

Politeness Notions

Two notions of politeness should be differentiated:

- **Common politeness**

Being polite means showing good manners and consideration for other people (e.g. open the door for a lady, give your seat to an elderly person in public transport)

- **Linguistics politeness**

The way people choose to speak and how the hearers react to their speech.

Politeness is essentially asymmetrical: what is polite with respect to hearer or to some third party will be impolite with respect to speaker, and vice versa.

Principles of Politeness, and the Polite Philosopher Ph. D. St Chesterfield, 1796 **Principles of Pragmatics**

Geoffrey N. Leech, 2016-02-17 Over the years pragmatics the study of the use and meaning of utterances to their situations has become a more and more important branch of linguistics as the inadequacies of a purely formalist abstract approach to the study of language have become more evident This book presents a rhetorical model of pragmatics that is a model which studies linguistic communication in terms of communicative goals and principles of good communicative behaviour In this respect Geoffrey Leech argues for a rapprochement between linguistics and the traditional discipline of rhetoric He does not reject the Chomskian revolution of linguistics but rather maintains that the language system in the abstract i e the grammar broadly in Chomsky's sense must be studied in relation to a fully developed theory of language use There is therefore a division of labour between grammar and rhetoric or in the study of meaning between semantics and pragmatics The book's main focus is thus on the development of a model of pragmatics within an overall functional model of language In this it builds on the speech act theory of Austin and Searle and the theory of conversational implicature of Grice but at the same time enlarges pragmatics to include politeness irony phatic communion and other social principles of linguistic behaviour

Lord Chesterfield's Principles of Politeness, and the Polite Philosopher .. A New Edition Philip Dormer Stanhope Earl of Chesterfield, 1792 Lord Chesterfield's Principles of Politeness Philip Dormer Stanhope Earl of Chesterfield, 1812

The Pragmatics of Politeness Geoffrey N. Leech, 2014 This readable book presents a new general theoretical understanding of politeness It offers an account of a wide range of politeness phenomena in English illustrated by hundreds of examples of actual language use taken largely from authentic British and American sources Building on his earlier pioneering work on politeness Geoffrey Leech takes a pragmatic approach that is based on the controversial notion that politeness is communicative altruism Leech's 1983 book *Principles of Pragmatics* introduced the now widely accepted distinction between pragmalinguistic and sociopragmatic aspects of politeness this book returns to the pragmalinguistic side somewhat neglected in recent work Drawing on neo-Gricean thinking Leech rejects the prevalent view that it is impossible to apply the terms polite or impolite to linguistic phenomena Leech covers all major speech acts that are either positively or negatively associated with politeness such as requests apologies compliments offers criticisms good wishes condolences congratulations agreement and disagreement Additional chapters deal with impoliteness and the related phenomena of irony mock politeness and banter mock impoliteness and with the role of politeness in the learning of English as a second language A final chapter takes a fascinating look at more than a thousand years of history of politeness in the English language

Request Strategies Yong-Ju Rue, Grace Qiao Zhang, 2008 This book investigates request strategies in Mandarin Chinese and Korean and is one of the first attempts to address cross cultural strategies employed in the speech act of requests in two

non Western languages The data drawn from role plays and naturally recorded conversations complement each other in terms of exhaustiveness and authenticity This study explores the similarities and differences of the request patterns that emerged in the Chinese and Korean data and the intricate relation between request strategies and social factors such as power and distance The findings raise questions about the influence of methodology on data and the applicability of so called universals to East Asian languages They also offer new insights into generally held ideas of directness and requesting behaviours in Chinese and Korean and the problems of cross cultural and cross linguistic communication This research is suggestive for the disciplines of cross cultural pragmatics cross cultural communication contrastive linguistics applied linguistics and discourse analysis

P. Grice which is called the Cooperative Principle there exists another concept that served when people are talking It is called the Politeness Principle which has above all been developed by Leech In the centre of this concept does not stand the information of a conversation but the effect of what is said on the people
