Redesigning the Process for Establishing the Dietary Guidelines for Americans National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Food and Nutrition Board, Committee to Review the Process to Update the Dietary Guidelines for Americans, 2017-12-16 What foods should Americans eat to promote their health and in what amounts What is the scientific evidence that supports specific recommendations for dietary intake to reduce the risk of multifactorial chronic disease These questions are critically important because dietary intake has been recognized to have a role as a key determinant of health As the primary federal source of consistent evidence based information on dietary practices for optimal nutrition the Dietary Guidelines for Americans DGA have the promise to empower Americans to make informed decisions about what and how much they eat to improve health and reduce the risk of chronic disease The adoption and widespread translation of the DGA requires that they be universally viewed as valid evidence based and free of bias and conflicts of interest to the extent possible However this has not routinely been the case A first short report meant to inform the 2020 review cycle explored how the advisory committee selection process can be improved to provide more transparency eliminate bias and include committee members with a range of viewpoints This second and final report recommends changes to the DGA process to reduce and manage sources of bias and conflicts of interest improve timely opportunities for engagement by all interested parties enhance transparency and strengthen the science base of the process **Dietary Guidelines for Americans**, 1986 **Dietary Guidelines for Americans 2015-2020** HHS, Office of Disease Prevention and Health Promotion (U.S.), USDA, Center for Nutrition Policy Promotion (U.S.), 2015-12-31 Learn more about how health nutrition experts can help you make the correct food choices for a healthy lifestyle The eighth edition of the Dietary Guidelines is designed for professionals to help all individuals ages 2 years old and above and their families to consume a healthy nutritionally adequate diet The 2015 2020 edition provides five overarching Guidelines that encourage healthy eating patterns recognize that individuals will need to make shifts in their food and beverage choices to achieve a healthy pattern
