Kimmet Edgar, Ian O'Donnell, Carol Martin, 2014-02-04 Prisons are dangerous places and assaults threats theft and verbal abuse are pervasive attributable both to the characteristics of the captive population and to an institutional sub culture which promotes violence as a means of resolving conflicts Yet the crimes perpetrated by prisoners on other prisoners have attracted little interest and criminological research has contributed little to an understanding of situations in which violence arises in penal institutions This book seeks to remedy this and to address and answer a number of key questions how do features of the prison social setting shape conflicts what social norms guide the decision to use violence what are the personal and social consequences of spending months or years in places where distrust and anxiety are normal how do staff respond to the dangers that are part of daily life in many prisons is it possible to identify factors associated with risk and resilience and what methods of handling conflicts do prisoners use that could prevent violence Prison Violence adopts a distinctive approach to answering these questions and is based on extensive research including interviews with both victims and perpetrators of prison violence it pioneers a conflict centred approach seeking to understand the pathways into and out of situations where there is potential for violence focusing on interpersonal and institutional dynamics rather than on individual psychological factors

Preventing Prison Violence Armon J. Tamatea, Andrew J. Day, David J. Cooke, 2023-09-08 Preventing Prison Violence introduces the idea of prison ecologies a multi layered perspective to understanding prison violence as a product of human environment social and physical systemic and societal influences and how an ecological approach is helpful to prevention efforts Interpersonal violence is a global concern and a significant cause of death around the world In prisons the human financial and health burden of violence presents a significant social issue as well as a wicked problem that does not permit of simplistic solutions Recent innovations in data capture means that questions about violence gang affiliations and prisons that could not be answered previously can now be explored The central theme of this book is that prisons are ecologies spaces where people resources and the built environment are interrelated and that violence is a

product of a complex of interpersonal and environmental factors that increase the likelihood of assault but also provide opportunities for solutions Drawing on psychology geography indigenous knowledge gang culture and predictive modelling this book expands beyond the conventional individual focused assessment intervention prevention approach to research in this field towards a holistic and ecological way of thinking that recognises individual organisational and cultural factors as well as the role of the physical environment itself in the facilitation and prohibition of aggression Providing a comprehensive resource for those who are interested in making prisons safer firmly based in contemporary research and theory Preventing Prison Violence will be of great interest to students and scholars of Penology Violence and Forensic Psychology as well as to professionals working in criminal justice settings

Understanding and Reducing Prison Violence Benjamin Steiner, John Wooldredge, 2019-12-06 Understanding and Reducing Prison Violence considers both the individual and prison characteristics associated with violence perpetration and violent victimization among both prison inmates and staff Prison violence is not a random process rates of violence vary across prisons and the odds of perpetrating violence or experiencing violent victimization vary across inmates and staff A comprehensive understanding of the causes of prison violence therefore requires consideration of both individual and prison characteristics Building on large dataset comprising 5 500 inmates and 1 800 officers across 45 prisons located across two of the United States Ohio and Kentucky this book showcases one of the largest and most comprehensive studies of prisons carried out to date It considers both the implications of the study for theories of prison violence and the implications of the study for preventing violence in prisons It will be of interest to academics practitioners and policy makers alike

Prison Victimization Lee H. Bowker, 1980 The book begins by exploring the causes and varieties of forced homosexual behaviour in American correctional institutions It also describes other forms of violence among prisoners and relates incidents from the author's experience as administrator of a therapeutic community for violent drug abusers Prisoner violence among females and juveniles is also discussed Research that compares violence in institutions for women and adolescents with violence in prisons for men is covered The concept of victimization is broken down into the components of psychological victimization in which the aggressor manipulates other prisoners while avoiding fights economic victimization including loan sharking gambling fraud pricing violations thefts and robbery and social victimization which occurs because the prisoner is a member of an identifiable social group The victimization of prisoners by staff members and the various dangers currently faced by prison staff members are also explored Other chapters consider the causes responsibilities and solutions associated with prison victimization while proposing some easily implemented and less expensive solutions Some feasible but more expensive solutions are also discussed Three radical solutions proposed are based on the concept of open correctional colonies Notes are provided for each chapter An appendix examines how social scientists obtain information on prison life and prison victimization Source NCJRS

Prison Victimization Nobuhle Chonco, 1987 **The 'Million Dollar Inmate'** Heather Ahn-Redding, 2007-12-17 What kinds of

beliefs do most Americans hold about crime and violence and where do these beliefs come from What kinds of people are sent to prison are the average inmates dangerous criminals or are they involved in low level drug related property or public order offenses Who is ultimately paying for their time in prison The Million Dollar Inmate highlights the financial and social costs of America s incarceration of non violent offenders With its focus on the specific population of non violent offenders this book provides a unique sociological approach to the problem of handling such a large population at such tremendous costs paid for the most part by taxpayers Basing her insight on extensive research into the origins of America s correctional systems the visible and non visible costs incurred by the practice of incarcerating nonviolent offenders and the goals of the prison system Heather Ahn Redding dares to expose flaws in current correctional practices and suggest ways they can be not only changed but also re envisioned Ideally suited to researchers advanced undergraduate students graduate students and policymakers

Criminal Rehabilitation. Animals in Prison Richard Teotico, 2013-07-25 Essay from the year 2008 in the subject Sociology Law and Delinquency grade A Kwantlen Polytechnic University course Criminology 1208 language English abstract Modern society has always been fascinated with criminal activity it floods our newspapers serves as a plot for shows movies games and is even used by political parties to push social policies However once the perpetrators of crime are placed in prison it is as if society turns a blind eye In an ironic twist of fate incarcerated offenders are often met with an environment which further propagates future deviant behaviour Steiner Wooldredge 2008 While many believe that prison is intended to serve as a form of punishment it is often overlooked that many offenders will eventually be re introduced into society So while prison does not have to serve as a proverbial bed and breakfast proper rehabilitative measures need to be taken in an attempt to mitigate the implications of aggressive temperaments and poor behavioural controls which are often linked with crime Sprinkle 2008 This paper will examine one

questionable form of prison rehabilitation program the use of animals as a tool in workshops to encourage pro social behaviour and whether this program will lessen the rate of inmate on inmate victimization within the prison setting
