beyond what is available in the literature **Spatial and Regional**

Analysis Methods in Forestry Economics Alex Obiya, Daniel E. Chappelle, Con H. Schallau, 1986 Regional Science Matters Peter Nijkamp, Adam Rose, Karima Kourtit, 2014-11-20 This volume is a collection of fresh and novel contributions to regional science They commemorate the scientific inheritance of the founding father of regional science the late Walter Isard All papers are written by well known scholars in the field and serve to highlight the great importance of regional science theory and methodology for a better understanding of current spatial and environmental problems throughout our planet The book showcases a multidisciplinary panorama of modern regional science research and presents new insights by applying regional science approaches **History of Regional Science and the Regional Science Association International**

Walter Isard, 2012-12-06 It is difficult if not impossible to establish the point of time at which a new field of study starts to emerge While the date of formal organization of a society associated with the field can be precisely stated such timing says little about when and where the seeds for a field's development were planted Also such timing says little about the essential why for the development of a field and provides little understanding of the path that it traced It is clear that the emergence of the field of regional science like many other fields was dependent on a particular setting as well as the pattern of events

and interaction of diverse personalities who became involved As best I can I shall attempt in this Part I of the History to unravel the where when and why questions in the development of Regional Science and the Regional Science Association International Further in the last section of this essay I shall briefly point up some potentialities for analytical advances in the field of regional science Also I shall note the opportunity for leadership by regional scientists in attacking global and regional development problems thereby to help formulate relevant policy In this way I hope to expose the potential for fruitful research by young scholars interested in entering the field

A Broad View of Regional Science Soushi Suzuki, Roberto Patuelli, 2021-01-19 This book celebrates the life and work of Peter Nijkamp whose research provides a strong focus on regional science His work follows a rigorous comprehensive approach centred around analytical modelling and methodological innovation This edited volume like Prof Nijkamp s research covers a wide range of topics in regional science analysed through multi criteria evaluation evaluation modelling econometrics and simulations among other methods These tools are applied to the analysis of society and culture tourism and information cities environment and sustainability Professor Nijkamp is one of the founders and the past president of the Regional Science Association International His work forms a valuable reference for researchers scholars policymakers and students in the field of regional science and other disciplines This volume timed to coincide with his 75th birthday celebrates Prof Nijkamp s great contributions to regional science He also promoted and participated in the education and development of young researchers not only in regional science but also in other fields supervising many Ph D students and hosting even more as guests in Amsterdam Contributors to this volume include Prof Nijkamp s former doctoral students and guest researchers as well as associates and colleagues

Practices in Regional Science and Sustainable Regional Development R. B. Singh, Soumendu Chatterjee, Mukunda Mishra, Andrews José de Lucena, 2021-07-12 This book brings together the emerging trends and techniques incorporated in regional science during the first two decades of this millennium The book includes systematic and analytical notes making scientific commentary on the innovative methods of regional development measurement of the development regional development models and policy measures that have significant implications and wide applicability instrumental for India as well as the other global south countries There is clear evidence in the global south of the uneven spatial distribution of resources economic activities literacy and health conditions The most striking fact is the coexistence of development and underdevelopment that makes the planning process complicated This can hardly be explored without taking a deep insight into the matter of how the regional parameters are impacting regional society or economy to shape the development of that region There can be no effective global policy framework that will be effective equally for each and every region to mitigate local issues of society or economy It is here that the book integrates the efforts of practitioners working towards addressing these regional issues and striving for sustainable regional development through their innovative ideas Through its contributions the book addresses development issues regional impact of climate change social justice migration well being

livelihood vulnerabilities and regional urban environmental issues from the standpoint of regional science It is a significant resource for researchers of spatial science and policy makers **Miscellaneous Publication** ,1970 *Dictionary of Ecological Economics* Brent M. Haddad,Barry D. Solomon,2023-02-14 This comprehensive Dictionary brings together an extensive range of definitive terms in ecological economics Assembling contributions from distinguished scholars it provides an intellectual map to this evolving subject ranging from the practical to the philosophical **Regional economic structure and environmental pollution** B.E.M.G. Coupé,2012-12-06 Environmental problems as far as they raise economic questions even conflicting with pre ecology economics can be tackled in different ways The way chosen by Bernard Coupe was not the French voie royale a Louis XIV equivalent of a speedway but the narrow path consisting in carefully implementing a simple but valid model This model is amenable to many extensions but it reveals the core of some economic ecological problems the search for acceptable solutions when one is confronted with a set of rather narrow constraints A not uninteresting finding is that full employment solutions do seem to exist though leading to different uses of the product made available How such solutions are to be politically implemented is then a further stage of the reasoning not taken up in this book We spent Bernard and I many a well filled hour in discussing the technicalities of the exercise the consumption and investment functions with their estimation problems the treatment of the transportation sector problems in geometric programming et de quibusdam aliis Especially when prefacing the final product one is particularly pleased to be able to evoke the times past but well spent Bernard Coupe will certainly in the course of his development work in Africa use the spirit and techniques of this approach We can expect in the future some good reporting on this facet of his work too

Growth, Structural Change and Regional Inequality in Malaysia Asan Ali Golam Hassan,2017-11-30 Economic development in the long run is seen as a process of structural change that is affected by economic growth Malaysia is one of the middle income economies that are going through rapid structural change Since the mid 1980s it has changed to an industrially based economy with large scale export of electrical and electronic components However thirty years after Malaysia's redistributive policies have been exercised regional inequality still exists This book examines the nature and impact of regional policies in relation to the patterns of demographic and economic structural change and in relation to growth distribution and income disparities across regions in Peninsular Malaysia The book also explores the degree to which differences in regional manufacturing distribution and concentration have contributed to regional inequality It concludes with a number of recommendations for regional policies that will reduce this inequality **Transport Geography of India** Moonis Raza,Yash Aggarwal,1986
