Principles Of Population And Development With Illustrations From Asia And Africa:

Principles of Population and Development Nigel Crook, 1997 Principles of Population and Development is designed to fill a significant gap in introductory teaching materials on population for undergraduate and Masters students of demography development studies economics geography and related disciplines The text grew out of Nigel Crook s lectures at SOAS University of London and its use of models and data from a wider than normal geographical base reflects his intention to produce a truly international course book The book considers the debate over the relationships between population natural resources and development from Malthus on and introduces recent thinking on population and environment issues The political economy of famine and health and of fertility and birth control is discussed in detail The final chapters focus on interrelationships between population change and urbanization and industrialization in the developing world Each chapter introduces theories and ideas about population and development and then moves on to empirical and quantitative material and case studies Demographic measures and principles are explained fully in boxes without taking any prior technical knowledge for granted

Connecting Africa and Asia Yoichi Mine, 2022-04-19 By 2100 more than 80 per cent of the world s population is expected to live in Afrasia Africa and Asia This book draws lessons from history provides a new cognitive map of the world and discusses multiple challenges global citizens will face in the age of Afrasia an emerging macro region The centre of gravity of the world is shifting Whether the world can manage a soft landing into sustainable equilibrium depends on the nature of the dialogue people in Africa and Asia will organise The author argues that a state of equilibrium between the two is achievable provided issues related to gender employment agriculture human nature relationships and multicultural coexistence are simultaneously addressed Can future Afrasia present itself as a community determined not to allow the return of predatory practice internally and externally Will the fates of African and Asian peoples converge or diverge How about the future relationships between Afrasia and the rest of the world Exploring these questions using multiple disciplines this book will be of interest to professional researchers and graduate students in IR and Afro Asian relations as well as Asian and African area studies demography geography history development economics anthropology language education and religious studies The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Routledge Handbook of Africa-Asia Relations Pedro Amakasu Raposo, David Arase, Scarlett Cornelissen, 2017-10-30 The Routledge Handbook of Africa Asia Relations is the first handbook aimed at studying the interactions between countries across Africa and Asia in a multi disciplinary and comprehensive way Providing a balanced discussion of historical and on going processes which have both shaped and changed intercontinental relations over time contributors take a thematic approach to examine the ways in which we can conceptualise these two very different yet inextricably linked areas of the world Using comparative examples throughout the chronological sections cover Early colonialist contacts between Africa and Asia Modern Asia Africa

interactions through diplomacy political networks and societal connections Africa Asia contemporary relations including increasing economic security and environmental cooperation This handbook grapples with major intellectual questions defines current research and projects future agendas of investigation in the field As such it will be of great interest to students of African and Asian Politics as well as researchers and policymakers interested in Asian and African Studies

Journal of Economic Literature ,1998 World Hunger, Health, and Refugee Problems: Special study mission to Africa, Asia & Middle East United States. Congress. Senate. Committee on the Judiciary. Subcommittee to Investigate Problems Connected with Refugees and Escapees,1973 **An Essay on the Principle of Sustainable Population** Toshihiko

Hara,2020-05-23 This book focuses on the future of the global population and proposes revising Malthus Law The United Nations estimates that the global population will top 11 billion by 2100 at which point its growth will be near an end it will find a new equilibrium in a long demographic transition from high birth and death rates to low ones However the author reviews the fertility developments reported in the World Population Prospects 2017 which are near or below the replacement level in most regions with the important exception of Sub Saharan Africa and warns of a possible scenario of the extinction of human society Returning to Malthus his Essay on the Principle of Population is critically reconsidered Simple simulations show that exponential growth and decay are unsustainable beyond the narrow ranges of the net reproduction rate In addition the length of reproduction periods which depends on women s lifespans plays a pivotal role The limits of growth are given in any case to the extent that time and space will permit From this perspective teleological conditions such as instinct passion or even natural reproductive tendencies are irrelevant and unnecessary When the population deviates too far from the replacement level either its shrinking or massive growth will overshoot the limits of its existence This principle of sustainable population indicates that the demographic transition must follow a logistic curve Using a system dynamics approach the author constructs a simulation model based on four major loops fertility reproduction timing social capital accumulation and lifespan Using only endogenous variables this model successfully reproduces the historical process of the demographic transition in Japan Thereby it shows that the timing and periods of reproduction maximum fertility and maximum lifespan hold the key to sustainability Based on these findings the author subsequently discusses recovering replacement fertility extending lifespans and the demographic future of the human race Asia and the History of the International Economy

