The Principles of Logic Francis H. Bradley, Carol A. Keene, W. J. Mander, 1999 **The Principles of Logic (Classic Reprint)** F. H. Bradley, 2017-10-11 Excerpt from *The Principles of Logic* The following work makes no claim to supply any systematic treatment of Logic I could not pretend to have acquired the necessary knowledge and in addition I confess that I am not sure where Logic begins or ends I have adopted the title *Principles of Logic* because I thought that my enquiries were mainly logical and for logic at least must be fundamental About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works **The Principles of Logic** Herbert Austin Aikins, 1902 *The Principles of Logic* by Herbert Austin Aikins first published in 1902 is a rare manuscript the original residing in one of the great libraries of the world This book is a reproduction of that original which has been scanned and cleaned by state of the art publishing tools for better readability and enhanced appreciation Restoration Editors mission is to bring long out of print manuscripts back to life Some smudges annotations or unclear text may still exist due to permanent damage to the original work We believe the literary significance of the text justifies offering this reproduction allowing a new generation to appreciate it *The Principles of Logic* F. H. Bradley, 2015-06-24 Excerpt from *The Principles of Logic* Vol 2 1 In the Second Part of the foregoing Book we were concerned with negations We were employed in banishing some views of inference which appeared erroneous Form this negative process we turn with relief and with the hope of rest in a positive result But we must not deceive ourselves The positive result we have already reached offers a welcome in part illusive and a rest that is doomed to speedy disturbance We saw in all inference an ideal synthesis which united round a centre or centres of identity not less than two terms into one construction The conclusion was then a new relation of these

terms and it was by an intuition that we perceived it to exist within the individual whole we had compacted And this account that we gave was not a false account for it was true of those inferences to which we applied ourselves But there are other reasonings no less important which we then ignored and which fall beyond it It was thus a theory provisional and limited in range 2 And there came a point where we had to transcend it In negative inference we were forced to contemplate the possibility of retaining the middle Book II Part I V 8 If our construction being reached we choose to rest in it if we refuse to isolate a single relation within that whole if we prefer to treat the entire compound synthesis as the conclusion we want are we logically wrong Is there any law which orders us to eliminate and where we can not eliminate forbids us to argue The question once asked is its own reply and it rings the knell of a blind superstition which vanishes in daylight If so we have been forced beyond our formula About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Though formal logic has in recent times been the object of radical and spirited attacks from many and diverse quarters it continues and will probably long continue to be one of the most frequently given courses in colleges and universities here and abroad Nor need this be surprising when we reflect that the most serious of the charges against formal logic those against the syllogism are as old as Aristotle who seems to have been fully aware of them But while the realm of logic seems perfectly safe against the attacks from without there is a good deal of unhappy confusion within Though the content of almost all logic books follows even in many of the illustrations the standard set by Aristotle's *Organon* terms propositions syllogisms and allied forms of inference scientific method probability and fallacies there is a bewildering Babel of tongues as to what logic is about The different schools the traditional the linguistic the psychological the epistemological and the mathematical speak different languages and each regards the other as not really dealing with logic at all No task is perhaps so thankless or

invites so much abuse from all quarters as that of the mediator between hostile points of view Nor is the traditional distrust of the peacemaker in the intellectual realm difficult to appreciate since he so often substitutes an unclear and inconsistent amalgam for points of view which at least have the merit of a certain clarity And yet no task is so essential especially for the beginner when it is undertaken with the objective of adjusting and supplementing the claims of the contending parties and when it is accompanied by a refusal to sacrifice clarity and rigor in thought In so far as an elementary text permits such a thing the present text seeks to bring some order into the confusion of tongues concerning the subject matter of logic But the resolution of the conflicts between various schools which it effects appears in the selection and presentation of material and not in extensive polemics against any school The book has been written with the conviction that logic is the autonomous science of the objective though formal conditions of valid inference At the same time its authors believe that the aridity which is not always unjustly attributed to the study of logic testifies to the unimaginative way logical principles have been taught and misused The present text aims to combine sound logical doctrine with sound pedagogy and to provide illustrative material suggestive of the role of logic in every department of thought A text that would find a place for the realistic formalism of Aristotle the scientific penetration of Peirce the pedagogical soundness of Dewey and the mathematical rigor of Russell this was the ideal constantly present to the authors of this book

Logic Alexander Pfänder, 2013-05-02 Alexander Pfänder's classical phenomenological logic a masterwork of unmatched clarity is presented here for the first time in English The book unfolds the general essence of logic its object not acts of thinking but objective thoughts meanings and higher unities formed by them the nature and kinds 1 of judgments propositions and their truth and truth claims 2 of concepts and 3 of inferences 4 the first foundational principles of logic the principles of identity contradiction excluded middle and sufficient reason and of valid inferences their foundation in ontological principles as well as the valid forms of reasoning recognized in traditional logic and the reasons of their validity Being a new phenomenological exposition of traditional logic it reduces the symbolic language used to a minimum in order to concentrate on the logical meanings and laws themselves for which these symbols are signs
