Kasson, 1976 A major theme of American history has always been the desire to achieve a genuinely republican way of life that values liberty order and virtue In *Civilizing the Machine* John F. Kasson asks how new technologies have affected this drive for a republican civilization and the question is as vital now as ever *Civilizing the Machine* was an innovative and compelling work when it first appeared two decades ago Kasson's analysis of the technical developments in transportation communication and manufacture from the Revolution to the of the nineteenth century showed how technologies were dealt with in sources as diverse as the debates of Hamilton and Jefferson the factories of Lowell Massachusetts the writings of Ralph Waldo Emerson the prints of Currier and the utopian and dystopian novels of Howells and Twain His profound wide ranging inquiry into this central issue in American history is now available again with a new Introduction by the author **A Social History of American Technology** Ruth Schwartz Cowan, **Early American Technology** Judith A.

McGaw, 2014-01-01 This collection of original essays documents technology's centrality to the history of early America Unlike

much previous scholarship this volume emphasizes the quotidian rather than the exceptional the farm household seeking to preserve food or acquire tools the surveyor balancing economic and technical considerations while laying out a turnpike the woman of child bearing age employing herbal contraceptives and the neighbors of a polluted urban stream debating issues of property odor and health These cases and others drawn from brewing mining farming and woodworking enable the authors to address recent historiographic concerns including the environmental aspects of technological change and the gendered nature of technical knowledge Brooke Hindle s classic 1966 essay on early American technology is also reprinted and his view of the field is reassessed A bibliographical essay and summary of Hindle s bibliographic findings conclude the volume The contributors are Judith A McGaw Robert C Post Susan E Klepp Michal McMahon Patrick W O Bannon Sarah F McMahon Donald C Jackson Robert B Gordon Carolyn C Cooper and Nina E Lerman Technology in America Alan I. History of American Technology John W. Oliver, 1956-01-01 **The Machine in America** Carroll W. Pursell, 1995 From the medieval farm implements brought by the first colonists to the invisible links of the Internet the history of technology in America is a history of our society as well Arguing that the tools and processes we use are a part of our lives not simply instruments of our purpose historian Carroll Pursell analyzes technology s impact upon the lives of women and men their work politics and social relationships and in turn their influence upon technological development Pursell shows how both the idea of progress and the mechanical means to harness the forces of nature developed and changed as they were brought from the Old World to the New He describes the ways in which American industrial and agricultural technology began to take on a distinctive shape as it adapted and extended the technical base of the industrial revolution He discusses the innovation of an American System of Manufactures and the mechanization of agriculture new systems of mining lumbering and farming which helped conquer and define the West and the technologies that shaped the rise of cities And he shows how the export of technology helped to foster American hegemony both in the Western Hemisphere and elsewhere in the world Pursell also argues that American technology has created a social hegemony not only over the way we live but also over how we evaluate that life He shows that such developments as scientific management techniques and industrial research changed Americans lives as much as the mass production of such durable consumer goods as radios and automobiles In many ways he

concludes today's military industrial complex is the legacy of the intense cooperation between science and technology during World War II