A.J.H. Latham,Heita Kawakatsu,2018-02-02 The Christian churches have frequently pioneered educational advances from the seventh century down to the nineteenth Schools universities and colleges of education stand as tangible evidence of these efforts Do all these ventures belong merely to educational history relics of the days when Christianity was influential enough to play a leading part in education Or has Christianity still a distinctive contribution to make to educational thought and practice The educationalists who contributed to the Hibbert Lectures of 1965 are convinced that it has They examine the nature of this contribution and show how it is to be made a time when education seems to be mainly influenced by secular

rather than religious assumptions and aims The six lectures fall into two main parts Christianity in the schools is the theme of the first three Christianity in higher education that of the last three *Africa's Demographic Transition* David

Canning,Sangeeta Raja,Abdo S. Yazbeck,2015-10-22 Africa is poised on the edge of a potential takeoff to sustained economic growth This takeoff can be abetted by a demographic dividend from the changes in population age structure Declines in child mortality followed by declines in fertility produce a bulge generation and a large number of working age people giving a boost to the economy In the short run lower fertility leads to lower youth dependency rates and greater female labor force participation outside the home Smaller family sizes also mean more resources to invest in the health and education per child boosting worker productivity In the long run increased life spans from health improvements mean that this large high earning cohort will also want to save for retirement creating higher savings and investments leading to further productivity gains Two things are required for the demographic dividend to generate an African economic takeoff The first is to speed up the fertility decline that is currently slow or stalled in many countries The second is economic policies that take advantage of the opportunity offered by demography While demographic change can produce more and high quality workers this potential workforce needs to be productively employed if Africa is to reap the dividend However once underway the relationship between demographic change and human development works in both directions creating a virtuous cycle that can accelerate fertility decline social development and economic growth Empirical evidence points to three key factors for speeding the fertility transition child health female education and women s empowerment particularly through access to family planning Harnessing the dividend requires job creation for the large youth cohorts entering working age and encouraging foreign investment until domestic savings and investment increase The appropriate mix of policies in each country depends on their stage of the demographic transition *Crises of Governance in Asia and Africa* Sandra J. MacLean,Fahimul

Quadir,2017-07-12 This title was first published in 2001 Investigating the relations between ethnicity and governance in Asia and Africa and going well beyond traditional and orthodox treatments this volume is not only a stimulating text but also an invaluable tool for original and innovative research **Friends' Quarterly Examiner** ,1912 *Reading Images* Gunther R.

Saxena,A. K. Tiwari,2017-10-14 Begomoviruses are one of the most interesting plant viruses to study for basic and applied research as they cause huge economic losses to agriculture industries and farmers all over the world They belong to family Geminiviridae and are emergent plant viral pathogens which cause diseases in various crops in the tropical and subtropical regions They are transmitted by the whitefly *B. tabaci* and have either one monopartite DNA A or two bipartite DNA A and DNA B genomic components DNA A and DNA B are of 2600 2800 nucleotides each A number of serious diseases of cultivated

crops of the Fabaceae Malvaceae Solanaceae and Cucurbitaceae families are caused by Begomoviruses which are considered as threat to their cultivation in many countries Accurate diagnosis is important for successful diseases management since plants infected by Begomovirus do not recover suffer serious yield losses and act as further sources of inoculum which is then picked up and spread by their vector whitefly *B. tabaci* Reports of occurrence of new viruses and re emergence of several known viruses in new niches have become regular event In such a dynamic system growth of several crop species relies on an accurate diagnosis management and better understanding of the biology of the casual virus This is crucial to evolve appropriate control practices and to prevent the virus infection Researchers have achieved considerable progress in characterization detection and management of virus on different crop species in the last decade This book covers latest information in diagnosis of begomoviruses in the present scenario and explores the new vistas in the field of genomics and proteomics Chapters in Section 1 illustrates the occurrence genome organisation transmission and diagnostics of begomoviruses It also details the diseases caused by begomoviruses on different crops detection techniques and management strategies in support of research findings by presentation of data graphics figures and tables Section 2 is a chapterwise collection of occurrence diversity and status of begomoviruses in Asian Africa counties where the diseases are most prevalent This book will provide wide opportunity to the readers to have complete information and status of begomovirus in Asia and Africa This will be useful resource for researchers and extension workers involved in the begomovirus disease diagnosis and molecular biology Expert detection accurate diagnosis and timely management play a significant role in keeping plants free from pathogens In this book expert researchers share their research knowledge and literature which are vital towards the diagnosis of begomoviruses addressing traditional plant pathology techniques as well as advanced molecular diagnostic approach The book deals with the economically important crops including fruits vegetables along with challenges in crop protection against diseases caused by begomovirus This will be resourceful and handy for researcher practitioners and also students *East Asia and Food (In)Security* Shaun Breslin, Christopher W.

