Turner, 2010-08-05 In a general study of Sociological Theory social processes are usually broken down into three tiers macrodynamics societies and large scale institutions microdynamics interpersonal encounters and mesodynamics corporations communities smaller organizations In this seminal work the author pulls these separate areas of research into one comprehensive general theory of social reality More than analytical distinctions or research terminology the author demonstrates that the social world actually unfolds along these three macro micro and meso levels of interaction By developing a set of explanatory testable repeatable principles the author creates a general empirical framework for sociological research The three volumes of Principles of Sociology explore each level of social dynamics individually with cross references to bring the three together This work will be essential for researchers in Sociological Theory and Social Psychology Individual volumes will present new research of interest for researchers in Race and Ethnicity Stratification Demography Political Sociology Organizations and Community Movements Motivation and Emotions **The Principles of Sociology: no. 1. part I.
