The Principles of Aesthetics Dewitt H. Parker,2012-02-15 This book has grown out of lectures to students at the University of Michigan and embodies my effort to express to them the nature and meaning of art In writing it I have sought to maintain scientific accuracy yet at the same time to preserve freedom of style and something of the inspiration of the subject While intended primarily for students the book will appeal generally I hope to people who are interested in the intelligent appreciation of art My obligations are extensive most directly to those whom I have cited in foot notes to the text but also to others whose influence is too indirect or pervasive to make citation profitable or too obvious to make it necessary For the broader philosophy of art my debt is heaviest I believe to the artists and philosophers during the period from Herder to Hegel who gave to the study its greatest development and among contemporaries to Croce and Lipps In addition I have drawn freely upon the more special investigations of recent times but with the caution desirable in view of the very tentative character of some of the results To Mrs Robert M Wenley I wish to express my thanks for her very careful and helpful reading of the page proof
