**The Printing Press** Joanne Mattern, 2002-08-01 Did you know that Gutenberg took five years to print 210 copies of The Forty two line Bible and that each book had more than 1 280 pages That s just one of the amazing facts that readers will learn as they follow the development of what has been called the most important invention ever Historical photos and easy to read text bring the history of the printing press to life for reluctant readers Printing Press Joanne Mattern, 2003 *The Impact of Printing on the Development of the English Language During the Period of the Renaissance* Susanne Krebs, 2009-10 Seminar paper from the year 2004 in the subject English Language and Literature Studies Linguistics grade 2 3 University of Koblenz Landau Anglistik course The Story of English language English abstract The 15th century must be seen as the age of innovation in Europe For the spread of Renaissance culture as we know it today several factors were decisive advances in the fields of arts e g architecture painting and literature science e g geography astronomy and medicine economy e g flourishing international trade and of course technology as the example of the printing press shows By definition The printing press is a mechanical device for printing many copies of a text on rectangular sheets of paper This definition might give the impression we are dealing with a simple gadget and a rather unspectacular procedure but until 1450 the original method of printing was block printing pressing sheets of paper into individually carved wooden blocks which would not last very long because of the pressure exercised upon them during the process of printing Knowing this the invention of the printing press seems even more valuable as the former method described here required a lot of energy money and time and yielded a relatively ridiculous output A less costly method of producing printed material needed to be found and the former goldsmith Johannes Gutenberg 1398 1468 from Mainz in Germany is acknowledged as the pioneer in this field He experimented with metal alloy and finally created movable types which could be used and reused for printing without the effect of wearing down like the wooden material Immediately the printing press had the effect of multiplying the output and cutting the costs of books thus making information available to a much larger part of the population So it can be said that the printing press initiated an infor The Information Revolution in Early Modern Europe Paul M.
