Disrupting Human Resources Talent Rules Ganesh Shermon,2016-12-07 Human Resources Disrupted This book is a detailed analysis of what causes HR disruptions in both positive and negative ways It is about CEO and CHRO s role and their influence in building organizations or destroying value while struggling to understand digital business models products customers and high performing cultures The book contains best practice examples of people disruptors digital strategies for talent management predictions trends HR functions going out of fashion digital climate possibilities Value based cultures organizational design HR tech elements HR knowledge management organization re roles and HR business model based structural options detailed surveys tests methodologies on Talent Strategies etc At the core Talent Rules The Concept of Coexistence in Islamic Primary Sources Ali Shehata Abdou Selim,2015-02-27 The terms coexistence partnership citizenship and globalization all have a profound impact on today s decision makers and their policy formation as well as on individuals While these terms have been widely used all over the world particularly in the West in the construction of identity they have been considered unworthy of a detailed analysis in the context of Muslim identity Some scholars argue that Muslim Christian relations are caught between advocates of homogenization on the one hand and supporters of self affirmation on the other While the former concept favours relativism the latter is seen to encourage fanaticism In addition such scholars claim that

the tension between Muslims and Christians is due to a complex history of rivalry and war which has led to the issue of Muslims positive coexistence being elucidated from historical and sociological points of view Given the paucity of literature regarding a faith based study of Muslim coexistence this book elaborates on the theological aspect of Muslims coexistence in non Muslim lands and raises a number of theological questions arguments and counter arguments pertinent to this issue Is it permissible for Muslims to live in a non Muslim country Is it permissible for Muslims to acquire non Muslim citizenship What are the obstacles How do Muslims perceive civic duties in non Muslim countries Are Muslims obliged to fulfil them The book presents a number of scholarly discussions from past and contemporary sources as well as international human rights treaties which stress the significance of the much overlooked factor of context

Agricultural Land Use and Natural Gas Extraction Conflicts Madeline Taylor,Tina Hunter,2018-11-02 Onshore unconventional gas operations in most jurisdictions operate on the legal principle that all activities during exploration and extraction are temporary in nature The concept that the onshore unconventional gas industry has a temporary effect on the land on which it operates creates a regulatory paradox On one hand unconventional gas activities create energy security national wealth and a burgeoning export industry On the other agricultural land and agriculturalists may be significantly disadvantaged by unconventional gas activities potentially producing permanent damage to non renewable fertile soils and spoiling the underground water tables Thus threatening future food security and food sovereignty This book explores the socio regulatory dimensions of coexistence between agricultural and onshore unconventional gas land uses in the jurisdictions with the highest concentration of proven unconventional gas reserves Australia Canada the USA the UK France Poland and China In exploring the differing regulatory standpoints of unconventional gas land uses on productive farming land in the chosen jurisdictions this book provides an original three part categorisation of regulatory approaches addressing the coexistence of agricultural land and unconventional gas namely adaptive management precautionary and finally statism It offers a timely and topical approach to socio legal natural resource governance theory based on the participation transparency and empowerment for agricultural landholders examining how differing frameworks such as the collective bargaining framework can create equitable and sustainable contractual arrangements with unconventional gas companies

Gorbachev's New Thinking and Third World Conflicts Jiří Valenta, Frank Cibulka, Some of the most crucial changes inspired by Gorbachev and perestroika concern Soviet and East European policies toward Third World countries Despite countless studies of Soviet U S relations and U S relations with the Third World the area of Soviet relations with the Third World has been left relatively undeveloped This is the first of several volumes intended to add to our knowledge of what the series editor Jiri Valenta characterizes as East South relations In this new era of cooperation and diplomacy the superpowers are working to resolve regional conflicts in and around Afghanistan Nicaragua Angola and Cambodia Such efforts are exceedingly complex since they necessarily involve not only the Soviet Union but Third World nations that may operate independently such as Cuba and Vietnam This

volume addresses a number of such conflicts In addition to those already mentioned conflicts in Ethiopia Namibia and the Philippines are discussed and their implications for Western policy makers are reviewed As the contributors emphasize despite current Soviet emphasis on peaceful solutions to regional conflicts Gorbachev s New Thinking in foreign affairs is still decidedly selective In some cases the Soviet Union will actually encourage close ties with regional Third World powers as it has with India It is also too much to expect that the Soviet Union much less Cuba and Vietnam will completely cut ties to revolutionary allies worldwide That said the 1990s will undoubtedly be characterized by new Soviet foreign policy styles Their shape and form is the subject of this book It will be of immense interest to policymakers and researchers concerned about current developments in relations between the superpowers and with the Third World Contributors include Vernon Aspaturian Bhabani Sen Gupta William E Griffith Jerry F Hough Douglas Pike Howard Wiarda AH T Sheikh Sabahuddin Kushkaki Colin Legum H de V du Toit Khien Theeravit Frank Cibulka Alvaro Taboada Charles William Maynes W Bruce Weinrod Jiri Valenta *Labour Worldwide in the Era of Globalization* Peter Waterman,2016-07-27 This is an edited collection of items on unionism worldwide recognising the crisis that an informatised and globalised capitalism implies for work workers and the trade union movement It considers radical alternatives for labour organisation and action in the 21st century The book includes contributions by informed academics and unionists and proposes alternative union policies or models in relation to the working class es to women democracy ecology internationalism *Advances in Frontier Research on Engineering Structures Volume 2* Yang Yang,Sudharshan N.
