**Rail Transport** Anna Fraszczyk, Marin Marinov, 2018-06-19. These conference proceedings include a collection of articles presented at the RailExchange conference in October 2017 at Newcastle University UK. They will be useful for researchers in developing countries looking for opportunities of knowledge exchange. The RailExchange project aimed to develop sustainable railway education in Thailand via international partnerships and industry collaborations based around stakeholders' expertise and experiences. It involved staff exchange, academics and researchers between Mahidol and Newcastle University for joint research and curriculum development and also organizing railway conferences and workshops in both Thailand and the UK. The papers published here focus on rail-related issues and present a perspective of a widely understood exchange in academia and industry environments. Exchange is perceived as rail knowledge exchange between partners, rail staff exchange between academia and/or industry, research exchange between teams, student/lecturer knowledge exchange, academia/industry collaboration, etc. In addition, more general rail-related papers are also included.

**Active Safety Methodologies of Rail Transportation** Yong Qin, Limin Jia, 2018-11-02. Safe and high efficiency operation are two main issues in rail transportation. This book focuses on these two key issues, bringing together a wealth of research to offer theoretical and technical support for rail operations and maintenance. In addition, it presents a comprehensive active safety assurance system for rail transportation which includes the quantitative state identification and prediction of train components, rail transportation safety and reliability assessment methods and rail transportation risk assessment at the rail networks level which achieves the quantitative and high precision monitoring of complex systems in real time. In addition, it extends active safety based theory to safety prognostic analysis in the traffic system. Lastly, representative case studies verify that the theory is suitable for the actual traffic system.