Hughes, 2017-10-02 This book presents a study of perceptions of food insecurity in East Asia and explores how individual countries are developing strategies to deal with the situation It also looks at how the perception of food insecurity has increasingly influenced the nature of international interactions not just within East Asia but also in the region's relations with major external actors Many of the challenges facing East Asia are generic food security issues that face people and governments across the world for example the implications of climate change and demographic changes on food supplies This book places the East Asian context in the wider discussion of food in security in global politics However it also identifies potential regional differences for example the significance of rice for the region and the unavoidable impact of China as a major regional player What the Chinese state and Chinese companies decide to do in response to concerns about food insecurity have an impact not just on the rest of the region but on the rest of the world Taking too much of a Sinocentric

focus however ignores other actors in East Asia or merely relegates discussion to how they respond to Chinese policies or external strategies This book considers the region as a whole both when it comes to thinking about food security challenges and responses within the region itself and also in the outward projection of regional food insecurity on the rest of the world

South Asia and Africa After Independence Bernard Waites, 2012-01-17 Post colonial South Asia and Africa invite comparison along with their political boundaries they inherited from colonial regimes administrative languages a cluster of sovereign state institutions and modern economic nuclei When they became independent South Asian and African states were for all their diversity thrust into a common position in the international system and embarked on a common history as emergent non aligned developing nations This is the first book to offer a single volume comparative history of postcolonial South Asia and sub Saharan Africa in the first generation since independence South Asia and Africa After Independence draws together the political and economic history of these two regions assessing the colonial impact establishing breaks and continuities and highlighting their diversity and interplay Waites sets out a framework for analysing the first generation of post colonial history offering an interpretation of post colonialism as a historical phenomenon and provocatively challenging us to re think this term in relation to South Asian and African history This book is an important reference for the study of global world African and South Asian history

Cultural Sociology of the Middle East, Asia, and Africa Andrea L. Stanton, 2012 In our age of globalization and multiculturalism it has never been more important to understand and appreciate all cultures across the world The four volumes take a step forward in this endeavour by presenting concise information on those regions least well known to students across Europe the Middle East Asia and Africa The volumes convey what daily life is like for people in these selected regions Entries will aid readers in understanding the importance of cultural sociology to appreciate the effects of cultural forces around the world and to learn the history of countries and cultures within these important regions Key Features Topics are explored within historical context in three broad historical periods prehistory to 1250 1250 to 1920 and 1920 to the present One volume each is devoted to the regions of the Middle East and Africa and then one volume to East and Southeast Asia and a final volume to West Central and South Asia The volumes include extensive use of photographs and maps to explain cultural and geographic content Each volume has its own volume editor with expertise in that particular region Key Themes Arts Culture and Science

People Society and Dynasties Religion and Law Family and Daily Life Conflicts and Wars Politics and Government Health and Education Economy Trade and Industry National Geography and History **Combating Desertification in Asia, Africa and the Middle East** G. Ali Heshmati, Victor R. Squires, 2013-07-01 This book is about the how of desertification control as opposed to an analysis of the why and fills a gap in the desertification related literature in that it shows what to do in situations ranging from fixing mobile sands to arresting accelerated soil erosion in sloping lands There are numerous illustrations to show the successful techniques This compilation demonstrates that desertification and land degradation can be controlled and reversed with existing techniques in such widely varying environments as the Sahel of Africa to Sri Lanka and the Philippines in SE Asia from mountains in Lesotho to low lands on desert margins in Mongolia Proven approaches include technical interventions changes in governance and to the legislative framework and policy reform The book fills a gap in the desertification related literature in that it shows what to do in situations ranging from fixing mobile sands to arresting accelerated soil erosion in sloping lands
