Churchill, 2016-04-15 This investigation contributes to the existing scholarship on women and medicine in early modern Britain by examining the diagnosis and treatment of female patients by male professional medical practitioners from 1590 to 1740 In order to obtain a clearer understanding of female illness and medicine during this period this study examines ailments that were specific and unique to female patients as well as illnesses and conditions that afflicted both female and male patients Through a qualitative and quantitative analysis of practitioners records and patients writings such as casebooks diaries and letters an emphasis is placed on medical practice Despite the prevalence of females amongst many physicians casebooks and the existence of sex based differences in the consultations diagnoses and treatments of patients there is no evidence to indicate that either the health or the medical care of females was distinctly disadvantaged by the actions of male practitioners Instead the diagnoses and treatments of women were premised on a much deeper and more nuanced understanding of the female body than has previously been implied within the historiography In turn their awareness and appreciation of the unique features of female anatomy and physiology meant that male practitioners were sympathetic and accommodating to the needs of individual female patients during this pivotal period in British medicine      **Catalogue of Title Entries of Books and Other Articles** ,1899      The Supply Chain Management Casebook Chuck Munson, 2013 30 up to date case studies illuminate every aspect of modern supply chain management Risk management analytics global supply chain issues and much more Innovative processes technologies strategies and tactics An indispensable resource for both students and practitioners This casebook brings together 30 focused cases addressing virtually every aspect of supply chain management from procurement to warehousing strategy to risk management IT to supplier selection and ethics A global team of contributors presents key challenges in industries ranging from pharmaceuticals to fashion and previews issues ranging from the limits of lean to the potential of 3 D printing Cases vary in length and complexity offering maximum flexibility to both instructors and readers a convenient table provides fast access to specific topics Qualitative cases are supported by relevant discussion questions and sample responses quantitative cases are supported by completed numerical solutions and where applicable associated spreadsheets      **Legal Education in the Digital Age** Edward L.
